AUDITORS : PKF ITALIA S.p.A.

- (1) Appointed on 29 April 2015; office expires with the shareholders' meeting for the approval of the 2017 financial statements .
 (2) Appointed on 8 July 2016; office expires with the shareholders' meeting for the approval of the 2017 financial statements .
 (3) Member of the Control and Risk Committee; member of the Nominating and Compensation Committee .

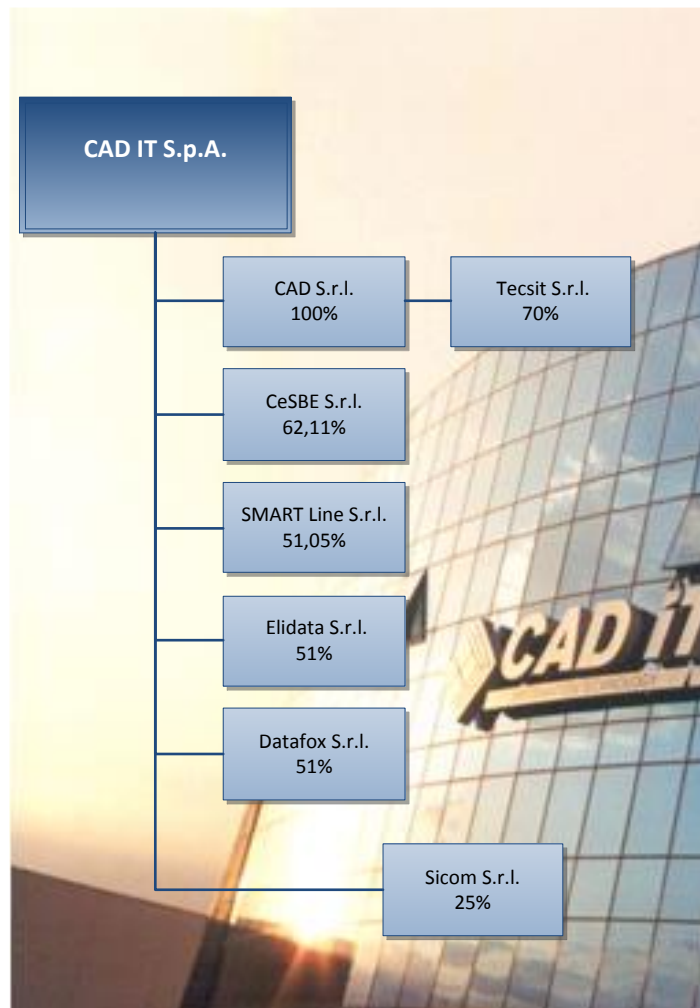

The main powers reserved in the statute to the Board of Directors are the examination and approval of the strategic, industrial and financial plans of the company; the purchase, sale, exchange or transfer of fixed assets and real estate rights; the granting of collateral on fixed assets; the set up of new subsidiaries and the take-over, acquisition or sale of corporate investments; the acquisition, sale, exchange or transfer of the whole company or of business lines; the underwriting of obligations, commitments and responsibilities which, either singularly or jointly with other connected negotiations, come to more than €4,000,000; the nomination of managing directors; the release of warranties and real or personal guarantees of any kind to the sum of more than €2,000,000 for each individual transaction and, if in the interest of subjects other than the Company and its subsidiaries, to any sum whatsoever; the examination and preventive approval of significant transactions including those with company related parties and company subsidiaries; verification of the appropriateness of the administrative and organisational structure and the general accounting, the internal control system and any conflicts of interest.

The Chairman and Managing Director, Giampietro Magnani, is authorised to perform all ordinary and extraordinary administrative duties, excluding only those which can not be delegated by law and those assigned to the Board of Directors by article 19 of the company by-laws.

