AUDITORS: BDO S.p.A.

- (1) Appointed on 26 April 2012; office expires with the shareholders' meeting for the approval of the 2014 financial statements.
 (2) Member of the Control and Risk Committee; member of the Nominating and Compensation Committee.

The main powers reserved in the statute to the Board of Directors are the examination and approval of the strategic, industrial and financial plans of the company; the purchase, sale, exchange or transfer of fixed assets and real estate rights; the granting of collateral on fixed assets; the set up of new subsidiaries and the take-over, acquisition or sale of corporate investments; the acquisition, sale, exchange or transfer of the whole company or of business lines; the underwriting of obligations, commitments and responsibilities which, either singularly or jointly with other connected negotiations, come to more than €4,000,000; the nomination of managing directors; the release of warranties and real or personal guarantees of any kind to the sum of more than €2,000,000 for each individual transaction and, if in the interest of subjects other than the Company and its subsidiaries, to any sum whatsoever; the examination and preventive approval of significant transactions including those with company related parties and company subsidiaries; verification of the appropriateness of the administrative and organisational structure and the general accounting, the internal control system and any conflicts of interest.

The Chairman and Managing Director of the parent company CAD IT S.p.A., Giuseppe Dal Cortivo, is authorised to perform all ordinary and extraordinary administrative duties, excluding only those which can not be delegated by law and those assigned to the Board of Directors by article 19 of the company by-laws.

The Vice-Chairmen Giampietro Magnani and Luigi Zanella, pursuant to article 20 of the company by-laws, carry out vicarious functions to those of the President in case of his absence or impediment. The managing directors, Giampietro Magnani and Luigi Zanella, will have full ordinary administrative power including the faculty to prepare reports and to order banking transactions, within the limits of account availability and credit worthiness with the power to act alone for each individual transaction to the amount of Euro 2,000,000 (two million) and with the joint signature of another managing director for each individual transaction to the amount of Euro 4,000,000 (four million); furthermore, the aforementioned directors will have the power and faculty, with their single free signature, to purchase and/or sell registered assets, with the exception of boats and airplanes of any kind.

The Managing Director Paolo Dal Cortivo will have full ordinary administrative power including the faculty to prepare reports and to order banking transactions, within the limits of account availability and credit worthiness, with the power to act alone for each individual transaction to the amount of Euro 2,000,000 (two million) and with the joint signature of another managing director for each individual transaction to the amount of Euro 4,000,000 (four million). The said Managing Director will have ordinary administrative power to represent the Company in terms of relations with institutional investors and shareholders as well as with Borsa Italiana S.p.A. and Consob, by sending them communications and information, including anything required by the laws in force and/or the international best practice rules in respect of the laws and rules themselves and any internal regulations.

CAD IT Group at 30/06/2013

PRELIMINARY REMARKS

This six-monthly financial report has been drafted in accordance with Leg. Dec. 58/1998 and subsequent modifications and laid out to conform to the provisions issued in art. 9 of Leg. Dec. no. 38/2005, as well as observing Consob regulation no. 11971 of 14th May 1999 and subsequent modifications and integrations.

The six-monthly financial report laid out to conform with the applicable International accounting standards recognised by the European Community as in accordance with the EC regulation no. 1606/2002 of the European Parliament and Council on 19th July 2002 and in particular with IAS 34 – Interim Financial Reporting. The report was drafted by applying the same accounting standards used for drafting the Consolidated Balance at 31st December 2012, with the exception of the items described in the explanatory notes – Accounting Standards paragraph, amendments and interpretations applied since 1st January 2013.

The six-monthly financial report includes the summarised six-monthly balance, an intermediary report on the management, the declarations provided for in article 154-bis, paragraph 5 and the auditing company's report on the aforementioned summarised balance.

Unless otherwise indicated, the monetary quantities in the accounting tables and those in the notes, are shown rounded off to the nearest thousand euro. The totals and subtotals of the statements presented are determined by rounding the sum of the point data. The percentage figures shown are calculated using the non-rounded off figures.

INTERIM MANAGEMENT REPORT

This intermediary report on management accompanies CAD IT Group's summarised six-monthly balance at 30th June 2013 and contains references to important events that have occurred during the first six months of the financial period and their incidence on the summarised six-monthly balance, together with a description of the main risks and uncertainties that may occur in the remaining six months to come. The interim management report also contains information on the relevant and correlated party transactions as well as an indication of significant (or relevant) transactions that occurred up to the moment of drafting the report.

Information on CAD IT and Group's activities

CAD IT is the leader of a group that is one of the most dynamic organisations in the Italian information technology sector.

For almost 35 years, the Group has been dealing with the banking and insurance market and the world of business and public administration by offering software solutions, maintenance, personalisation, integration and other correlated services from application management to outsourcing, consultancy to training.

The CAD IT Group operates in Italy with its own branches and Group companies. Its Head Office is in Verona but there are other units in Milan, Rome, Prato, Padua, Mantua.

CAD IT is leader in the Italian software market for the banking sector with its "Financial Area" products, a programme which completely manages all functions connected to negotiation, settlement and administration of security transactions, debentures, derivatives (in any currency) and adopted, according to company estimations, by about 90% of Italian banking outlets.

In addition, the Group boasts long-standing activity in the industrial sector and the capacity to offer solutions for e-business, credit and industrial companies in constant evolution.

Solutions for public administration make up the newest sector but they capitalize the Group's traditional abilities like its more than thirty years experience in developing computer systems for public body.

A dynamic and innovative company...

The group philosophy is that every customer situation is unique and for each of them will be sought specific solution. For this reason group's technology solutions are established on component-based architectures that allow for secure, phased and progressive implementation.

With over 600 highly trained professionals employed within the company, the aim of the Group is to harness innovation and technology to help the company run better.

... with a broad and impressive customer base

CAD IT serves demanding market-leading organisations across Europe.

Its customer base includes banking groups, national authorities, local authorities, consumer goods companies, insurance companies, outsource service providers and foundations.

Each day, its technology solutions support over 200,000 end-users in over 600 organisations with their essential tasks in Italy, Switzerland, Germany, UK and the Czech Republic.

...operating through a dedicated company network

During the years it has widened its product range through the continual increase in new skills, a careful strategy of acquisitions and partnerships, considerable investment in research and development and constant market trend monitoring, that has always favored the issue of products in line with the changing needs and anticipating needs.

The founding of new companies and other strategic purchases have enabled the Group to improve synergies and to enter new markets, e.g. business intelligence and control and management systems for banks, insurance companies, private and public institutions, innovative solutions to interconnect financial markets, SIM (securities brokerage firm) and SGR (company asset management), ERP applications and solutions for local tax collection

agencies.

... with market leading products based on reliable and flexible technology

CAD IT has proven and functionally-rich technology solutions and offers its customers true expertise in technology. With the gained experience and consistent R&D in technology design and application development, the group has the expertise to build reliable, user-friendly and highly scalable application architecture.

Based on an independent model platform, service oriented its architectures offer customers the flexibility of phased implementation within a technology framework that is designed for today and can evolve around their changing needs. The “lego” methodology, coupled with a broad range of services, facilitates the tailoring of common technological solutions to the customer’s situation.

... combining with a comprehensive set of services

The services offered are related to developed solutions in the following areas:

- project management;
- system integration;
- consultancy and training;
- customisation and change management activities;
- application monitoring & support through agreed SLA;
- multi-lingual, 24x7 Help Desk;
- regulatory support;
- application development;
- application maintenance;
- private cloud;
- business processing.

... and a laser focus on customer service

Guidelines, frameworks and specific toolsets are in place to ensure every aspect of work is linked to these needs from requirements and service planning, through solution development to deployment and support.

Software Development Centre of CAD IT supports all software releases, documentation and materials that allow to simplify the operation activities of its customers.

The Group developed a special single-point-of-contact (SPOC) Customer Support Framework for the management of support and maintenance activities including Service Desk, Incident and Problem Management, Change and Release Management.

Its main purpose is:

- to act as a single point of contact for the CAD IT software end-user;
- to manage the life cycle of user generated issues and service requests;
- to guarantee pre-agreed service levels;
- to organise and prioritise requirements;
- to keep end-users updated on progress.

... innovating together with a wide network

CAD IT invests heavily in R&D for its technology solutions.

Its capacity to innovate together with its clients is a compelling advantage. For many years now CAD IT adopted a collaborative research and development approach with customers, universities, regulatory authorities, consultancies, communities and technological and business partners.

With a growing user community of over 200,000 end-users, where customer demands and requirements constantly evolve, Group’s strength is the ability to deliver solutions that respond to our client’s needs and adapt to the changing market environment.

... offering constant improvement

The CAD IT Group offers solutions based on the know-how of a vast community of users and supports customers in achieving their own specific objectives with a personalised approach based on granular software components and tailor-made modular services.

Due to the inspiration we receive from our customers and believing firmly in creating stable and lengthy relations, we aim to evolve constantly by making every effort to find new methods, innovate our technology and support the professional growth of our own human resources through training and experiential courses.

The Group is convinced that its commitment to understanding the customers' needs and to providing increasingly more efficient solutions is the true reason behind its managing to maintain customer satisfaction rate extremely high.

We believe that innovation does not simply end with the supply of a state-of-the-art technological solution, but is a continual process of customer support to provide solutions that evolve and adapt to changing market conditions. This is why the Group continues to provide support for all the releases and, although invites its customers to evolve, never obliges them to replace their software with updated versions.

By offering holistic services like system integration, training, consultancy, assistance and constant support, the Group is continually enriching its own know-how by increasing the added value of the solutions it offers to the customer's benefit.

FINANCE

Area Finanza, flagship product, is viewed as the gold standard on the Italian market, with about a 90% share of the Italian securities processing market, according to the estimate of the company.

Since 2006, with continuing product development, Area Finanza has now been implemented successfully internationally, at leading financial institutions in Switzerland, Germany, UK and the Czech Republic.

Area Finanza offers total automation of all processes relating to derivatives and securities in the following macro areas: Position Keeping, Custody and Administration, Corporate Actions, Order Management, Trading Rooms, Securities Master Database, Settlement, Asset Management, Reconciliations, REPOs, Know Your Customer, Financial Advice and Reporting.

Customers are banks, banking groups, insurance companies, global custodians, brokers, asset managers, IT and BPO service providers, finance companies, trust companies and banking foundations.

Within Europe, our application statistics for Area Finanza include:

- 400 financial institutions;
- 25,000 bank branches;
- 14,000 post office branches;
- 150,000 users;
- 25,000,000 security deposit accounts.

PUBLIC ADMINISTRATION

The Group holds a leading position in providing software solutions for Tax Collection in Italy.

Our SET suite for tax collection is the National IT solution being used by the Institutions that manage public tax collection.

Activity in this sector began in the 1980s and has been developed by constantly keeping up with the legal and functional evolutions in the management of both "voluntary" and "compulsory" tax collection.

Since 2006, in view of the ongoing decentralisation of local tax collection, CAD IT has made considerable investments in developing its FE suite for managing Taxation for Public Authorities, capitalising on its experience in Tax Collection at a central level.

FE offers avant-garde tools at the service of all types of central and local Authority for managing tax collection, from preparing "loading lists" up to payment collection and settlement. Furthermore, the FE suite includes planning and control solutions that improve the Authority's internal management, so that Public Administration can accompany the citizen through all the most important events of the public service lifecycle: from information

services to the various payment means.

Customers are Authorities, Licensed Companies, Tax Collection Agents and Banking Groups that carry out Treasury and Tax collection services.

Taxation for Authorities (FE) and Tax Collection System (SET) are used throughout Italy and exclusively manage tax collection activities for the National Public Administration Service.

INDUSTRY

In addition, the Group boasts a long-standing activity in the industrial and the financial sectors and can count on the capacity to offer solutions for e-business, credit and industrial companies in constant evolution.

CAD IT is a reference point for companies producing the most famous "made in Italy" products: fashion and food. In these sectors, CAD IT aims at providing specific IT and business skills through software packages and services with high added value that ensure immediate benefits for its customers.

Customers are hundreds of companies dotted all over Italy with branches abroad and with a strong potential for internationalization. Companies that have grown with CAD IT in terms of modernising and reviewing their company procedures. With them were created organizational models so that decisions can be taken quickly and within economically sustainable time periods.

CAD IT, with the support of its strategic partners, is able to provide its customers with a complete range of services so that they can make the decisions that lead to creating advanced systems supported by the very best specific skills available on the market.

Hot topics

Finance division

PRIVACY

The provisions issued by the Guarantor of Privacy foresees the obligation to store information relating to transactions for two years, even if only informative, like, for example, inquiries carried out on customer reports by banking staff, i.e. the users of information systems. With this provision, banks should verify and adjust their 'logs', the archives in which they record the transactions made on their computer systems which, as is well-known, is the most complex of all financial sectors. It is therefore necessary to set up a repository in which to keep all the information and then have a system to identify any improper behaviour by the bank's own employees. This provision, in fact, is the result of situations in which information on customer accounts and transactions have been unduly divulged and used illegally.

In this context CAD IT is one of the main players in the banking sector software vendor community, promoted by Deloitte, that can resolve this requirement by means of a highly innovative project.

EMIR: Reporting Compliance for Derivative Trades

According to the EMIR regulation, financial and non-financial counterparties must ensure that the details of any derivative contract they may have concluded as well as any subsequent modification or termination of said contract is reported to a trade repository, no later than one the working day following its the conclusion, modification or termination of the contract.

The reporting obligation will take effect as of July 2013 for derivatives on interest and credit and as of January 2014 for derivatives on all other asset classes.

CAD IT's Trade Repository Reporting allows to introduce new reporting logic into your current applications.

Trade Repository Reporting captures operations in real time from existing Front Office Systems (e.g. MUREX, Kondor+, Bloomberg, direct market connection, etc.) and from the Area Finanza Suite, elaborates the data and sends all necessary messages to the Trade Repository. The monitoring screen shows the status of all messages for all contracts.

Through CAD IT's partnership with REGIS-TR (www.regis-tr.com), the European trade repository, launched by Iberclear (BME) and Clearstream (Deutsche Boerse Group), we are able to supply a complete service.

FATCA

The new US regulation named FATCA imposes heavy duties on Banks, Insurances Companies, Asset Managers, and Brokers, all over the world:

- identification and classification of clients and financial accounts;
- application of a 30% withholding tax for recalcitration;
- data reporting to the United States;
- compliance and audit obligations.

CAD IT's Tax and Compliance Area (TCA) solution for FATCA is the result of a shared analysis with a dedicated User Community involving banks, financial institutions and their consulting companies.

TCA has been designed to be easily adaptable to the identification of customer and account, new types of taxation and reporting, thus enabling a strategic approach to new future requirements.