The Vice-Chairmen Luigi Zanella, pursuant to article 20 of the company by-laws, carries out vicarious functions to those of the President in case of his absence or impediment. The managing director Luigi Zanella, will has full ordinary administrative power including the faculty to prepare reports and to order banking transactions, within the limits of account availability and credit worthiness with the power to act alone for each individual transaction to the amount of Euro 2,000,000 (two million) and with the joint signature of another managing director for each individual transaction to the amount of Euro 4,000,000 (four million); furthermore, the aforementioned director will has the power and faculty, with their single free signature, to purchase and/or sell registered assets, with the exception of boats and airplanes of any kind.

The Managing Director Paolo Dal Cortivo will have full ordinary administrative power including the faculty to prepare reports and to order banking transactions, within the limits of account availability and credit worthiness, with the power to act alone for each individual transaction to the amount of Euro 2,000,000 (two million) and with the joint signature of another managing director for each individual transaction to the amount of Euro 4,000,000 (four million). The said Managing Director will have ordinary administrative power to represent the Company in terms of relations with institutional investors and shareholders as well as with Borsa Italiana S.p.A. and Consob, by sending them communications and information, including anything required by the laws in force and/or the international best practice rules in respect of the laws and rules themselves and any internal regulations.

The Managing Director Giulia Dal Cortivo has been delegated to matters concerning the management of the Company's employees as well as the employees of its subsidiaries CAD Srl, Cesbe Srl, Datafox Srl and Smart Line Srl; the Managing Director, Giulia Dal Cortivo, has also been entrusted with the management - as the person in charge - of CAD IT Group's legal and corporate affairs and company secretarial and administrative matters.

CAD IT Group at 30/06/2016

PRELIMINARY REMARKS

This six-monthly financial report has been drafted in accordance with Leg. Dec. 58/1998 and subsequent modifications and laid out to conform to the provisions issued in art. 9 of Leg. Dec. no. 38/2005, as well as observing Consob regulation no. 11971 of 14th May 1999 and subsequent modifications and integrations.

The six-monthly financial report laid out to conform with the applicable International accounting standards recognised by the European Community as in accordance with the EC regulation no. 1606/2002 of the European Parliament and Council on 19th July 2002 and in particular with IAS 34 – Interim Financial Reporting. The report was drafted by applying the same accounting standards used for drafting the Consolidated Balance at 31st December 2015, with the exception of the items described in the explanatory notes – Accounting Standards paragraph, amendments and interpretations applied since 1st January 2016.

The six-monthly financial report includes the summarised six-monthly balance, an intermediary report on the management, the declarations provided for in article 154-bis, paragraph 5 and the auditing company's report on the aforementioned summarised balance.

Unless otherwise indicated, the monetary quantities in the accounting tables and those in the notes, are shown rounded off to the nearest thousand euro. The totals and subtotals of the statements presented are determined by rounding the sum of the point data. The percentage figures shown are calculated using the non-rounded off figures.

SUMMARY OF THE GROUP'S RESULTS AND DATA

	First Half 2016		First Half 2015		Variations

Employees (average number in the period)	645	630	627

INTERIM MANAGEMENT REPORT

This intermediary report on management accompanies CAD IT Group's summarised six-monthly balance at 30th June 2016 and contains references to important events that have occurred during the first six months of the financial period and their incidence on the summarised six-monthly balance, together with a description of the main risks and uncertainties that may occur in the remaining six months to come. The interim management report also contains information on the relevant and correlated party transactions as well as an indication of significant (or relevant) transactions that occurred up to the moment of drafting the report.

Information on CAD IT and Group's activities

CAD IT is the leader of a group that is one of the most dynamic organizations in the Italian information technology sector.

CAD IT was set up as a joint stock company under Italian law. The registered office and the administrative and main operating offices are in Via Torricelli 44/a, Verona. The company is registered in the Verona Company Register under no. 01992770238. Share capital amounts to € 4,669,600, fully subscribed and paid-in, and comprises 8,980,000 ordinary shares. There are no other action categories. These shares are nominal and cannot be divided. Each of them entitles to one vote in the ordinary and extraordinary meetings of the company and to the execution of all other corporate and property rights in accordance with the law and the company's by-laws. The company is listed in the STAR segment of MTA market of the Italian stock exchange, segment conceived for mid size companies that voluntarily comply with requirements of excellence in terms of information transparency, communication, liquidity of free float and Corporate Governance, in line with best international standards.