T2S

Target 2 Securities (T2S) is the new centralised platform for the settlement of Euro securities, which will be available as of June 2015 and which will have a great impact on all market subjects, such as Banks, Custodians and CSDs. T2S will eliminate the differences between domestic and cross-border settlements and will lead to a gradual removal of national specifications. In this way settlement activities will be limited to pure utility and will force a clean-cut separation from custody services.

CAD IT proposes its own Settlement EasySet solution, which has been designed to help banks deal with the changes that T2S will bring, both in terms of direct and indirect adhesions.

Market Abuse Sensing

Market Surveillance Authority regulations are becoming increasingly more severe and extensive. Applying them effectively while limiting the impact in terms of cost and application complexity, is a challenge that can be faced with automation.

CAD IT has developed a tool for Market Abuse Sensing (compliant with Italian and European laws) that is able to identify suspect transactions of market manipulation and information abuse (insider trading). The application also manages a register of interest conflicts.

The platform totally automates the processes for acquiring data for processing and has automatic search functions with a high number of variables to find potentially suspect transactions. The effectiveness of investigation into automatically identified transactions, in order to establish the soundness of the suspicion and to notify any transactions to the market surveillance authorities, is supported by a vast information workflow that allows the user easy and fast management of investigation activities.

Flow Management

TDOC@Web: is CAD IT's tool which, hosted in a web-site, allows Bank, Public Body and Company users to rapidly and safely exchange a large volume data flow, archive and printout.

Local Authority Treasuries

Local Authority Treasuries: software procedure for the total automated management of Local Authority Treasury and Funds for which the law imposes the figure of Treasurer or Receiver (Local Authority, Balances, documental and non-documental cash collection and payment management). The application can be integrated with Teso@Web, a product that, through Internet and by using special consultation functions, allows Local Authorities to swiftly access their own data. The SIOPE and UNIFIED TELEMATIC PUBLIC TREASURY procedures are available for Banca d'Italia reporting.

Public Administration division

Italian Public Administration is experiencing considerable change as a result of a similar radical transformation of the country's social network.

Immigration, globalization, computerization and integration are just some of the important topics that Public Administration is having to deal with. While these themes may represent problems, they can also provide the chance to improve the services offered to the citizens.

One of the key factors is the use of new technologies, which are the first steps towards a new millennium. Not just tablet PCs and smartphones, but also self-service terminals and call centres. Not just social networks and peer to peer, but also, and above all, company clouds and public service networks.

For this reason, CAD IT has created an integrated and multi-lingual solution to automate information services, procedures, policies, regulations and laws within large organizations and government bodies.

The CAD IT solution is based on a repository where all the information is organized in such a way that the engine interpreting the operation can recognize the citizen, carry out information filtering, even translate from and to the desired language and then provide the requested service.

With the CAD IT solution, the Public Administration office is guaranteed fewer costs and less conflict and stress for its front desk operators as well as the possibility to monitor the level of services carried out. For the citizens, the solution means a much faster, more personalized, timely and modern service.

Industry division

An important meeting organized in collaboration with Infor and aimed at ceramic tile producers took place in Bologna last December.

This market symbolizes the excellence of world-famous Italian design with a total turnover of Euro 4.71 billion made up of exports to the value of Euro 3.57 billion and Euro 1,146 million of sales on the home ground.

The progressive internationalization of this market has given the opportunity to present Infor M3 adapted to this type of production. The entrepreneurs attending the meeting were more than satisfied to be presented with a software that perfectly reflects their business needs.

Fashion Event

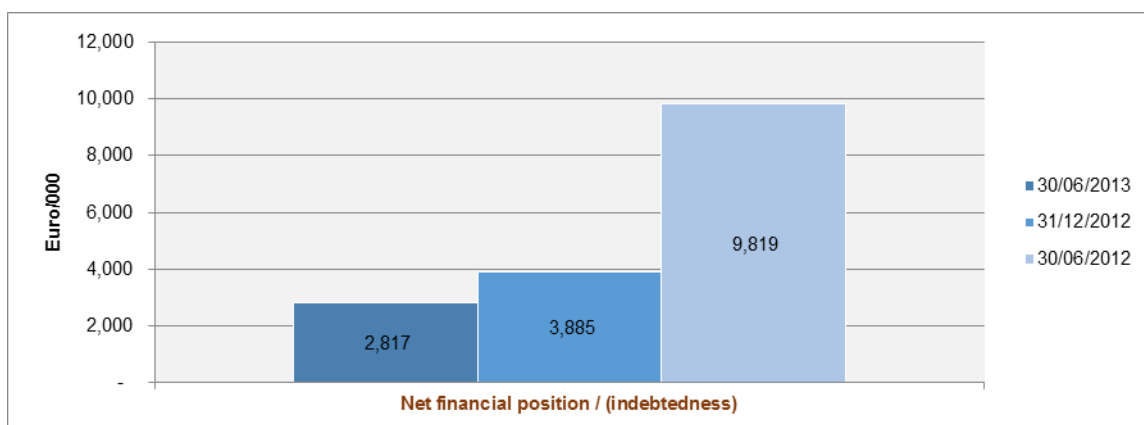

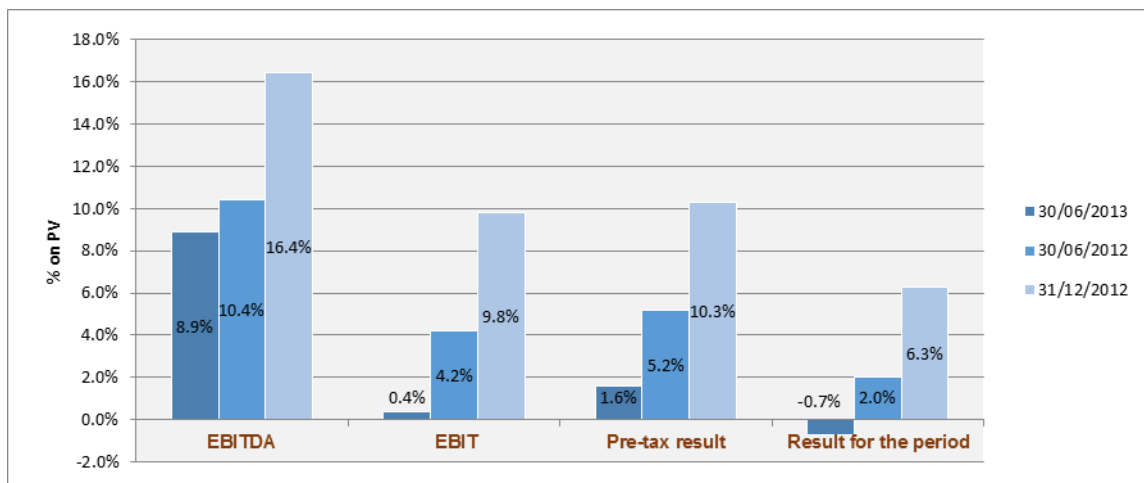

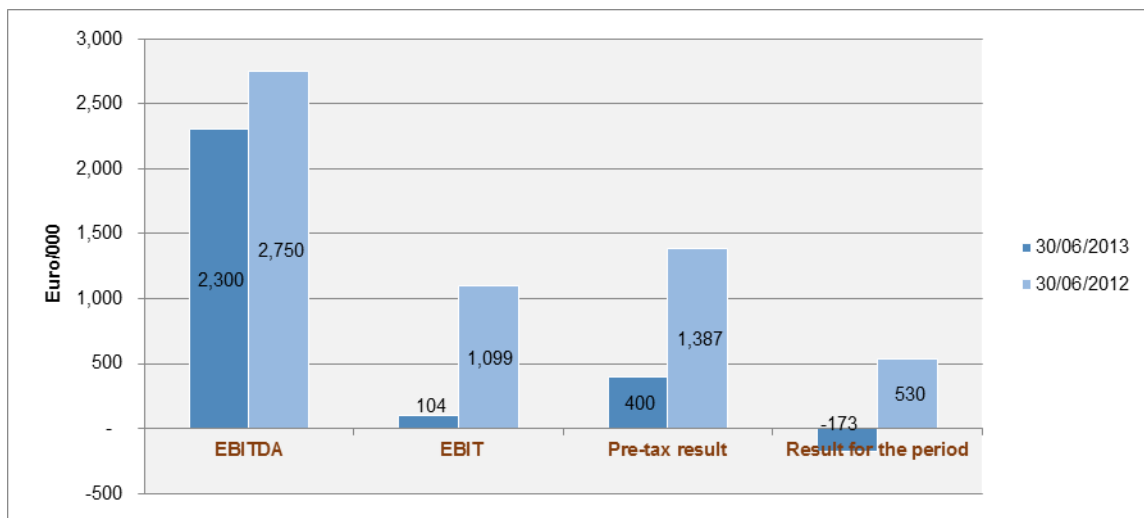

The fashion world met in March for a big event in Venice organized by Venistar in collaboration with CAD IT. It was a splendid occasion for exchanging ideas and developments in a market that represents the very best of Italy throughout the world.

Summary of the Group's results and data

	First Half 2013		First Half 2012 *		Variations	
	€/000	% PV	€/000	% PV	€/000	%
Production value	25,736	100.0%	26,424	100.0%	(688)	(2.6%)
Added value	21,001	81.6%	21,042	79.6%	(41)	(0.2%)
Gross operational result (EBITDA)	2,300	8.9%	2,750	10.4%	(451)	(16.4%)
Operational result (EBIT)	104	0.4%	1,099	4.2%	(995)	(90.5%)
Ordinary result	120	0.5%	1,149	4.3%	(1,028)	(89.5%)
Pre-tax result	400	1.6%	1,387	5.2%	(986)	(71.1%)

* Following application of the amendment to IAS 19 (retrospectively) from 1 January 2013, figures at 30 June 2012, reported for comparison, have been restated in accordance with the requirements of IAS 1. In particular, due to the reclassification of actuarial gain on liabilities for defined benefit in the consolidated statement of comprehensive income, labour costs increased by Euro 117 thousand, resulting in decreased profit for the period by the same amount.

The CAD IT Group closed the first half of 2013, with results and profit margins decreased compared to the same six months of 2012. The decrease in service revenues was primarily due to the temporary postponement, due to customer needs, some planned activities. The net result was a loss of 173 thousand euro.

The value of production for the period, with a slight decrease from the previous year was mainly due to revenues from sales and services of EUR 23,818 thousand (-3.1% compared to 24,582 thousand euro in the first half of 2012) as well as by increases in fixed assets for internal works to € 1,881 thousand (which is an increase compared to 1,809 thousand euro in the first half of 2012) for the use of resources in the development of new procedures and the Group's own software.

The added value of 21,001 thousand euro, is broadly in line with the previous year (21,042 thousand euro) with a margin of 81.6% on the value of production (79.6% in the first half of 2012).

Costs for the purchase of 249 thousand euro remained unchanged compared to 2012.

The cost of services, of € 4,162 thousand, decreased by 12.2% compared to 2012 (€ 4,738 thousand euro), mainly due to the drop in costs for external collaborations.

The personnel costs of EUR 17,675 thousand recorded an increase compared to 17,239 thousand euro in the first half of 2012 (restated following the adoption of the amendment to IAS 19). The average number of employees during the first half year was 607 employees (compared to 600 employees in the same half of the year 2012).

The Other administrative expenses are down slightly in the first half and amounted to 1,026 thousand euro.

The gross operating margin (EBITDA) was positive for € 2,300 thousand (€ 2,750 thousand in the first half of 2012 restated following the adoption of the amendment to IAS 19), with a margin of 8.9% on Production Value (10.4% in the first half of 2012).

The depreciation for the period amounted to EUR 1,951 thousand for intangible assets and € 242 thousand for tangible assets, compared to 1,351 and € 298 thousand in the same period 2012. The amortization of intangible assets increased compared to the previous period due to the beginning of the amortization schedules of software procedures, concluded in previous years, which have become available for use and for sale.

The operating result EBIT for the period was positive for 104 thousand euro, with a decrease compared to the first half of 2012 (1,099 thousand euro, restated following the adoption of the amendment to IAS 19).

The result of the financial management recorded revenue of 36 thousand euro and financial expense for 20 thousand euro, compared to 82 and 33 thousand euro in the first half of last year.

The ordinary result was positive for 120 thousand euro compared to 1,149 thousand euro in the first half of 2012 (restated following the adoption of the amendment to IAS 19).

Revaluations for the period include the portion of the associated company accounted for under the equity method of € 181 thousand (while in the first half of 2012 had created a revaluation of EUR 214 thousand) as well as a capital gain of 99 thousand euro from the disposal of assets available for sale (24 thousand euro in the previous period).

Income before taxes and minority interests was positive for 400 thousand euro (1.6% of the value of production), compared to the same period of the previous year of 1,387 thousand euro (restated as a result of 'adoption of the amendment to IAS 19) (5.2% of the value of production).

Income taxes are of 573 thousand euro, compared to 856 thousand euro in the first half of 2012, resulting in a loss for the period of EUR 173 thousand euro compared with a profit of 530 thousand euro in the first half of 2012 (restated following the adoption of the amendment to IAS 19).

The result for the period attributable to owners of CAD IT was negative € 223 thousand compared to a profit of 397 thousand euro in the first half of 2012 (restated following the adoption of the amendment to IAS 19).

the result attributable to minority interest is positive of € 50 thousand, 133 thousand in 2012 (restated following the adoption of the amendment to IAS 19).

The short-term situation ¹

The global economic expansion, which had gained pace in the first quarter of 2013 thanks to stronger growth in several advanced countries, continued in the second quarter; however, the persistent sluggishness of activity in the euro area and a deceleration in the emerging economies of Asia kept the expansion of world trade at modest levels. The prices of energy and non-energy commodities declined, favouring a generalized fall in inflation.

In the euro area GDP contracted again in the first quarter (-0.3 per cent compared with the previous period, against -0.6 per cent at end-2012), the decline spreading to the countries not directly exposed to the financial market strains. GDP diminished in all the leading economies, with the exception of a modest increase of 0.1 per cent in Germany, where the main impetus was a rise in household consumption. The latest cyclical indicators suggest a possible stabilization of economic activity, but at modest levels. In the last three months, consumer price inflation

¹ Source: Banca D'Italia, Economic Bulletin no. 69, July 2013.

has fallen significantly, to 1.4 per cent on average. The European Central Bank expects the key ECB interest rates to remain at present or lower levels for an extended period of time, given the subdued outlook for inflation, the broad-based weakness in the real economy and subdued monetary dynamics.

In the first quarter of the year Italy's GDP diminished by 0.6 per cent compared with the previous quarter. Domestic demand again contracted. Investment in construction, in particular, recorded the sharpest drop since the end of 2008: -3.9 per cent from the fourth quarter of 2012. Household consumption decreased further, albeit less markedly than in previous quarters. Exports also fell, by 1.9 per cent, for the first time since the second quarter of 2009, mainly owing to the contraction in demand from the other EU countries, and imports decreased by a similar amount. GDP declined further in the second quarter of 2013, but at a slower pace; domestic demand remained weak. In the second quarter of the year inflation (measured by the twelve-month change in the harmonized index of consumer prices) fell sharply, to below the euro-area average (1.4 per cent in June). The decline in energy prices was a contributory factor, against a background of reduced profit margins and pronounced cost cutting. The raising of the ordinary VAT rate that was due to enter into force on 1 July was postponed to the beginning of October.

According to Banca d'Italia evaluations economic activity is expected to stabilize at the end of 2013, and the recovery should strengthen in 2014, with average growth of 0.7 per cent for the year, thanks to an acceleration in foreign trade and a gradual resumption of productive investment. The latter is likely to be assisted by the improvement in firms' liquidity when the payment of general government commercial debts is unfrozen. Household spending, restrained by the performance of disposable income and by acute uncertainty regarding the labour market outlook, is expected to remain weak, however; after declining further this year, it appears set to stagnate in 2014. Conditions in the labour market, which typically react to changes in economic activity with a lag, are expected to continue worsening throughout this year. A timid employment recovery is expected only in the second half of 2014. The number of persons in work is projected to diminish by around 1.5 per cent in the two years 2013-14; the seasonally adjusted unemployment rate, which rose above 12 per cent in May, is likely to come close to 13 per cent in the course of 2014.

According to the consolidated quarterly reports of the five largest Italian banking groups, bank's operating profitability in the first quarter of 2013 worsened compared with the first quarter of 2012. Their annualized ROE fell by about 2 percentage points to 2.7 per cent. Gross income contracted by 13 per cent, mainly as a result of the fall in interest income, which was affected by the movement in market interest rates and the decrease in interest-earning assets. The absence of the trading profits recorded in the first quarter of 2012 was also a factor. The 5.1 per cent reduction in costs limited the fall in operating profit to 22.4 per cent, about 60 per cent of which was due to value adjustments, up by 3.8 per cent.

Significant events of the period

On 29th April 2013, the Ordinary Shareholders' Meeting approved the Annual Financial Statements at 31st December 2012 and decided the distribution of an ordinary dividend of Euro 0.30 per share. The dividend will be paid from 9th May 2013. Dividend payment resulted in a cash outlay of Euro 2,694 thousand. The Shareholders' Meeting also approved the first section of the Remuneration Report ex article 123-ter of Leg. Dec. 58/1998 (available in the Company's website).

In April CAD IT won the tender for the supply of an application IT platform and the relative expert assistance for Poste Italiane S.p.A.'s remote control systems. CAD IT's "Remote Control" application is a dynamic system for monitoring the various risk categories originating in both peripheral and central company structures.

The tool implements a constant analysis and assessment model at a process and business unit level, quickly identifying any sign of anomaly. The system centralises the controls of hundreds of procedures on 14,000 Post Offices, deals with audit interventions, allows the planning of activities, prevents particular risk conditions from becoming more serious and guides actions for improvement. The project foresees the supply of the license to use the platform and the relative expert services required for its integration and start-up as well as the relative ordinary and perfective maintenance. The total value of the contract is Euro 1.1 million and the service will have a 32-month validity.

Activities regarding the development and sale of new products for both traditional and new types of clients continued throughout the period.

Moreover, the planning activities with Xchanging UK Ltd (a company that supplies security administration services for the German and British market and which holds a 10% share in CAD IT S.p.A.) through which the CAD IT Group aims at increasing its revenues in Italy and also to diversify its business in geographical terms, is continuing.

Research and development

In relation to activities aimed at consolidating traditional business, the realization of new modules to increase the functional and/or technological development of the considerable range of software installed is still underway within the Group.

The creation and use of new computer systems aimed at diversifying the Group's offer towards those sectors bordering on the ones in which it is already present and to new markets abroad, is still underway.

As regards new projects, development are continuing on the SIBAC GS platform. Development and innovation activities for the Finance Area Web Suite is particularly intense with the aim to improve user experience and create new functions or modules required by the national and international markets (like, for example, Easy Match). Investments are still being ploughed into the innovation and extension of specialised modules for financial insurance management whose area covers all processes relating to company investment management from front to back office.

CAD IT, in activities aimed at developing its own range of products, is also creating solutions linked to the new laws (for example, Solvency II, Target 2 Securities and FATCA, Privacy ed EMIR).

Activity in the production of specialized modules for the business intelligence (Managerial Information System) area is also continuing, especially in regard to risks, fraud and long-distance control.

Investment to enrich the offer range of solutions and services for Public Administration and authorities for the management of local taxes is also continuing.

Investments

<i>Summary of investments</i>	<i>First Half 2013</i>	<i>First Half 2012</i>	<i>Variations</i>	<i>Year 2012</i>
Intangible fixed assets	27	146	(119)	223
Assets under development and payments on account	1,881	1,811	70	3,553
Property, Plant and equipment	114	136	(22)	208
Total investments in tangible and intangible fixed assets	2,022	2,093	(71)	3,984

Investments in tangible and intangible fixed assets made by the consolidated companies in the first half 2013 amount to Euro 2,022 thousand compared to Euro 2,093 thousand in the first half 2012.

Particularly ongoing intangible asset costs mainly refer to the use of the Group's internal resources for the development of its own software which will be licensed out to clients or used for the Group's activities. The consistent amount of investment derives from strategic decisions taken by the Board of Directors and management, who have approved the development of a large number of products, projects and new technologies in order to be ready for development lines in the sector and to be able to propose an updated range of products that can quickly satisfy market demand.

Related parties transactions

Transactions made with third parties, including infra-group transactions, are neither atypical or unusual since these transactions are a normal procedure within the activities of the Group's companies. The same are governed by market conditions bearing in mind the characteristics of the goods and services concerned.

Information on relations with third parties, including that required by the Consob Communication of 28th July 2006 and subsequent integrations, is shown in the Half year Financial Statement Sheet Notes.

Relationships with Group companies

During the financial period concerned, the Group's companies carried out operations with the controlled companies and businesses subject to CAD IT control. The patrimonial and economic effects of the operations carried out between companies consolidated with the integral method have been omitted in the consolidated balance with the exception of:

- services concerning the development of software procedures to be sold or instruments for the traditional activities of the Group's companies that are registered among intangible fixed assets;
- other operations regarding the assignment of instrumental assets for the purchaser, of insignificant amount.

Relationships between the Group's companies are governed on the basis of contractual relations drawn up by the respective administration organs bearing in mind the quality of the assets and services involved and the competitive conditions of the market and adapting the interests of the Group.

The table below gives a summary of the income and service performances, as well as the credit and debit position of all the Group's consolidated companies, as of 30/06/2013.

<i>Company</i>	<i>Costs</i>	<i>Turnover</i>	<i>financial charges</i>	<i>financial income</i>	<i>Receivables</i>	<i>Payables</i>
CAD IT S.p.a.	9,126	829	7	6	4,404	19,455
CAD S.r.l.	558	5,257	-	-	10,930	2,982
CeSBE S.r.l.	331	1,548	-	7	4,722	688
DQS S.r.l.	11	1,099	6	-	1,665	645
Smart Line S.r.l.	26	877	-	-	1,943	226
Elidata S.r.l.	6	347	-	-	518	35
Datafox S.r.l.	25	128	-	-	291	20
Tecsit S.r.l.	1	-	-	-	-	422
Totali	10,085	10,085	13	13	24,473	24,473

There have been no abnormal or unusual transactions between the CAD IT Group's companies in this financial period. CAD IT S.p.A.'s relations with its subsidiaries are shown at in the separate CAD IT S.p.A. Financial Statements.

Reconciliation report with the Head Company balance

The following table shows the reconciliation figures of the net patrimony and the consolidated financial result with those of CAD IT S.p.A.²

	<i>Net patrimony</i>	<i>Result of period</i>
Net patrimony and result of the controlling company for the period concerned	54,478	(50)
- difference between the entry value of the consolidated holdings and the pro quota value of the net patrimony	(8,278)	
- pro quota results of the subsidiary/associate holdings	200	200
- consolidation difference: Goodwill	8,309	
- subsidiary/associate dividend elimination		(324)

² In accordance with Consob communication no. 6064293 of 28 July 2006.

- infra-group margin elimination	(1,546)	(68)
- assessment of associate holdings with net patrimony method	358	18
Total net patrimony and consolidated result of period attributable to owners of the parent	53,521	(223)

Corporate Governance and Internal Control System

CAD IT considers and defines its Internal Control System as “a set of rules, procedures and organisational structures aimed at achieving, by means of a suitable identification, measurement, management and monitoring process of the principle risks, the running of a healthy, correct and coherent business with pre-established objectives”. The internal system for managing risk and control in financial information technology is a constitutive part of a broader Internal Control System. This system also aims at guaranteeing trustworthiness, accuracy, reliability and timeliness of the company and the Group’s financial information technology.

The Internal Control System is the mainstay on which *Corporate Governance* stands and is the catalyzing element of all subjects and functions that, each in their own way, contribute to the healthy, correct and coherent running of the business in order to give maximum sustainable value to every activity within the organisation.

Essential parts of the Internal Control System are the Code of Ethics and the Management and Control Organisation Model adopted by the Board of Directors in accordance with the norms concerning “Company administrative responsibility rules” in Leg. Dec. no. 231/2001 and subsequent modifications. The Model adopted also includes the Health and Safety at Work System in accordance with the UNI/INAIL guidelines which represent a best practice standard of reference for compliance to the provisions in Leg. Dec. 81/08.

The system of corporate governance adopted by CAD IT SpA is the traditional one.

CAD IT adheres to the Code of Conduct for listed companies issued by the Italian Stock Exchange (the “Codice di Autodisciplina”), available on the website of the Italian Stock Exchange.

In compliance to the legal obligations, the Board of Directors annually approves the Corporate governance and property asset report, in accordance with articles 123 bis and 124 ter TUF and 89 bis Consob Issuer Regulations, in order to provide an adequate description of the corporate governance system adopted, information on property assets and adherence to Corporate Governance regulations. The report is published and is available for public viewing in the Investor Relations sector of the company’s Internet site: www.caditgroup.com. Please refer to this document for further details on governance and the Internal Control System of CAD IT and of the Group.

Main risks and uncertainties to which CAD IT S.p.A and the Group are exposed

The Company has an internal control system made up of a set of rules, procedures and organisational structures aimed at achieving the healthy and correct running of the business also through a suitable process for identifying, managing and monitoring the principle risks that could present a threat to achieving company objectives.

This paragraph describes the risk factors and uncertainties relating to the economic-legal and market context and which can considerably influence the Company’s performance; the specific risks that can determine the generation of obligations within the Company and the Group are, however, the object of evaluation when determining the relative earmarking and are mentioned in the balance notes together with the potential liabilities found. Additional risks and uncertain events that cannot be foreseen, or are considered improbable at the moment, could still affect the activities, the economic and financial conditions and the prospects of the company and the Group.

CAD IT adopts specific risk factor management procedures aimed at maximising the value for its shareholders by activating the necessary measures to prevent any risks inherent to the Group’s activities.

CAD IT S.p.A., in its position as Parent Company, is exposed to the same risks and uncertainties described below to which the entire Group is exposed.

External Risks

Risks connected to the general conditions of the economy and sector

The information technology consultancy market is linked to the economic trend of industrialised countries where the demand for highly technological products is higher. A continuation of the weak economic global situation at both a national and/or international level could reduce demand for the Group's products with a consequent negative effect on the economic, patrimonial and financial situation of the Group itself.

The main market outlet in which currently the Group deals is the banking and finance sector, which historically has never been subject to significant criticality. As of 2008, global financial markets were subjected to strong turbulence which led to a marked slowdown of the economy. The global economic recession of 2008 and 2009 which practically affected all geographical areas and all economic sectors of more developed countries, led to a sharp contraction of demand. The latest periods showed weak signs of global recovery, but the economic projections are still uncertain. A prolonged continuation of this notable weak situation, or an even further degeneration, could cause a negative effect on the economic, patrimonial and financial situation of the Group.

Risks connected to the rapid evolution in technologies, customer needs and reference norms

The sector in which the Group operates is characterized by fast and complicated technological changes and a constant development in skills and professionalism. Furthermore, an increase in customer needs, together with any changes in the laws, means that the software for the banking sector and other financial institutions has to be constantly updated.

The Group makes substantial investments in the development of new projects and new technologies, not only in order to promptly satisfy market demand, but also to anticipate development lines by proposing a range of new products as a factor able to influence, in turn, the type of user demand. Therefore, a reduction in customer tendency towards buying the new technologies offered could expose the Group to the risk of not earning enough to cover the investments sustained.

These investments cannot, however, guarantee that the Group will always be able to recognise and use innovative technological instruments, exclude the risk of the obsolescence of existing products or ensure the Group's ability to develop and introduce new products or renew existing ones in good time for the customer and adequately for the market. The above-described situations are a significant potential risk for the Group's activities and its economic and financial results.

Risks connected to the high competition in the sector in which the Group operates

The Information Technology market is highly competitive. Some competitors could try to expand and damage the Group's market share. Moreover, the intensification of competition levels and the possible entry into the Group's reference sector of new subjects with good human resources, financial and technological backing that can offer more competitive prices, could influence the Group's activities and the possibility to consolidate or widen its own competitive position in the sector with consequent repercussions on the Group's activities and its economic, patrimonial and financial situation.

Risks connected to protecting technological property

The Group's procedures and software programmes are protected by Italian copyright laws. Furthermore, the Group owns the exclusive rights for the economic use of the programmes and procedures which it has registered in the Special Public Register for Processors as the SIAE – Italian Society for Authors and Editors.

The management also maintains that the technological level of the products the Group offers, together with the technical knowhow needed for their constant and progressive use and updating, are in themselves factors able to limit any risks connected to the appropriation of significant competitive advantages on the part of potential and current competitors. Nevertheless, it cannot be said that the protection recognised by Italian copyright laws excludes other operators in the sector from developing, entirely on their own, similar products or duplicating the Group's unregistered products or designing new ones able to copy the performances and functions without violating the Group's rights. Furthermore, the Group's technology could be exposed to acts of piracy by third parties.