CAD IT S.p.A. is not subject to the control of any other company, as provided by article 2359 of the Italian Civil Code and it is fully responsible for defining its own general and operational strategic policies. CAD IT S.p.A. manages and coordinates its own subsidiaries.

The CAD IT Group operates in Italy with its own branches and companies in Verona, Milan, Rome, Prato and Padova.

A dynamic and innovative company ...

The group philosophy is that every customer situation is unique and for each of them will be sought specific solution. For this reason group's technology solutions are established on component-based architectures that allow for secure, phased and progressive implementation.

With over 600 highly trained professionals employed within the company, the aim of the Group is to harness innovation and technology to help the company run better.

... with a broad and impressive customer base

CAD IT serves demanding market-leading organisations across Europe.

Its customer base includes banking groups, national authorities, local authorities, consumer goods companies, insurance companies, outsource service providers and foundations.

Each day, its technology solutions support over 200,000 end-users in over 1,000 organisations with their essential tasks in Italy, Switzerland, Germany, UK and the Czech Republic.

... operating through a dedicated company network

During the years it has widened its product range through the continual increase in new skills, a careful strategy of acquisitions and partnerships, considerable investment in research and development and constant market trend monitoring, that has always favored the issue of products in line with the changing needs and anticipating needs.

The founding of new companies and other strategic purchases have enabled the Group to improve synergies and to enter new markets, e.g. business intelligence and control and management systems for banks, insurance companies, private and public institutions, innovative solutions to interconnect financial markets, SIM (securities

brokerage firm) and SGR (company asset management), ERP applications and solutions for local tax collection agencies.

... with market leading products based on reliable and flexible technology

CAD IT has proven and functionally-rich technology solutions and offers its customers true expertise in technology. With the gained experience and consistent R&D in technology design and application development, the group has the expertise to build reliable, user-friendly and highly scalable application architecture.

Based on an independent model platform, service oriented its architectures offer customers the flexibility of phased implementation within a technology framework that is designed for today and can evolve around their changing needs. The “lego” methodology, coupled with a broad range of services, facilitates the tailoring of common technological solutions to the customer’s situation.

... combining with a comprehensive set of services

The services offered are related to developed solutions in the following areas:

- project management;
- system integration;
- consultancy and training;
- customisation and change management activities;
- application monitoring & support through agreed SLA;
- multi-lingual, 24x7 Help Desk;
- regulatory support;
- application development;
- application maintenance;
- private cloud;
- business processing.

... and a laser focus on customer service

Guidelines, frameworks and specific toolsets are in place to ensure every aspect of work is linked to these needs from requirements and service planning, through solution development to deployment and support.

Software Development Centre of CAD IT supports all software releases, documentation and materials that allow to simplify the operation activities of its customers.

The Group developed a special single-point-of-contact (SPOC) Customer Support Framework for the management of support and maintenance activities including Service Desk, Incident and Problem Management, Change and Release Management.

Its main purpose is:

- to act as a single point of contact for the CAD IT software end-user;
- to manage the life cycle of user generated issues and service requests;
- to guarantee pre-agreed service levels;
- to organise and prioritise requirements;
- to keep end-users updated on progress.

... innovating together with a wide network

CAD IT invests heavily in R&D for its technology solutions.

Its capacity to innovate together with its clients is a compelling advantage. For many years now CAD IT adopted a collaborative research and development approach with customers, universities, regulatory authorities, consultancies, communities and technological and business partners.

With a growing user community of over 200,000 end-users, where customer demands and requirements constantly evolve, Group’s strength is the ability to deliver solutions that respond to our client’s needs and adapt to the changing market environment.

... offering constant improvement

The CAD IT Group offers solutions based on the know-how of a vast community of users and supports customers in achieving their own specific objectives with a personalised approach based on granular software components and tailor-made modular services.