Internal risks

Risks relating to dependence on key personnel

The success of the Group depends appreciably on the ability of some key figures who have made a significant contribution to its development i.e. its own executive managers and other management components with many years of experience in the sector. The loss of one of the aforementioned key figures' services without an adequate replacement could have negative effects on the Group's prospects, activities and economic and financial results. Moreover, the Group's business is strongly characterised by the extremely high technical skills of its staff. Therefore, the future success of its activities largely depends on the continuity of the functions carried out by the currently employed specialized technicians and collaborators as well as the ability to attract and maintain highly qualified staff.

In the Information Technology sector, staff costs are a critical development factor. Any difficulties that the Group may face in managing staff could produce a negative effect on its activities, its financial conditions and its operative results.

Risks connected to sale times and implementation cycles

The management of sales activities for the Group's software products is normally rather lengthy, especially considering that the potential advantages of using the Group's products have to be illustrated and training activities at the customer's premises so that the products are used correctly have to be carried out. Negotiations and the consequential execution of product sale activities usually take a period of time that ranges from a few months to a whole year. Moreover, the implementation process for the Group's products often involves the customer's investment in terms of staff and money which can extend over time. Sales activities and adjustment cycles of the product to the customer's information technology system are subject to potential and determining delay such as the completion of the implementation process of the product itself, unexpected events that the Group cannot control, like sudden limitations in the customer's budget or company renovation operations or, more generally, the complexity of the customer's technical requirements. Any delays due to extended sales cycles or referable to the product's use on the part of the customer, could influence the Group's activities, financial situation and operative results.

Risks connected to customer dependence

The Group offers its products and services to small, medium and large companies operating in different markets. A significant part of the Group's revenues is concentrated on a relatively small number of customers, the loss of which could therefore have a negative effect on the Group's future activities and economic, patrimonial and financial situation.

The results and performance of the Group's medium and long term, however, do not depend significantly on any specific customer, as customers update their information systems at different times and with a periodicity characterized by a rather long time.

Risks connected to internationalisation

The Group has made significant efforts in recent years in terms of its own internationalisation strategy and expects that an increasingly large part of its revenues will be generated from foreign customers. The Group could therefore be exposed to the risks related to internationalisation as those relating to changes in their economic, political, fiscal and local law conditions, as well as variations in the domestic currency trend, should the country concerned be outside the Euro area. The occurrence of unfavourable development in these areas could have a negative effect on the Group's prospects and activities.

Risks connected to breaches of contract and potential liabilities towards customers

Highly complex software products like those offered by the Group can, even if duly tested, reveal some defects and anomalies during the installation phase and while integrating with the customer's information technology

system. These circumstances can cause damage to the Company's image and its products and also expose the Company to claims for damages and the application of contractual penalties due to not respecting deadlines and/or the agreed qualitative standards.

Furthermore, the Group could find itself having to invest considerable resources to carry out corrective interventions and be obliged to interrupt, postpone or cease the supply of its services to the customer.

To date there have not been any significant events of this kind that have determined any remarkable controversy in customer relations.

Financial risks

Credit risks

The Group mainly operates with banks and service companies controlled by banks, financial institutions and insurance companies, tax collecting agencies and public administration offices, and, generally speaking, customers with proven soundness and solvency, which is the reason why, in past financial periods, the occurrence of losses on credits always has been relevantly insignificant. The Group does not have a significant concentration of customer solvency risk. For commercial reasons, specific policies aimed at monitoring times of collection of credits, also for important amounts, that, following previously revealed operative risks, could undergo delays, are adopted.

Liquidity risks

Liquidity risks are linked to the difficulty of finding funds to finance obligations. The availability of liquid assets and the ability to generate positive cash flows make the risk of not being able to find enough financial funding to satisfy the obligations and needs of Group operations highly unlikely. Cash flows, funding requirements and the liquid assets of the Group's companies are constantly monitored with the aim of guaranteeing an efficient and effective management of financial resources.

It cannot be excluded, however, that, should the considerable weak and uncertain market situation continue or should collection times become longer or significant losses on credits occur, the risk of a reduction in liquidity could arise with the consequent need to resort to external financial sources.

Exchange rate risks and interest rate risks

Exposure to interest rate risks is linked to the need to finance operative or investing activities as well as using available liquid assets. The Group uses available liquid assets in bank accounts and capitalisation insurance policies and mainly uses financial resources in the form of bank deposit loans on commercial credits and bank account credit worthiness. Variations in market interest rates can affect revenues and the cost of financing influences the progress of financial returns and expenses.

At the moment the Group operates almost entirely in the Euro area and is therefore not subject to exchange rate risks.

It is not in the Group's policy to use derivative financial instruments that require cover and/or negotiation.

Other information

Neither CAD IT S.p.A. nor its controlled companies own, and/or have purchased and/or sold during the financial period CAD IT or their own shares, not even through trust companies or third parties.

CAD IT S.p.A. is not subject to the management and coordination of companies or bodies and defines its own general and operative strategies in full autonomy.

In accordance with art. 2497 bis of the Civil Code, directly or indirectly affiliated companies, with the exception of particular cases, have identified CAD IT S.p.A. as an organisation that exercises managerial and coordination activities. These activities mainly consist of indicating general and operative Group strategies and focus on defining and adjusting to internal control regulations, the issuing of a Code of Ethics to be adopted at a Group level, the processing of general policies for the management of human and financial resources, the provision of productive factors. Moreover, Group coordination for some companies means a centralisation of administrative, corporate and

financial management services. The affiliated companies, that remain in full control of their managerial and operative autonomy, can then scale their economies by taking advantage of the professionalism and specialist services and concentrate their own resources in the management of their specific operational skills.

During this financial period, and the previous one, no atypical or unusual operations have been carried out as defined in the Consob communication no. DEM/6064293 of 28 July 2006.

In the Financial Statement report, no alternative performance indicators have been adopted with the exception of the net financial position, shown in the Financial Statement notes, for which no reclassifications have been made in terms of Financial Statement figures and relative explanations are supplied and linked to the patrimonial status entries concerned, as defined in the CESR Recommendations.

The Group adopts and maintains the following management systems.

- Quality Management System, in conformity with the UNI EN ISO 9001:2008 norm, for the design, production and sale of component-based software and its after-sale assistance and maintenance.
- Information Security Management System, in conformity with the UNI CEI ISO/IEC 27001:2005 norm, for the management activities of information and data relating to software solution development activities, maintenance, customisation, integration, application management, consultancy and training in the banking, finance, insurance, industry and public administration sectors.
- Health and Safety Management System, in conformity with the UNI/INAIL Guidelines (September 2001 edition) implemented according to the "lavorosicuro" Guidelines (Confindustria Veneto/INAIL) and validated in November 2009.

The Group adopts an adequate system to protect information in accordance with Leg. Dec no. 196 of 30th June 2003 "Personal data protection code" to ensure the protection of personal data.

CAD IT, in accordance with art. 3 of Consob Deliberation no. 18079 of 20th January 2012, has decided to comply with the simplification regime provided for in articles 70, paragraph 8, and 71, paragraph 1-bis of Consob Regulation no. 11971/1999 and subsequent modifications and integrations, therefore availing itself of the right to waiver the obligation to present the expected information documents on significant operations relating to mergers, splits, increases in capital by means of the transfer of assets, acquisitions and sales.

Foreseeable development in the management

In response to the current general situation the Board of Directors has placed maximum attention on market needs in order to lead the Group's management and development strategies in the right direction and to maintain high levels of efficiency so that favourable economic results can be achieved in the future.

The success of the Group's activities will therefore depend on its ability to maintain and increase the shares it has in the markets in which it currently operates and/or to further expand into other markets and segments (like insurance, public administration, foreign financial institutions) through new and high standard, quality products that would guarantee adequate income levels.

The main strategic objectives of the company and the Group are to maintain and further develop its leadership position in the Italian banking sector, increase its customer portfolio in the insurance and local tax collection sectors, further distribute new products relating to business intelligence, promote its software for the industrial sector at medium/large-sized companies. The Group is also continuing to pursue its efforts to expand towards the European and international markets, which could be favoured by the optimal references it has obtained from its existing foreign customers and by the internationalisation procedures for which the large Italian banking groups are advocating.

The CAD IT S.p.A. managers are also constantly on the look-out for any development opportunities, whether direct or through external lines, through technical or commercial collaboration agreements and by taking on or acquiring holdings in order to create activities that are complimentary and synergic to existing ones.

The increase in the Group's activities resulting from expansion in to Europe and the acquisition of a greater market share could counterbalance the weakness of domestic demand.

On the date of drafting of this report, no relevant uncertainties are expected to arise in the current financial period. The short-term economic situation remains difficult and uncertain, therefore, still a national and international level,

and the managerial trend would be subject to risks connected to factors outside the Group's control. Despite this, the Board of Directors is confident that positive results can still be achieved, considering activities and actions already developed and those planned.

On behalf of the Board of Directors
The Chairman
/s/ Giuseppe Dal Cortivo

HALF-YEAR CONDENSED FINANCIAL STATEMENTS OF THE CAD IT GROUP

Consolidated income statement

(*) Following the application from 1 January 2013 (retrospectively) of the amendment to IAS 19, the data at 30 June 2012, reported for comparative purposes, have been restated as required by IAS 1. In particular, the profit for the period is lower by 117 thousand of euro, corresponding to the actuarial profit on liabilities of the defined benefit obligation and the corresponding figure is reduced by the item Allocations (utilization) of provisions.

For the liquid asset and equivalent means reconciliation, refer to note 36.

Notes

CAD IT S.p.A. is a joint stock company and is governed on the basis of Italian law and exercises its management and coordinated activities on its own controlled companies. CAD IT S.p.A. is not subject to other company control in accordance with art. 2359 of the civil code.

The company is listed in the STAR market of the Italian stock exchange.

The registered office and the administrative and operating offices are in Via Torricelli no. 44/a, Verona, Italy.

The company is registered in the Verona Company Register under no. 01992770238.

Unless otherwise indicated, the monetary quantities in the accounting tables and those in the notes, are shown rounded off to the nearest thousand euro. The totals and subtotals of the statements presented are determined by rounding the sum of the point data. The percentage figures shown are calculated using the non-rounded off figures.

1. Accounting policies and evaluation criteria more important

This half-year condensed financial statement has been drafted in accordance with the applicable IRFS International accounting standards issued by the International Accounting Standard Board (IASB) and recognized by the European Community in conformity with EC regulation no. 1606/2002. IFRS refers to the International Accounting Standards (IAS) presently in force as well as the interpretative documents issued by the International Financial Reporting Interpretations Committee (IFRIC), previously known as the Standing Interpretations Committee (SIC). The half-year condensed financial statement has been drafted in the consolidated form since CAD IT is obliged to draft a consolidated balance.

The half-year condensed financial statement has been drafted in accordance with IAS 34 – Interim Financial Reports, bearing in mind the contest of art. 154-ter of legislative decree no. 58 of 24th February 1998 (TUF).

In the drawing up of this summarised six-monthly Balance, the same accounting standards have been applied as those adopted in the drafting of the consolidated Balance at 31st December 2011, with the exception of the items described in the paragraph below – Accounting Standards paragraph, amendments and interpretations applied since 1st January 2013.

The accounting standards adopted have been applied in the same manner throughout the periods shown and for all the Group's companies, amending the respective Financial Statement drafted in accordance with Italian accounting standards to consolidate.

The consolidated balance has been drafted using the evaluation criterion of past cost, except for financial instruments available for sale, which are assessed at fair value, and the holdings in subsidiaries, which are assessed in accordance with the equity method. Moreover, where some land and buildings have been included in First Time Adoption, the fair value has been used instead of the cost.

Use of estimates

In accordance with the IFRS, when drafting the balance the company management formulates evaluations, estimates and hypotheses to apply the accounting standards which affect the amounts of credit and debit and the costs and revenues found in the balance. Estimates and their relative hypotheses are based on past experience and factors considered reasonable for the case concerned. Since they are estimates, the results obtained are not necessarily the same as the results portrayed.

The estimates and hypotheses are reviewed on a regular basis. Any variations deriving from an accounting estimate review are shown in the period in which the review was made if such review only affects that period. If the review affects the current and future periods, the variation is recorded in the period in which the review is made and in the relative subsequent periods.

Accounting standards, amendments and interpretations applied since 1st January 2013

On 16th June 2011, the IASB issued an amendment to *IAS 1 – Balance presentation*, which requires companies to group together all the components presented between Other profits/(losses) depending on whether they can or cannot be reclassified later to the profit and loss account. The amendment must be applied from financial periods

that began after or from 1st July 2012. The Group adopted this amendment as of 1st January 2013. The adoption of this amendment involves a new exhibition mode of the data, without cause variation in results.

On 16th June 2011, the IASB issued an amendment to *IAS 19 – Employee benefits* applicable retrospectively to the financial period that began on 1st January 2013. The main new item that regards the Group is the recognition of actuarial profits and losses in the *Other comprehensive income (losses)* with the elimination of the possibility to show them immediately in the Profit and Loss Account as in the past. The Group applied the amendment to IAS 19 retrospectively as of 1st January 2013, rectifying the opening values of the patrimonial and financial situation at 1st January 2012 and at 31st December 2012 as well as the economic data for 2012.

In detail, the Group has determined the following retrospective effects resulting from the application of the amendment to IAS 19:

Impact on the income statement as at 30/06/2012	<i>Previously reported data</i>	<i>Effect of the adoption of the amendment to IAS 19</i>	<i>Restated amounts</i>
Labour costs	(17,122)	(117)	(17,239)
Profit before tax	1,503	(117)	1,387
Profit (loss) for the period	647	(117)	530
Profit (loss) for the period attributable to:			
Non- controlling interests	141	(8)	133
Owners of the parent	505	(108)	397
Basic earnings per share (in €)	0.056	(0.012)	0.044

Effect on other comprehensive income to 30/06/2012	<i>Previously reported data</i>	<i>Effect of the adoption of the amendment to IAS 19</i>	<i>Restated amounts</i>
Profit (loss) for the period	647	(117)	530
Other comprehensive income that will not be reclassified subsequently to profit or loss			
Actuarial gains/(losses) on defined benefit liabilities	-	117	117

Effects on statement of financial position as at 31/12/2012	<i>Previously reported data</i>	<i>Effect of the adoption of the amendment to IAS 19</i>	<i>Restated amounts</i>
Equity attributable to owners of the parent			
Revaluation reserve liabilities for defined benefit	-	82	82
Consolidation reserve	21	(11)	10
Available reserve of undistributed earnings	10,711	(88)	10,623
Profit / loss for the year	3,230	17	3,247
Minority interests			
Capital and reserves of minority	2,258	(5)	2,253
Net income (loss) attributable to minority	316	5	322

Effects on Cash Flow statement as at 30/06/2012	<i>Previously reported data</i>	<i>Effect of the adoption of the amendment to IAS 19</i>	<i>Restated amounts</i>
Profit (loss) for the period	647	(117)	530
Provisions (utilization) of funds	(151)	117	(34)

There are no, or no significant, other matters and cases governed by standards, amendments and interpretations effective from 1st January 2013 approved by the IASB and IFRIC and published in the European Community's Official Gazette. Have not been early adopted other principle endorsed by the European Union.

Format of financial statements

The financial statements are prepared in accordance with IAS 1 specifications, properly integrated with the information required by Consob Resolution no. 15519 of 2006.

The Group has decided to present revenue and cost entries referring to the period in question in two statements. One statement shows the profit (loss) components for the period (Consolidated Income statement) and the other, which begins with the profit (loss) of the period and shows the statement entries of the other components of the overall profit and loss account (Statement of comprehensive income).

The Group presents its economic account by nature, the format that is considered the most representative in terms of function presentation. In fact, the chosen format conforms to the internal reporting modalities and the business management and is in line with the way the economic account was represented in the past.

The Directors' Report on management is included in the profit and loss account drafted in scalar form, highlighting the intermediary results as follows:

- Production revenues: this is the value of services and goods produced and sold by the Group, including internal assets and other income and earnings from the traditional offer.
- Added value: obtained by subtracting the operative costs for service and asset purchases from production revenues, this measures how much of the internal production and distribution of goods and services is due to company productive factors.
- Gross Operational Result (EBITDA): this figure is obtained by subtracting from the added value all of the costs that can be put down to staff and other administrative expenses. It highlights the result based on the traditional offer including depreciations, financial management, revaluations or devaluations and taxes.
- Operational Result (EBIT): this figure is obtained by subtracting the depreciation and funding amounts from the gross operational result.
- Ordinary Result: this includes the financial management result.
- Pre-tax result: obtained by including revaluations and devaluations in the ordinary Result.

As for the patrimonial situation, a distinction has been made between current and non-current assets and liabilities. The Cash Flow statement has been presented according to the indirect method so that the profit (or loss) for the period has been adjusted of any non-monetary operations and by deferments and the setting aside of future incomes or payments.

Each column in the statement of net patrimony variations reconciles the opening and closing balances for each net patrimony voice.

Each significant entry shown in the above-mentioned statements, is marked with references to notes which provide the relative information.

Subsidiary companies

The consolidation area includes the Parent company and the companies it controls, that is, where it has the power to determine financial and managerial policies of a business in order to reap benefits from said company's activities. Subsidiary companies are consolidated from the date in which control was effectively transferred to the Group and are no longer consolidated as from the date that control becomes external to the Group.

These companies are consolidated using the integral consolidation method. In order to prepare the consolidated data, the patrimonial, economic and financial situations of the subsidiary and associate companies have been used as prepared by the Group's individual companies at the reference dates, opportunely reclassified and amended to reflect the application of the homogeneous accounting standards.

In drafting the consolidated balance all the balances and significant transactions between the Group's companies have been eliminated, as are all unrealised infra-group profit and loss transactions.

Associated companies

The share in associated companies, that is those companies in which the Group has significant influence, is evaluated using the net patrimony method, as defined in *IAS 28 – Investments in Associates*. The profits or losses relevant to the Group are included in the consolidated balance from the date in which this considerable influence began up to the moment it ceases.

Property, plant and equipment

Tangible fixed assets are shown at purchase cost, including any costs that may be directly ascribable and necessary for activating the asset and putting it to the use for which it was purchased. In reference to land and buildings listed in First Time Adoption, the fair value was used instead of the cost.

Tangible fixed assets are shown at net value of the relative accumulated depreciations and losses due to the reduction in value determined in accordance with the modalities described below.

Tangible fixed assets are amortised in constant rates during the course of their expected useful life cycle, i.e. the estimated period of time in which the asset will be put to company use. Whenever significant parts of tangible fixed assets have different estimated useful life cycles, said components are amortised separately.

The value to be depreciated is given by the registered value of the asset net of any loss in value and reduced by its assumed value at the end of its useful life cycle, if significant and reasonably calculable. The useful life cycle and the cash value are reassessed annually and any changes, where necessary, are brought in with a perspective application.

The main depreciation rates used are the following:

- industrial buildings: 3%
- electrical equipment: from 5 to 10%
- air conditioning equipment: from 6 to 15%
- telephone systems: 20%
- alarm systems: from 10 to 30%
- furniture and fittings: 12%
- electrical machinery: 15%
- electronic machines and computers: 20%
- vehicles: 25%

Land, both without buildings or next to civil and industrial constructions, is accounted for separately and not amortised as it is considered an element with an indefinite useful life cycle.

In order to calculate any losses due to depreciation, the accounting value of intangible fixed assets is subject to verification.

At the time of elimination or when no future economic benefit can be expected from the use of an asset, it is eliminated from the balance and the eventual loss or profit (calculated as the difference between the assignment value and the taxation value) is shown in the economic account of the year in which the asset is eliminated.

Financial leasing

Assets owned through financial leasing contracts, through which all the risks and benefits tied to the property are transferred to the Group, are registered among the Group assets at their fair value or, if this value is lower, at the present value of the minimum payments due for the leasing and depreciated by applying coherent criteria to the other assets. The corresponding liability towards the lessor is registered in the balance among the financial debts.

Intangible fixed assets

Intangible fixed assets are shown as such when it is likely that they will bring in future economic benefits for the company and when the asset cost can be feasibly determined.

Intangible fixed assets, having a defined useful life cycle, are subsequently registered net of the relative accumulated amortizations and any losses due to a reduction in value.

The useful life cycle is reassessed annually and any changes, where necessary, are brought in with a perspective application.

Profits or losses deriving from the transfer of an intangible fixed asset are determined as the difference between the elimination value and taxation value of said asset and are reported on the economic account at the time of elimination.

Research costs are charged to the income statement in the period in which they are incurred.

The development costs of projects for the production of instrumental software, or those to be sold, are registered on the assets when they satisfy the following conditions: the costs can be reliably determined, the product is technically feasible, the expected use and/or sale of the product indicate that the sustained costs will generate future economic benefits. In respect of the standard that correlates costs and returns, these costs are amortized as from the moment in which the activity becomes available for use, in permanent amortisation amounts for the entire duration of the product's lifecycle, estimated at five years. The costs of internally generated intangible assets include any expenses that can be directly attributable to the development of the product and any reasonable part of general production costs attributable to the preparation stages before putting the product to use. Development costs that cannot be capitalised, when sustained, are reported on the income statement.

Goodwill

Goodwill resulting from the purchase of controlled and incorporate companies is initially registered at cost and is the overbalance of the purchase cost in respect of the purchaser's share of the fair value of the assets and liabilities and the potential liabilities at the date of purchase.

After the initial registration, goodwill is no longer amortised and is decremented of any losses in accumulated value, calculated according to the IAS 36 Asset value reduction.

Goodwill is subject to an annual analysis of retrievableness or at shorter intervals if something happens or changes in circumstances arise, which could cause losses in value.

Goodwill deriving from purchases made prior to 1st January 2004 is registered at the recorded value ascribed to it in the last balance drafted on the basis of the previous accounting standards (31st December 2003). In fact, during the preparation of the opening balance in accordance with the international accounting standards, none of the purchase transactions made prior to 1st January 2004 have been re-considered.

The start-up relating to holdings in associated companies is included in the value of these companies.

Impairment loss

The Group annually verifies the accountable value of intangible and tangible assets or more often whenever there is an indication that assets may have suffered a value loss.

If the charged value exceeds the recoverable value, the assets are devalued to reflect their recoverable value, represented by the greatest figure between the net price and use value. In defining the use value, expected future financial flows are discounted back using a pre-tax discount rate that reflects the current market estimations in reference to the cost of money at the time and the specific risks of the asset in question. For an asset that does not generate widely independent financial flows, the return value is determined in relation to the unit generating the financial flows of which the asset is a part. The value losses are accounted for in the economic account among depreciation and devaluation costs. When subsequently an asset value loss, different from the beginning, is less or decreases, the accounting value is increased to a new estimate of the recoverable value within the limit of the previous value loss. The recovery of a value loss is registered to the economic account.

Assets available for sale

Share in non-consolidated companies are classified as assets financially available for sale and are valued at fair value. For any shares quoted the fair value is the market value as of the reference date. The profits and losses found due to the effect of evaluation at fair value at every balance date for these activities were determined at net patrimony except for the value losses registered to the economic account, until the financial activity has been eliminated, which is the moment when the total profit or loss found in the net patrimony is registered to the profit and loss account.

Other non-current credits

These are registered at their nominal value, representative of their *fair value*.

Stock

Leftover stock is valued as the lesser value between purchase cost and the net value of the assumed income. The cost is determined in accordance with the average calculated cost method.

On-going orders

When the result of an order can be reliably estimated, the relative revenues and costs are shown in relation to the situation of the activity's progress at the time of financial period closure, on the basis of the ratio between sustained costs for the activity carried out to date and the total estimated cost of the order, unless this calculation is not deemed representative of the order's progress.

Any variations to the contract, price or incentive reviews, are included to the amount that were agreed with the customer.

When the result of an order cannot be estimated reliably, the relative revenues are shown only within the limits of the order's sustained costs, which will probably be retrieved. Order costs are shown as expenses in the financial period in which they were sustained.

Should it appear likely that the total costs of a work to order will exceed the revenues, the expected loss is immediately shown as a cost.

Commercial credits and other credits

Commercial credits, whose expiry limits are within normal commercial terms, are not updated and are registered at their nominal value net of any loss of value. Moreover, they are adjusted to their assumed cash value by means of the registration of an appropriate amendment fund.

Liquid asset availability and equivalent means

The availability of liquid assets and equivalent means is registered at nominal value and has the requirements to be immediately available or available at very short notice, without obstacles and with no significant expense for collection. Financial investments are classified as liquid assets only when they have a short expiry.

Non current assets held for sale

The voice includes non-cash assets, the value of which will mostly be recovered by their sale rather than through their continuous use. These assets are valued as the lesser value between the net accounting value and the cash value net of sales costs.

Employee benefits Post-employment

Severance pay (TFR), governed by Civil Code article 2120, foresees that, when the work contract ends and working relations close, an employee shall be paid a sum calculated on the basis of the length of time he/she was employed and the amount of remuneration received.

Following the reform on additional welfare benefits, amounts matured up to 31/12/2006 remain in the company and the old governance system will be applied on these. Instead, for amounts matured since 01/01/2007, the

employees can decide whether to allocate them as an additional welfare payment or to keep them in the company (if the company employs at least 50 people) or even have them put into a treasury fund (if the company employs at least 50 people) set up at INPS (State Welfare Offices).

Therefore:

- Severance Pay amounts matured up until 31/12/2006 and amounts matured since 01/01/2007 and kept in the company, are shown as definite benefit plans, while
- Severance Pay amounts matured since 01/01/2007 and transferred into additional welfare funds or treasury funds at INPS, are shown as definite contribution plans.

Severance Pay is calculated by independent actuaries using the "matured benefit" method by means of the "Projected Unit Credit" criterion as provided for in IAS 19. The calculation method can be outlined by the following phases:

- projection for each employee according to the assessment date of any Severance Pay already set aside and any future Severance Pay amounts that will mature up to the unforeseeable end of relations and by projecting the worker's remunerations;
- determination for each employee of probable Severance Pay payments that the company may have to make should the employee decide to resign, be dismissed, be incapacitated, die or take early retirement as well as any request for advance payments;
- the discounting back, at assessment date, of each probable payment;
- and (for companies with at least 50 employees) the re-proportioning, for each employee, of the probable and discounted back services based on the length of service at assessment date compared to the entire unpredictable amount at liquidation date.

Risk and obligation funds

In accordance with the IAS 37, the allocations are shown when there is an ongoing obligation (legal or implicit) that stems from a past event, whenever an outlay may be necessary to satisfy the obligation and a feasible estimation may be made on the obligation amount.

If the effect of updating the assumed cash value is significant, the allocations are calculated by updating the expected future financial flows at a pre-tax discount rate that reflects the current market evaluation of the cash value in relation to time. When updating has been done, the increase in the allocation caused by the passing of time is shown as a financial obligation.

Commercial debts and other current liabilities

The commercial debts, whose deadlines are within normal commercial terms, are not updated and are registered at cost (identified by their nominal value).

Financial liabilities are initially shown at cost, which corresponds to the fair value of the liability, net of transition costs, which are directly attributable to the issue of the liability itself.

Revenues and costs

The revenues and costs are determined in accordance with the qualifying economic principle to the amount to which the fair value can be feasibly determined.

Depending on the type of operation, the revenues are determined on the basis of the specific criteria reported below:

- the revenues for services are determined with reference to the point at which they stand on the basis of the same criteria used for determining the position of ongoing orders. If it is not possible to feasibly determine the revenue values, they are then calculated until they concur with the amount of expenses sustained and which are deemed recoverable.
- the profits from the sale of goods are shown when significant risks and benefits of the ownership of the goods are transferred to the purchaser, the sale price is agreed or can be determined and payment is collected.

As for sales concerning assistance and/or maintenance services carried out with the annual subscription formula,

the accrual is calculated in proportion with time.

The costs are ascribed in the balance according to the same criteria as those for revenue acknowledgment.

Income taxes

Current income taxes for the financial period are calculated on the basis of estimates of taxable income in accordance with the laws in vigour; moreover, the effects deriving from the activation within the Group of the national tax consolidation are also taken into account. The debt for current taxes is accounted for in the patrimonial status, net of any taxes paid in advance.

Deferred and pre-paid income taxes are calculated on the temporary differences between the patrimonial values registered in accordance with the IFRS international accounting standards and the corresponding values realised for tax purposes. Deferred income tax are calculated applying the tax rate which will be in force at the financial period after the account reference dates.

Assets due to pre-paid taxes are registered when their recovery is probable, that is, when it is expected that sufficient tax profits will be available in the future so that these assets may be used. The degree of recovery of pre-paid tax assets is re-examined at the end of every period. Deferred taxes are always calculated in compliance with the IAS 12.

The controlling company CAD IT S.p.A. and some of the other companies in the Group have exercised the Group taxation option described in art. 117 of the TUIR no. 917/1986, which involves determining a total global revenue that corresponds to the algebraic sum of the total net revenues of the companies adhering to this system. The liquidation of this single tax amount due allows the Group the contextual use of any tax losses in the financial period.