Due to the inspiration we receive from our customers and believing firmly in creating stable and lengthy relations, we aim to evolve constantly by making every effort to find new methods, innovate our technology and support the professional growth of our own resources through training and experiential courses.

The Group is convinced that its commitment to understanding the customers' needs and to providing increasingly more efficient solutions is the true reason behind its managing to maintain customer satisfaction rate extremely high.

We believe that innovation does not simply end with the supply of a state-of-the-art technological solution, but is a continual process of customer support to provide solutions that evolve and adapt to changing market conditions. This is why the Group continues to provide support for all the releases and, although invites its customers to evolve, never obliges them to replace their software with updated versions.

By offering holistic services like system integration, training, consultancy, assistance and constant support, the Group is continually enriching its own know-how by increasing the added value of the solutions it offers to the customers.

FINANCE

Area Finanza, flagship product, is viewed as the gold standard on the Italian market, with about a 90% share of the Italian securities processing market, according to the estimate of the company.

Since 2006, with continuing product development, Area Finanza has now been implemented successfully internationally, at leading financial institutions in Switzerland, Germany, UK and the Czech Republic.

Area Finanza offers total automation of all processes relating to derivatives and securities in the following macro areas: Position Keeping, Custody and Administration, Corporate Actions, Order Management, Trading Rooms, Securities Master Database, Settlement, Asset Management, Reconciliations, REPOs, Know Your Customer, Financial Advice and Reporting.

Customers are banks, banking groups, insurance companies, global custodians, brokers, asset managers, IT and BPO service providers, finance companies, trust companies and banking foundations.

Within Europe, our application statistics for Area Finanza include:

- 1,000 financial institutions;
- 25,000 bank branches;
- 14,000 post office branches;
- 200,000 users;
- 25,000,000 security deposit accounts.

PUBLIC ADMINISTRATION

The Group holds a leading position in providing software solutions for Tax Collection in Italy.

Our SET suite for tax collection is the National IT solution being used by the Institutions that manage public tax collection.

Activity in this sector began in the 1980s and has been developed by constantly keeping up with the legal and functional evolutions in the management of both "voluntary" and "compulsory" tax collection.

Since 2006, in view of the ongoing decentralisation of local tax collection, CAD IT has made considerable investments in developing its FE suite for managing Taxation for Public Authorities, capitalising on its experience in Tax Collection at a central level.

FE offers avant-garde tools at the service of all types of central and local Authority for managing tax collection, from preparing "loading lists" up to payment collection and settlement. Furthermore, the FE suite includes planning and control solutions that improve the Authority's internal management, so that Public Administration can accompany the citizen through all the most important events of the public service lifecycle: from information services to the various payment means.

Customers are Authorities, Licensed Companies, Tax Collection Agents and Banking Groups that carry out Treasury and Tax collection services.

Taxation for Authorities (FE) and Tax Collection System (SET) are used throughout Italy and exclusively manage tax collection activities for the National Public Administration Service.

INDUSTRY

In addition, the Group boasts a long-standing activity in the industrial and the financial sectors and can count on the capacity to offer solutions for e-business, credit and industrial companies in constant evolution.

CAD IT is a reference point for companies producing the most famous "made in Italy" products: fashion and food. In these sectors, CAD IT aims at providing specific IT and business skills through software packages and services with high added value that ensure immediate benefits for its customers.

Customers are hundreds of companies dotted all over Italy with branches abroad and with a strong potential for internationalization. Companies that have grown with the collaboration of CAD IT in terms of modernising and reviewing their company procedures. With them were created organizational models so that decisions can be taken quickly and within economically sustainable time periods.

CAD IT, with the support of its strategic partners, is able to provide its customers with a complete range of services so that they can make the decisions that lead to creating advanced systems supported by the very best specific skills available on the market.

Hot topics

FINANCE DIVISION

IFRS 9

In July 2014, the IASB issued the new IFRS 9 accounting standard that legislates financial instrument classification, measurement, impairment and hedge accounting and which will replace the IAS 39 accounting standard. The IFRS 9 application range involves all debt and equity financial instruments that were already included in the IAS 39 scope. The new standard will come into force as of 01/01/2018.