2. Subsidiary companies and Consolidation area

During the first half of 2013 there were no changes in the consolidation area. The fully consolidated companies included in the financial schedules of CAD IT Group are the following:

Company name	Registered office	Share/ Quota capital (Euro)	Percentage of investment	Percentage of investment of the Group
<i>Consolidated using the integral method</i>				
CAD IT S.p.A.	Verona	4,669,600	Parent company	
CAD S.r.l.	Verona	295,500	100.00%	100.00%
CeSBE S.r.l.	Verona	10,400	62.11%	62.11%
D.Q.S. S.r.l.	Roma	11,000	100.00%	100.00%
Elidata S.r.l.	Castiglione D'Adda (LO)	20,000	51.00%	51.00%
Smart Line S.r.l.	Verona	102,700	51.05%	51.05%
Datafox	Verona	99,999	51.00%	51.00%
Tecsit S.r.l. ⁽¹⁾	Roma	75,000	70.00%	70.00%
⁽¹⁾ Held through DQS S.r.l.				

3. Revenues

Revenues earned by the Group during the period are as follows:

	30/06/2013		30/06/2012		Variations	
	€/000	% PV	€/000	% PV	€/000	%
Income from sales and services	23,818	92.5%	24,582	93.0%	(764)	(3.1%)
Asset increases due to internal work	1,881	7.3%	1,809	6.8%	72	4.0%

Other revenue and receipts	38	0.1%	33	0.1%	5	15.0%
Production value	25,736	100.0%	26,424	100.0%	(688)	(2.6%)

Service and sales include any income from the sale of licensed out software, maintenance services for software updating, the use of personalised applicative packages, the sale of hardware, consultancy services and information technology system design.

In the first half of 2013, revenues from sales and services decreased compared to the first half of 2012 by 3.1%, recording the value of 23,818 thousand euro.

Increases in internal work capitalised under fixed assets came to Euro 1,881 thousand, registering a slight increase compared to Euro 1,809 thousand in the first half of 2012 financial period, and include the activities carried out by the staff of CAD IT and the Group's companies concerning the development of new procedures aimed at the sale of licensed products or instrumental goods for the company's traditional business.

The Group's activities usually are not affected by significant cyclical or seasonal variations in total sales during the financial period.

4. Segment reporting by sectors

The internal organisational and managerial structure and the internal reporting for the Board of Directors is presently grouped into two operative divisions: Finance and Manufacturing. These divisions are the basis on which the Group reports sector information according to the primary layout.

The main activities of each sector are as follows:

Finance: includes the computer applications aimed specifically at banks, insurances and other financial institutions.

The main applications provide:

- management of intermediary activities on securities, funds and derivate instruments;
- management of the typical services in the credit sector, such as the collection, treasury and monitoring of credit procedures;
- service allocation for trading on line;
- management of integrated banking computer systems;
- consultancy and training.

Manufacturing: includes the development and marketing of instruments and software applications and offers a series of services aimed at allowing the companies to effectively manage numerous company processes, including Outsourcing.

The data not allocated to the sectors mainly refer to income and costs for logistics and administration services given to the group's companies by the controlling party.

Disclosures for business segments	30/06/2013				
	Finance	Manufacturing	Not allocated/General	Elisions	Consolidated
External revenues	24,665	1,072			25,736
Intersegment revenues	1,639			(1,639)	0
Total revenues	26,304	1,072		(1,639)	25,736
Costs	(25,396)	(1,056)	(819)	1,639	(25,632)

Income taxes			(856)		(856)
Third party share (profit)/loss	(244)	(4)	115		(133)
Financial period profit (loss)	1,836	25	(1,463)		397
Assets	86,351	797	2,090		89,238
Liabilities	23,118	327	9,554		32,999

Information on the sector according to the secondary layout by geographical area is not provided as the Group presently produces and carries out its activities almost totally nationally and homogeneously.

5. Purchase Costs

	30/06/2013	30/06/2012	Variations	%
Hardware-Software purchases for sale	89	133	(45)	(33.4%)
Maintenance and consumable hardware purchases	9	7	2	24.1%
Other purchases	135	133	2	1.5%
Variations in raw material stock	16	(25)	41	(167.1%)
Total	249	249	0	0.1%

Costs for purchasing hardware and software for sale refer to purchases made for orders that clients had already

confirmed and are, in total, unchanged from the first half of 2012. Inventories decreased during the period of EUR 16 thousand.

6. Service costs

	30/06/2013	30/06/2012	Variations	%
External collaboration	1,927	2,633	(706)	(26.8%)
Travelling expenses and fee reimbursement	770	733	38	5.2%
Other service costs	1,464	1,372	92	6.7%
Total	4,162	4,738	(576)	(12.2%)

Service costs during the first half of 2013 came to Euro 4,162 thousand, a decrease compared to the same period of previous year (Euro 4,738 thousand). In particular, external collaboration costs, decreased by 26.8% (-706 thousands of euro), partially compensated by the increase in other service costs and in travelling expenses and fee reimbursement, correlated to the productive activities in terms of the need to carry out work on customer premises.

Other service costs mainly include assistance fees and hardware and software maintenance, energy costs, administrative, legal and fiscal consultancy, maintenance costs and for office management and installed systems.

7. Other operational costs

The following table shows and confronts the other operative costs, that have undergone an increase of about 17.9%

	30/06/2013	30/06/2012	Variations	%
Third party benefit expenses	262	270	(8)	(2.8%)
Various management charges	63	126	(63)	(50.1%)
Total	325	396	(71)	(17.9%)

Third party benefit expenses, in 2013 first half year, came to Euro 262 thousand, compared to Euro 270 thousand in the first six months of 2012 and mainly refer to equipment rental, use of instrumental software and to operational offices lease.

8. Labour costs and Employees

Labour costs in the first six months of 2013, of Euro 17,675 thousand, increased by 2.5% compared to the same six months in 2012 (Euro 17,239 thousand, restated following the adoption of the amendment to IAS 19).

The increase in labour costs is due to contractual salary increases in addition to the increase in the average number of employees in the group.

	30/06/2013	30/06/2012	Variations	%
Salaries and wages	12,769	12,487	282	2.3%
Social security costs	3,839	3,727	112	3.0%
Severance pay	989	979	11	1.1%
Other costs	78	47	31	66.1%
Total	17,675	17,239	436	2.5%

Following the application from 1 January 2013 (retrospectively) the amendment to IAS 19, the actuarial gain or loss on liabilities for defined benefit plans is no longer included in the cost of labour but in the Other comprehensive income that will not be reclassified subsequently to profit or loss.

The following table shows the data for the precise number of employees at the Group CAD IT:

Category of employees	labour force at 30/06/2013	labour force at 30/06/2012	Variations
Management	18	18	0
White-collars and cadres	578	577	1
Blue-collars	1	2	(1)
Apprentices	13	7	6
Total	610	604	6

The number of CAD IT Group staff, at 30th June 2013 was 610 employees, compared to 604 at 30th June 2012. The average number of employees during half year in question was 607 persons while this figure was 600 in the previous first half year. The following table shows data regarding the CAD IT Group average number of employees:

Category of employees	Average number 1 st half 2013	Average number 1 st half 2012	Variations
Management	18	18	0
White-collars and cadres	577	576	1
Blue-collars	1	2	(1)
Apprentices	11	4	7
Total	607	600	7

The Group continues to dedicate particular attention to professional staff training at certain periods by means of internal training programmes and updating courses.

9. Other administrative costs

The table below shows the other administrative costs in detail:

	30/06/2013	30/06/2012	Variations	%
Director and legal representative fees	716	705	12	1.7%
Director retirement	8	8	0	-
Director and legal representative fee contributions	75	85	(10)	(11.8%)
Telephones	176	194	(18)	(9.2%)
Commissions	0	1	(1)	(100.0%)
Advertising fees	51	60	(9)	(15.0%)
Total	1,026	1,052	(27)	(2.5%)

Other administrative costs include remunerations paid to correlated parties of Euro 569 thousands, previous period Euro 557 thousands (as shown in note 37).

10. Financial performance

The financial management result was in credit by Euro 16 thousand, improved compared to Euro 49 thousand in first half of 2012, as the following detailed table shows.

30/06/2013	30/06/2012	Variations
------------	------------	------------

Interest on bank deposits and equivalent	36	82	(46)
Total financial income	36	82	(45)
Interest on bank overdrafts and loans	(19)	(30)	11
Interest on debts for financial leasing	0	(3)	3
Foreign exchange losses	(1)	(0)	(1)
Total financial charges	(20)	(33)	12
Net financial income and (charges)	16	49	(33)

The fall in interest on bank deposits was primarily due to lower cash and cash equivalents (see the paragraph on the financial position).

Financial expenses consist mainly of bank overdrafts of subsidiaries.

11. Revaluations and depreciations

The revaluation of holdings valued with the net patrimony method only concern the associate company Sicom S.r.l. both in the first six months of 2013 (Euro 181 thousand) than in the first six months of 2012 (Euro 214 thousand). Between revaluations are also recorded 99 thousand euro from the alienation of assets available for sale (24 thousand euro in the previous period).

12. Income taxes

The taxes ascribable to first half of 2013 were estimated taking the results of the period and the norms in force into account and they represent the best possible estimate of the tax expenses ascribable to the period in question.

	30/06/2013	30/06/2012	Variations	%
Tax pre-payments	73	12	61	507.6%
Deferred taxes	(93)	(62)	(31)	50.1%
Current taxes	594	906	(313)	(34.5%)
Total income taxes	573	856	(283)	(33.1%)
Tax incidence on the gross pre-tax result	143.2%	61.8%		

The controlling company, CAD IT S.p.A., and some of the Group's companies, have exercised, for the three years 2013-2015, the option of Group taxation as stated in art. 117 of TUIR 917/1986, which concerns the determination of a global income that corresponds to the algebraic sum of all net incomes of the companies in the group. The liquidation of this one tax allows the Group the contextual use of any tax losses in the period and determines, at a group level, the amount of interests allowed that can be deducted fiscally in accordance with the reform that began during the 2008 financial period.

The tax incidence for the period on the gross pre-tax result amounted to 143%, while in the first six months of 2012, it was 62%.

The impact of taxes on the result is connected to the tax undeductibility of costs, especially personnel costs for the regional tax on productive activities (IRAP) purposes, determining, for this tax, a tax base much higher than the result for the year.

13. Earnings per share

The basic result per share is calculated by dividing the profit/loss of the period ascribable to the ordinary shareholders of the Head Company by the weighed average number of ordinary shares in circulation during the year. The number of ordinary shares in circulation does not change during the year of the period and no other types of share are admitted. There are no options, contracts or convertible financial instruments or equivalent that give their owners the right to acquire ordinary shares, therefore, the basic profit per share and the dissolved profit per

share agree.

<i>Earnings per share</i>	30/06/2013	30/06/2012
Net profit from continuative activities attributable to ordinary shares (thousand of €)	(223)	397
Weighed average number of ordinary shares outstanding	8,980,000	8,980,000
Basic earnings per share (in €)	(0.025)	0.044

14. Property, plant and equipment

The caption "property, plant and equipment" is composed as follows:

	30/06/2013	31/12/2012	Variations	%
Land	1,527	1,527	0	-
Buildings	14,528	14,589	(61)	(0.4%)
Plant and equipment	1,114	1,197	(83)	(6.9%)
Other assets	485	470	15	3.1%
Total property, plant and equipment	17,654	17,783	(129)	(0.7%)

During the first half of 2013, the item "property, plant and equipment" varied as follows:

	Land and buildings	Plant and machinery	Industrial and commercial equipment	Other tangible fixed assets	Total
Purchase or production cost	9,140	4,185	33	5,028	18,385
First time adoption revaluation	8,439	-	-	-	8,439
Previous years depreciation and write-downs	(1,463)	(2,988)	(28)	(4,563)	(9,041)
Adjustments to previous years write-downs	-	-	-	-	-
Opening value	16,116	1,197	5	465	17,783
Variations in consolidation area	-	-	-	-	-
Purchases	-	2	-	112	114
Transfers	-	-	-	-	-
Reduction in accumulated depreciation due to disposals	-	2	-	15	16
Disposals	-	(2)	-	(15)	(17)
Revaluations for the period	-	-	-	-	-
Depreciation and write-downs for the period	(61)	(84)	(1)	(97)	(242)
Adjustments to write-downs for the period	-	-	-	-	-
Total tangible fixed assets	16,055	1,114	5	480	17,654

Land and buildings include property and land, accounted for separately, belonging to the Group.

There are no restrictions on the legal ownership and possession of assets, systems and machinery to guarantee liabilities. There are no contractual restrictions for buying assets, systems or machinery.

Some land and buildings have been revaluated at FTA at fair value as a substitute of cost and is calculated by an external expert, as indicated in the attached document on transition to the international accounting standards to the financial statement at 31st December 2005.

The purchasing of new tangible assets during the year half came to a total of Euro 114 thousand of which Euro 112 thousand were for "other tangible assets" and mainly included the purchasing of electronic machinery,

managerial instruments characteristic of the Group's activities. During the first half of 2013 property, installations and machinery were not subject to any value reductions that required registration in the balance.

15. Intangible fixed assets

The caption "intangible fixed assets" is composed as follows:

	30/06/2013	31/12/2012	Variations	%
Industrial patents and similar rights	13,977	8,491	5,486	64.6%
Licences, trademarks and similar rights	185	225	(40)	(17.6%)
Assets under development	6,544	12,034	(5,490)	(45.6%)
Total Intangible fixed assets	20,706	20,750	(44)	(0.2%)

In the half period, "Intangible fixed assets" varied as follows:

	Industrial patents and similar rights	Licences, trademarks and similar rights	Assets under development and payments on account	Other	Total
Purchase or production cost	24,170	3,825	12,034	27	40,056
Previous years revaluations	-	-	-	-	-
Previous years depreciation and write-downs	(15,679)	(3,600)	-	(27)	(19,306)
Adjustments to previous years write-downs	-	-	-	-	-
Opening value	8,491	225	12,034	0	20,750
Variations in consolidation area	-	-	-	-	-
Purchases	0	27	1,881	0	1,908
Transfers	7,371	0	(7,371)	0	0
Reduction in accumulated depreciation due to disposals	-	-	-	-	-
Disposals	-	-	-	-	-
Revaluations for the period	-	-	-	-	-
Depreciation and write-downs for the period	(1,885)	(66)	0	0	(1,951)
Adjustments to write-downs for the period	-	-	-	-	-
Total intangible fixed assets	13,977	185	6,544	0	20,706

The voice "industrial patent rights and works of ingenuity" is almost entirely made up of software procedures developed by the CAD IT Group. The values are registered in credit to the directly sustained cost, mainly due to the use of internal resources as well as any possible additional accessory fees that may occur. In respect of the principle that correlates costs and revenues, such costs are amortized as of the moment in which they are available for use and in terms of the product's lifecycle, estimated at five years.

During the period, following the completion and start of projects, were enrolled 7,371 thousand euro, previously recorded as intangible assets in progress. The amortizations of this voice in the first half of 2013 financial period came to Euro 1,885 thousand.

The caption "Licences, trademarks and similar rights" principally includes the licensed out software bought by third parties used by the Group for production activities.

The voice assets under development relates to investments in development of software procedures under construction both for sale and for in-company use. Most of these investments are aimed at new, advanced products, the use of which will be needed, even by law, in credit and financial institutions and in the field of public and industrial administration. These assets are recognized as assets based on the cost directly incurred, mainly relating to the use of internal resources. During 2013 first half period, ongoing intangible assets increased due to

costs capitalized only by the parent company CAD IT (Euro 1,881 thousand), and which fell to 7,371 thousand euro due to the reclassification of part of the asset being under Industrial patents and similar rights.

These assets have undergone no reduction in value during the 2013 first half financial year that need to be registered in the balance.

16. Goodwill

The Group verifies the recovery of goodwill at least once a year or more often if there are indications of a value loss.

The goodwill acquired in an aggregation of companies is allocated, at the time of purchase, to the Cash Generating Unit (CGU) from which benefits connected to the aggregation are expected. In particular, with regard to the CGU of the Group, these are the controlled companies that represent the smallest identifiable group of activities that generate in-coming financial flows and which are largely independent of the in-coming financial flows from other activities or groups of activities.

The value of goodwill has been allocated to the CGU at the date of First Time Adoption.

Company	Goodwill
CAD S.r.l.	4,725
D.Q.S. S.r.l.	2,279
Elidata S.r.l.	617
Smart Line S.r.l.	443
Datafox	217
CeSBE S.r.l.	28
Totale	8,309

The recoverable value of the CGU is verified by determining the value in use.

The evaluation of the CAD IT Group companies was made through a Discounted Cash Flow (DCF), the most common calculation method in financial markets. Operational cash flow forecasts are based on the most recent budget plans approved by the Board of Directors and relate to the period 2013-2015 which take into account the concrete company growth possibilities based on past data and on management forecasts. The financial flows that go over this period have been calculated with great care using a growth rate of nil. The putting into effect rate used is the weighed average of capital estimated.

The main assumptions used by the Directors for discounting back prospective financial flows in order to make an analysis of the holding value are reported below:

the equation used for estimating the weighed average cost of capital is the following

$$k = k_b(1 - TC) \left(\frac{B}{V} \right) + k_p \left(\frac{P}{V} \right) + k_s \left(\frac{S}{V} \right)$$

where:

k_b = interest rate in case of debt

TC = marginal tax rate of the economic bodies being evaluated

B = market value of the debt of a company

V = total market value of a company.

k_p = advisability cost of risk capital

P = market value of the privileged shares

k_s = advisability cost of own capital determined by the market

S = market value of the net capital.

The cost of capital was identified as $k_s = 10.65\%$.

The permanent growth rate of the company being evaluated was chosen by taking it as 0% a year despite the

CAGR of the income and profits of each being greater.

The value of the companies was determined as a summation of discounted back cash flows (Free Cash Flow), of the remaining value and the net financial position. In brief we can say:

$$\text{Company value} = \pm \text{net financial position} + \text{discounted back cash flows} + \text{remaining value}$$

If we want to translate this equation into mathematical terms, we could show it in the following way:

NPV = company value (Net Present Value)

PFN = Net Financial Position

FCF = cash flow

k = cost of capital

N = explicit period

g = growth rate of the implicit period

$$NPV = \pm PFN + \sum_i^N FCF (1+k)^{-N} + \left(\frac{FCF_{N+1}}{k-g} \right) \left\{ \frac{1}{[1+(k-g)]^N} \right\}$$

17. Investments in associates

The only holding in Sicom S.r.l. was evaluated with the equity method. The reference values used for evaluating this holding with the equity method and the relative reference data on the patrimonial situation are shown in the following table:

Company name	Date of reference	Quotaholders' equity including profit for the period	Profit for the period	Percentage of investment	Investment value of the Group
Sicom S.r.l.	30/06/2013	1,443	723	25.00%	361
	31/12/2012	1,370	685	25.00%	342

18. Financial assets available for sale

This point involved CIA S.p.A. shares, company listed on MTA segment market of the Italian stock exchange.

During the half year were entirely alienated;

The sale generated a capital gain of EUR 99 thousand recorded in the income statement.

At the end of the semester the group does not hold any financial assets available for sale.

The table below illustrates the value variations of these holdings during the first half of 2013.

Holdings	30/06/2013		31/12/2012	
	Number of shares held	Fair value €/000	Number of shares held	Fair value €/000
Cia S.p.A. (CIA)	0	0	1,008,759	243
Total		0		243

19. Credits due to prepaid taxes

Credits due to prepaid taxes amount to Euro 760 thousand and are made up of assets in this period or previous periods and will probably create a taxable income for which they could be used. Credits for pre-paid IRES and

IRAP taxes are mainly in reference to time differences (deductible over the next few financial periods) and past losses that the Group's companies made.

20. Inventories

Leftover stock entirely includes finished products and goods for Euro 66 thousand compared to Euro 82 thousand at 31/12/2012.

21. Trade receivables and other credits

Commercial credits and other credits are made up as follows:

	30/06/2013	31/12/2012	Variations	%
Credits to clients	29,931	28,209	1,721	6.1%
Credit depreciation fund	(167)	(165)	(2)	1.2%
Credits to associated companies	2	0	2	-
Accrued income and deferred expenses	1,052	413	639	154.9%
Other credits	176	231	(55)	(23.7%)
Total trade receivables and other credits	30,993	28,687	2,306	8.0%
% coverage credit depreciation fund	0,56%	0,59%		

Credits to clients are mainly in favour of banking, financial and insurance institutions and other group customers institutions; the accounting value of commercial credits and other credits is approximate to their *fair value*.

The high sum of credits towards clients is conditioned by the size of the value of the contracts, which is often considerable, as well as the contractual terms of payment which usually state that the Financial Statement of the amounts due are to be paid after the procedures supplied have been approved.

The Group evaluated the credits to the probable break-up value. This evaluation is made analytically for expired credits and on expiry of a greater length of time than the average receipt time and on a lump-sum basis for the other credits, depending on the past incidence of losses that the Group finds for sales during the invoicing year.

Regarding credits that are considered uncollectable, an allocation fund has been set up to the amount of Euro 167 thousand (Euro 165 thousand at 31 December 2012) which ensures a cover of 0.56% of the total amount of credits towards clients. This fund was determined on the basis of past data regarding losses on credits and is considered proportionate. The decrease in credits towards clients compared to the comparison period is mainly due to the client payment receipt trend.

The item Accruals and deferred charges entirely refers to deferred charges made up of the following:

Nature	30/06/2013	31/12/2012
Software assistance	799	302
Advertising expenses	0	7
Third party benefit expenses	24	20
Telephone charges	54	3
Administrative services	15	11
Various insurances	47	9
Various others	63	46
Hardware assistance	50	13
Various	1,052	413

The total sum of the voice on other credits is detailed in the table below:

Credits towards other	30/06/2013	31/12/2012	Variations	%
-----------------------	------------	------------	------------	---

Receivables from social security institutions	2	17	(15)	(89.0%)
Receivables for advances on travel expenses	2	1	0	11.8%
Payments on account to suppliers	162	199	(37)	(18.7%)
Other	9	12	(2)	(18.0%)
Guarantee deposits	1	1	0	-
Total credits towards other	176	231	(55)	(23.7%)

22. Tax credits

The entry of Euro 2,362 thousand mainly comprises down payments in direct taxes (IRES and IRAP).

23. Cash and other equivalent assets

	30/06/2013	31/12/2012	Variations	%
Bank and postal accounts	2,289	3,479	(1,190)	(34.2%)
Cheques and Cash on hand	8	8	0	2.9%
Insurance policies capitalized	2,523	2,490	33	1.3%
Total Cash and other equivalent assets	4,820	5,977	(1,157)	(19.4%)

The bank and postal account deposits are made up of cash-on-hand in current bank accounts.

It is possible to redeem the capitalization insurance policy at any time and reimbursement is made within 20 days with no particular significant expense. The returns are variable in relation to the annually calculated revaluation rate. The guaranteed minimum annual rate is 2.50 %.

24. Company capital

The company capital, entirely registered, deposited and unchanged over the period, amounted to Euro 4,669,600. It was subdivided into 8,980,000 ordinary shares with a nominal value of Euro 0.52 each and all with equal rights. The ordinary shares are registered and indivisible and each one gives the right to a vote at the ordinary and extraordinary shareholders' meetings, as well as to the faculty of carrying out other company and patrimonial rights in accordance with the law and the statute.

CAD IT S.p.A. or its controlled companies do not own CAD IT or their own shares, not even through trustee companies or third parties.

Group net patrimony

The Group net patrimony came to Euro 53,521 thousand compared to Euro 56,414 thousand at 31st December 2012.

Third party net patrimony

The item refers to the equity of the controlled companies that, on the basis of the 'Equity ratios', belongs to third parties. It was made up of:

Third party net patrimony	30/06/2013	31/12/2012
Minority quotaholders of Cesbe S.r.l.	1,253	1,323
Minority quotaholders of Datafox S.r.l.	78	104
Minority quotaholders of Tecsit S.r.l.	16	16
Minority quotaholders of Elidata S.r.l.	604	600

Minority quotaholders of Smart Line S.r.l.	583	531
Total third party net patrimony	2,533	2,574

25. Reserves

	30/06/2013	31/12/2012	Variations	%
Share surcharge reserve	35,246	35,246	-	-
Valuation reserve for fin. assets available for sale	0	103	(103)	(100.0%)
Total Reserves	35,246	35,349	(103)	(0.3%)

The change in the fair value reserve for available-for-sale is related to the reversal of the reserve to the income statement, following the sale of the shareholding in the listed company CIA SpA (see also note 18).

26. Accumulated profit/losses

	30/06/2013	31/12/2012	Variations	%
Previous profits/losses	(892)	(620)	(273)	44.0%
Legal reserve	934	934	0	-
First Time Adoption transition reserve	2,119	2,119	0	-
Consolidation reserve	695	10	685	-
Available joint profit reserve	10,828	10,623	204	1.9%
Revaluation reserve liabilities for defined benefit	145	82	63	76.1%
Period profits/losses	(223)	3,247	(3,470)	(106.9%)
Total accumulated profits/losses	13,605	16,395	(2,790)	(17.0%)

The FTA transition fund covers any differences that may have occurred when the international accounting standards were first adopted.

The available reserve of undivided profits increased due to the effect of allocation to reserve part of the profit for the year 2012.

Following the application of the amendment to IAS 19, has recorded the revaluation reserve liabilities for defined benefit plan which includes the actuarial differences recognized in the other comprehensive income.

27. Dividends paid

On 29th April 2013 the CAD IT S.p.A. ordinary shareholders' meeting decided to allocate the profit for the year 2012 total amounting to Euro 2,892,796 to a dividend of Euro 0.30 per share, for total amount to Euro 2,694,000. The dividend was paid on 9th May 2013.

28. Financing

At the end of the semester the group does not hold any non-current borrowings for financing from banks or other lenders.

29. Liabilities due to deferred taxes

Deferred taxes amounted to Euro 3,372 thousand (Euro 3,374 thousand at 31st December 2012) and took into account the taxable time differences resulting from time differences of the accounting value of an asset or liability

compared to its recognized value for tax purposes. In particular they mainly referred to the fiscal effect of adjustments made at the FTA, the taxation of which was deferred to future periods after verifying the taxability conditions of the major values registered for the activities or the reduction of the liability value.

30. Employees' leaving entitlement and quiescence reserves

	30/06/2013	31/12/2012	Variations	%
Employees' leaving entitlement (TFR)	6,667	6,744	(77)	(1.1%)
Fund due to director end of term of office treatment	47	40	7	18.5%
Total	6,714	6,784	(70)	(1.0%)

The point concerning the TFR Fund shows the movements resulting from annual allocations made on the basis of the evaluations of external actuaries and the uses carried out concerning end of working contract resolutions or advance payments.

Employees' leaving entitlement	30/06/2013	31/12/2012	30/06/2012
Opening balance	6,744	6,699	6,699
Service cost	65	117	59
Interest cost	107	215	105
Benefits paid	(103)	(309)	(202)
Actuarial (gains)/losses	(146)	22	(117)
Closing balance	6,667	6,744	6,545

In order to carry out the mathematical evaluation the database of each employee (salary, matured TFR net of any advance payments, age, sex, qualification, etc.) was given to the external actuaries by the companies' qualified offices. The hypothetical specifications on the employees in service regarding both their demographic evolution and their future economic characteristics were calculated on the basis of some past company series, on similar experience and on market figures as well as on the basis of some indications supplied by the companies themselves in terms of their experience and sensitivity to company events.

The following table shows the actuarial assumptions used to determine the present value of the obligation.

	30/06/2013	31/12/2012
ECONOMIC ASSUMPTIONS		
Annual discount rate	3.35%	3.20%
Annual inflation rate	2.00%	2.00%
Annual rate of increase in severance pay	3.00%	3.00%
Annual rate of salary increase	0.50%	0.50%
DEMOGRAPHIC DATA		
death	Mortality tables RG48 General Accounting Office	
disability	Tables INPS	
retirement	100% to the waging requirements AGO	
TECHNICAL BASES TURNOVER AND ADVANCES		
Frequency Advances	1.00%	1.00%
Turnover frequency	2.50%	2.50%

The annual discount rate used to determine the obligation was determined by reference to the average yield curve of that comes from the index *iBOXX Eurozone Corporates A* with a duration of 10 + years in the month of evaluation.

The rate shall be deemed to be representative of high quality corporate bonds in the financial market, taking into account that the Group has Italy as the main market of its activities.

The average maturity (duration) of debt is 15.8 years.

The following table shows the sensitivity analysis for the main evaluation parameters.

<i>Change in actuarial assumptions</i>	<i>Value of severance pay</i>
Turnover rate +1%	6,660
Inflation rate +0.25%	6,757
Inflation rate -0.25%	6,460
Discount rate +0.25%	6,399
Discount rate -0.25%	6,824

31. Expense funds and risks

The voice of a total of 147 thousand Euros includes provisions made in previous years to cover tax litigation of the subsidiary DQS Srl for the year 2006 (120 thousand euro) and other legal litigation (€ 27 thousand).