The IFRS 9 will have a number of new aspects compared to the current IAS 39 standard:

- new Business Model concept;
- new binding rules for classifying financial instruments in terms of the SPPI test ("Solely Payments of Principal and Interest");
- new balance categories;
- new ways to measure financial instruments;
- new ways to calculate impairment.

These new entries in IFRS 9 will have a significant impact on Financial Institute Balances, especially in terms of a potentially considerable increase in Economic Statement volatility.

Furthermore, these new entries will also have heavy consequences on organisational procedures and company information technology systems.

In this context, CAD IT, thanks to its expertise and consolidated experience in developing IT solutions for financial instrument management, has defined its own Finance Area evolutionary strategy in order for it to be IFRS 9 compliant.

It is expected to provide the software to customers in the second half of 2016.

To optimise the quality of its offer, CAD IT has organised a work group with leading Italian financial institutions in order to compare the impacts of the new regulation as well as the relative solutions.

MiFID II – MiFIR

Banks and other investment companies operate in an environment with strict, complex and hard-to-interpret regulations. Several regulations (e.g. EMIR, BASEL III, CRD IV, IFRS 9, Market Abuse) affect the same operating processes.

In this context, the new European Union directives, MiFID II and MiFIR, will be coming into force as of 2018. This new regulation regards various operational processes and will impact on income sources such as commissions, incentives and financial product distribution.

The banks and investment companies need a comprehensive and modular MiFID II/MiFIR compliant solution that has a lesser impact on current processes and which allows large volumes of data to be managed efficiently and centrally.

CAD IT's solution for managing MiFID II and MiFIR obligations is flexible and covers all the regulatory areas: "customer protection", "markets" and "compliance".

CAD IT's solution is solid because it is based on existing products and founded on regulatory requirements shared by a work group that comprises all CAD IT's customers, including some of Europe's leading banks, and over 90% of the Italian banking market.

Master Data

After meticulous international market research into best practices and best available technologies, and following years of research and development in collaboration with a leading banking group, CAD IT has created Master Data. A robust, dynamic and pro-active Master Data that is able to rapidly evolve and adapt its own processes! Designed to meet the needs of a banking group which, in total autonomy, wants to configure, manage and monitor processes and the specificities of each Entity.

Master Data is user-oriented thanks to an active graphic interface, fitted with dynamic module loading, real-time validation, self-completion, contextual help windows and timely messaging, that also supports the user during every data process phase, thus increasing concentration and zeroing error percentages.

Master Data is quality-centric, based on an intrinsic data quality system that enables the constant data management, offering definition and configuration autonomy in:

- data acquisition processes through workflow definition and form design;
- data checking through data dictionary;
- proper usage of the data.

Master Data is migration-oriented, a unique product that brings with it the experience of a sustainable migration process which allows:

- new and "old" data to be constantly aligned thanks to a two-directional synchronisation process;
- applications that access "old" data to progressively migrate to the new data.

Cash & Liquidity Management - Basilea III compliant

Constant evolution in the Payment System world, globalisation and high market volatility make Treasury activities more and more complex and Treasury is forced to face difficult challenges on a daily basis: risk management, uncertainties concerning the quality of information gathered, processing of reliable forecasts and satisfying the current regulatory requirements set by institutional entities (like, for example, the Basel Committee of Banking Supervision, BCBS).

Underestimating these scenarios can lead to high risk in terms of wasting resources in activities with poor added value, running into pointless expenses linked to interest rates and not achieving cash flow objectives. It is therefore necessary to find a solution that would offer the greatest number of benefits and advantages to the user. A solution that would be able to respond, at any moment, to the most important questions in terms of liquidity management: What is the current Cash availability? Where is it? Which date does it refer to?

How much Cash availability do I need? Where and on which accounts? When will I need it?