32. Commercial debts

The entire point amount to Euro 6,267 thousand and is as follows:

<i>Commercial debts</i>	<i>30/06/2013</i>	<i>31/12/2012</i>	<i>Variations</i>	<i>%</i>
Debts towards associated companies	91	108	(17)	(15.4%)
Debts towards suppliers	2,879	3,208	(330)	(10.3%)
Payments on account received	1	1	0	-
Accrued expenses and deferred income	3,296	486	2,810	578.8%
Total Commercial debts	6,267	3,803	2,464	64.8%

Debts towards suppliers are referred to as current debts for supplies of goods and services received, including those regarding investments in fixed assets.

The deferred income refers almost entirely to income that was already invoiced regarding annual ordinary maintenance and assistance contracts on user licences and mainly pertaining to 2013 second half period.

33. Tax debts

The taxation debt point amounts to Euro 2,986 thousand and regards debts that the companies of the Group included in the consolidation area have incurred with the inland revenue. This registration is made up of income tax debts, value added tax and to activities of tax substitution made by the various companies regarding their respective employees and collaborators.

34. Short-term financing

This point at 30th June 2013 is made up of Euro 1.992 thousand from short-term funding to banking institutions outstanding at account and of Euro 10 thousand from debts within 12 months toward other backers.

35. Other debts

Details of other debts are as shown:

	30/06/2013	31/12/2012	Variations	%
Social security charges payable	2,782	2,690	91	3.4%
Towards directors	74	229	(155)	(67.6%)
Dividends to be distributed to shareholders (third parties)	0	27	(27)	(98.7%)
Towards staff for deferred salaries and pay	5,732	4,283	1,449	33.8%
Other	101	78	23	29.3%
Total	8,689	7,307	1,382	18.9%

Debts towards welfare institutions included matured contributory debts on current monthly salaries as well as the quota for deferred salaries and for holidays to enjoy.

Staff debts refer to the current salaries for June 2013 and to accruals for deferred salaries that matured at the same date.

<i>Debt towards staff for wages and deferred pay</i>	30/06/2013	31/12/2012	Variations	%
For wages and expense accounts	2,162	1,144	1,018	88.9%
For production incentives	405	406	(1)	(0.2%)
For holidays	2,325	1,905	420	22.0%
For year-end bonus	840	3	836	n.s.
For summer bonus	0	824	(824)	(100.0%)
Total	5,732	4,283	1,449	33.8%

36. Consolidated net financial position

Is positive the net financial position as at 30 June 2013.

In particular, the Net short-term financial position (down by 1,068 thousand euro compared to December 31, 2012) coincides with the Net financial position by the absence of long-term loans and is positive for 2,817 thousand euro. In particular, cash-on-hand and in bank accounts came to Euro 2.297 thousand. Capitalization insurance policies of Euro 2,523 thousand were contractually available on 20-day prior request without any significant tax expenses. Short-term debts towards banks regard overdrawn accounts and advances subject to final payment.

<i>Net consolidated financial position</i>	30/06/2013	31/12/2012	Variations	%
Cash-on-hand and at bank	2,297	3,487	(1,190)	(34.1%)
Capitalization insurance policies	2,523	2,490	33	1.3%
Payables due to banks current portion	(2,002)	(2,092)	90	(4.3%)
Net short-term financial position/(indebtedness)	2,817	3,885	(1,068)	(27.5%)
Long-term loans	(0)	(0)	0	-
Net long-term financial position/(indebtedness)	(0)	(0)	0	-
Net financial position/(indebtedness)	2,817	3,885	(1,068)	(27.5%)

As a link between the data of the net financial position statement and the balance statement it is hereby reported that: cash, in bank accounts and capitalization insurance policies are registered in the patrimonial status as "Cash and other equivalent assets"; short-term financial debts are registered as "Payables due to banks current portion"; long-term financing is registered in the patrimonial status as "Long-term loans".

As shown in the consolidated cash flow statement, the decrease in financial assets was determined from the following areas:

- the operational management activities have generated positive cash flows for 3,359 thousand euro (8,466 thousand euro compared to the first half of 2012) due to inflows (net profit plus depreciation and amortization), net of non-cash items;
- investing activities absorbed 1,623 thousand euro (1,692 thousand euro compared to the first half of 2012)

for investment in intangible assets (€ 1,908 thousand), materials (€ 114 thousand) and financial (42 thousand euro), partially offset alienation of assets available for sale (€ 239 thousand), interest (36 thousand euro) and dividends received (163 thousand euro);

- financing activities have absorbed 2,804 thousand euro (2,356 thousand euro compared to the first half of 2012), mainly due to the payment of dividends to shareholders of CAD IT.

<i>Net short-term financial availability</i>	30/06/2013	31/12/2012	Variations	%
Bank and postal accounts	2,289	3,479	(1,190)	(34.2%)
Cheques and Cash on hand	8	8	0	2.9%
Insurance policies capitalised	2,523	2,490	33	1.3%
Debts towards banks (overdrawn accounts, advances subject to collection etc.)	(2,002)	(2,092)	90	(4.3%)
<i>Net short-term financial availability</i>	2,817	3,885	(1,068)	(27.5%)

37. Related parties transactions

Relations between the Group's companies are administered on the basis of contractual agreements drawn up by the respective administrative organs bearing in mind the quality of the assets and services involved and the competitive conditions of the market adapting the interests of the Group.

The summary of income and costs, despite the credit and debit position at 30th June 2013 between the Group's subsidiaries is shown in the specific paragraph on management intermediary report.

The following table shows the incidence of transactions with correlated parties on the respective balance entry:

Transaction incidence with correlated parties - current period	Total	Correlated Parties	
		value	% on Tot.
A) Transaction or position incidence with correlated parties on entries in the Profit and Loss account			
Income from sales and services	23,818	148	0.6%
Service costs	(4,162)	(197)	4.7%
Labour costs	(17,675)	(287)	1.6%
Other administrative expenses	(1,026)	(569)	55.5%
B) Transaction or position incidence with correlated parties on entries in the Patrimonial situation			
Commercial credits and other credits	30,993	47	0.2%
TFR and pension funds	6,714	150	2.2%
Commercial debts	6,267	148	2.4%
Other debts	8,689	228	2.6%
C) Transaction or position incidence with correlated parties on financial flows			
Cashed dividends	163	163	100.0%

Revenues from correlated parties mainly concern services carried out for Xchanging (Euro 144 thousand), the company that has a 10% holding in CAD IT.

The cost of services in respect of related parties include the services provided by the company Sicom to the parent (61 thousand euro), the fees paid to the Statutory Auditors of CAD IT (34 thousand euro), the rents property owned by a partner (11 thousand) and those related to translation services and language training services supplied by a

company in which a director of CAD IT is a shareholder (91 thousand euro).

Labour costs for correlated parties include the remunerations (including contributions to be paid by the company and matured accruals for deferred pay) of company employees who are related to, or have an affinity with, CAD IT directors and those managers with strategic responsibilities.

Other administrative expenses relating to correlated parties regard directorship fees received by CAD IT directors for the position of director in Group companies (euro 488 thousands) as well as to the directors of other companies in the Group who are related to, or have an affinity with them (Euro 80 thousands).

Debts towards correlated parties are mainly made up of commercial debts for the above mentioned services that had not yet matured (Euro 148 thousand), debts towards employees and directors for remunerations and remuneration accruals (Euro 228 thousand) and severance pay (Euro 150 thousand).

With the exception of the above relations, no other significant relations of an economic-patrimonial nature have been undertaken with correlated parties.

The tables below show the incidence of relations with correlated parties at 30/06/2012 and at 31/12/2012.

Transaction incidence with correlated parties – 30/06/2012	Total	Correlated Parties	
		value	% on Tot.
A) Transaction or position incidence with correlated parties on entries in the Profit and Loss account			
Income from sales and services	24,582	138	0.6%
Service costs	(4,738)	(337)	7.1%
Labour costs	(17,239)	(278)	1.6%
Other administrative expenses	(1,052)	(557)	52.9%
B) Transaction or position incidence with correlated parties on entries in the Patrimonial situation			
Commercial credits and other credits	28,716	84	0.3%
TFR and pension funds	6,577	131	2.0%
Commercial debts	7,831	134	1.7%
Other debts	8,229	127	1.5%
C) Transaction or position incidence with correlated parties on financial flows			
Cashed dividends	159	159	100.0%

Transaction incidence with correlated parties – year 2012	Total	Correlated Parties	
		value	% on Tot.
A) Transaction or position incidence with correlated parties on entries in the Profit and Loss account			
Income from sales and services	51,663	290	0.6%
Service costs	(9,526)	(569)	6.0%
Labour costs	(33,991)	(547)	1.6%
Other administrative expenses	(2,262)	(1,283)	56.7%
B) Transaction or position incidence with correlated parties on entries in the Patrimonial situation			
Commercial credits and other credits	28,687	100	0.3%
TFR and pension funds	6,784	140	2.1%
Commercial debts	3,803	224	5.9%
Other debts	7,307	317	4.3%
C) Transaction or position incidence with correlated parties on financial flows			

Cashed dividends	159	159	100.0%
------------------	-----	-----	--------

38. Significant events since 30th June 2013

No events have occurred that could noticeably effect the economic, patrimonial and financial situation of the company.

39. Other information

There have been no transactions or any non recurrent significant events, as defined in the Consob DEM/6064293 communication, in the present financial period or the previous one.

CAD IT and the Group's companies have not drawn up any contracts containing clauses that depend on continual financial funding (covenant) nor any agreements where a subject – to whom a loan has been granted – must behave accordingly (negative pledge).

In accordance with Consob Notification no. DEM/11070007 of 5th August 2011 (which in turn refers to document ESMA no. 2011/266 of 28th July 2011) on the information to be supplied in financial reports concerning sovereign debt statements kept by listed companies, it is hereby declared that the Group does not hold any bonds or loans issued by central or local governments or governmental bodies.

The present half yearly financial report was approved by the CAD IT S.p.A. Board of Directors on 27/08/2013.

ATTESTATION IN RESPECT OF THE HALF YEAR CONDENSED FINANCIAL STATEMENTS UNDER ART. 81-TER OF CONSOB REGULATION NO. 11971 OF 14TH MAY 1999 AND SUBSEQUENT MODIFICATIONS AND INTEGRATIONS

The undersigned, Giuseppe Dal Cortivo, Chairman of the CAD IT S.p.A. Board of Directors, and Maria Rosa Mazzi, the executive officer responsible for drafting the CAD IT S.p.A. company accounting documents, hereby declare, bearing in mind the content of art. 154-bis, paragraphs 3 and 4 of legislative decree no. 58 of 24th February 1998 in terms of:

the adequacy in relation to the characteristics of the company and the effective application, of the administrative and accounting procedures for drafting the half year condensed statements during the first six months of 2013.

Furthermore, it is hereby declared that the CAD IT S.p.A half year condensed statements:

- has been drafted in accordance with the International accounting standards (IFRS) – adopted by the European Union - in conformity with EC regulation no. 1606/2002 of the European Parliament and Council of 19th July 2002, and in particular with IAS 34 – *Intermediary Period Balances*;
- corresponds to the results in the company books and accounting documents;
- gives a true and correct representation of the patrimonial, economic and financial situation of the company and the group of companies included in the consolidation.

The interim management report includes reliable analysis of the reference to the important events affecting the Company during the first six month of the current fiscal year, including the impact of such events on the Company's condensed financial statements and a description of the principal risks and uncertainties for the remaining six months of the year. The interim management report also contains a reliable analysis of information on any significant operations with correlated parties.

Verona, 21 August 2013

/s/ Giuseppe Dal Cortivo
*Chairman
of the Board of Directors*

/s/ Maria Rosa Mazzi
*Executive officer responsible
for drafting the company's
financial statements*

FINANCIAL STATEMENTS OF CAD IT S.P.A.

Income Statement

	First Half 2013		First Half 2012 *	
	Total	of which related parties	Total	of which related parties
Income from sales and services	23,159	975	23,695	1,155
Asset increases due to internal work	2,167		2,152

Tecsit S,r,l,	-	1	-	-	7	-
Total	9,126	829	7	6	4,404	19,455

Maria Rosa Mazzi, manager in charge of drafting CAD IT S.p.A. accounting documents, hereby declares, in accordance with article 154-bis, second paragraph, of the Consolidated Law on Finance (Leg. Dec. 58/1998), that the accounting information in "Financial Statements of CAD IT SpA" at 30th June 2013 corresponds to the documentary results, books and accounting registers.

**Auditors' review report on the half-year condensed consolidated financial statements
for the six month period ended June 30, 2013**

*(This report has been translated into the English language solely for the convenience of
international readers)*

To the Shareholders of
CAD IT S.p.A.

1. We have reviewed the half-year condensed consolidated financial statements, consisting of the statement of financial position, income statement, statement of comprehensive income, statement of changes in equity and statement of cash flows and related explanatory notes as of June 30, 2013 of CAD IT S.p.A. and its subsidiaries (the "CAD IT Group"). These half-year condensed consolidated financial statements, prepared in conformity with the International Financial Reporting Standard applicable for interim financial statements (IAS 34) as adopted by the European Union, are the responsibility of CAD IT S.p.A.'s Directors. Our responsibility is to issue a report on these half-year condensed consolidated financial statements based on our review.
2. We conducted our review in accordance with the auditing standards recommended by the Italian Regulatory for Companies and the Stock Exchange ("Consob") for the review of the half-year interim financial statements under Resolution n° 10867 of July 31, 1997. Our review consisted principally of applying analytical procedures to the half-year condensed consolidated financial statements, assessing whether accounting policies have been consistently applied and making enquiries of management responsible for financial and accounting matters. The review excluded audit procedures such as tests of controls and substantive verification procedures of the assets and liabilities and was therefore substantially less in scope than an audit performed in accordance with established auditing standards. Accordingly, unlike our report on the year-end consolidated financial statements, we do not express an audit opinion on the half-year condensed consolidated financial statements.

The half-year condensed consolidated financial statements present, for comparative purposes, the financial data of the prior year and of the corresponding period of the prior year. As disclosed in the explanatory notes, the CAD IT S.p.A.'s Directors restated some of the corresponding figures included in the prior year and in the corresponding period of the prior year, with respect to the data previously presented, on which we issued our auditors' report and our review report on March 18, 2013 and on August 29, 2012 respectively. We have examined the methods adopted to restate the comparative financial data and the related disclosures for the purpose of issuing this review report.

3. Based on our review, nothing has come to our attention that causes us to believe that the half-year condensed consolidated financial statements of CAD IT Group as of June 30, 2013 are not presented fairly, in all material respects, in accordance with the International Financial Reporting Standard applicable for interim financial statements (IAS 34) as adopted by the European Union.

Verona, August 28, 2013