CAD IT aims at determining factors to achieve this objective, in other words: detailed collection and management (also in real-time if possible) of all the necessary information, check functions that guarantee the quality of the data used, product adaptation to all possible operative configurations, maximum usability in order to reduce errors and increase user action effectiveness.

SPIKE, CAD IT's Cash & Liquidity Management, supports the Treasury in managing the Liquidity needed for all the Bank's or Financial Institute's activities. Adaptable to the organisational structure in terms of security/enablement and operative workflow, SPIKE interfaces with the Systems (Internal and External) that

operate on liquidity, providing an overall and detailed view of the Cash trend: End of Day, Intraday and Forecast, all supported by graphics and parameterisable alert functions. There is a Funding functionality which also acts automatically, processing transaction "proposals" (giros and transfers) on the basis of rules linked, for example, to balance and average stock. The user can modify and/or confirm these proposals which, if sent to the Systems of reference, will immediately be used by the application to calculate forecasts.

Report management is an important advantage that SPIKE offers to the Liquidity Manager in order to meet accounting needs at all organisational levels as well as everything foreseen by the regulations (e.g. Central Banks, BASILEA 3, etc.). Print-outs can be produced automatically or on command by the user who, starting from all the information in the database, can manage reporting through pre-defined models or in a personalised manner. The reports can be edited on the basis of all the most commonly used layouts (pdf, csv, xls, txt, etc.).

BitFinder

Bitfinder is a full text search engine that searches contents that may be present in any application, system, network or platform. BitFinder replaces the various tools that provide vertical search services on single applications with one single system able to carry out searches and group information and content from the most varied internal and external sources.

A powerful syntax allows specialised and personalised searches to be carried out for different contexts through the use of words, phrases, proximity operators, logic operators, regular weights and expressions.

Third party applications therefore have the chance to enrich their own functions by integrating BitFinder search services through the use of the API web service.

A security system based on Roles, ensures that only those effectively authorised will be able to see the information returned by the search.

The web administration module provides simple and complete management and parameterisation of all the functionalities.

Intelligo

Intelligo is a massively multi-lingual CMS (Content Management System), designed to provide total separation between the contents and their typographic or multi-media presentation. In order to manage structural and graphic aspects, it can operate in combination with the most common open source CMSs (WordPress, Drupal, Joomla). Moreover, it allows the contents themselves to be further enriched with semantic tags and micro-data according to Schema.org and RDF standards.

The content in Intelligo is pure in that it is free of font, colour or capital letters, as is its translation in one or more languages, and is a value since it can be re-used and given significance. This characteristic will provide the basis for publishing and websites in the future (multi-media publishing and semantic web), but it is now already possible to take advantage of the potential in SEO terms with Google, thus obtaining better search positioning and more effective snippets for our own web pages. Furthermore, being able to re-use "meaningful sentences" can lead to significant savings in translation costs.

Viewing the contents in Intelligo is controlled by rules that allow articles to be personalised according to user profiles, business policy management, regulations and laws, by means of an interpretation engine applied to user questionnaires.

SOS

Banca d'Italia has reviewed the entire collection and management system for suspicious transaction alerting. This new system aims at improving the quality of the alerts by ensuring greater uniformity and completeness as well as shortening the analysis and investigation procedures. An important new factor in the way that information flows with alerting parties are exchanged is the introduction of the standard XBRL format and the use of the Banca d'Italia portal.

The SOS system is natively integrated within CAD IT's "Anti money laundering" module but can also be independently interfaced with the bank's internal systems.

CAD IT's SOS system aims at making it easier to collect and integrate the data required for executing an alert by

providing access to external files such as General Data, the Single Computerised File and the "unexpected" lists in the "Gianos" procedure.

An alert follows a route that generally starts from the branch in which the minimal data is collected, then goes to the central offices responsible for inserting other additional elements and ends with the production of files in the XBRL format, ready to be sent to the UIF.

The SOS software is able to memorise each individual stage, thus ensuring that the entire operation is archived.

TDOC@Web

In a world that is becoming increasingly submerged by information, constant attention to digitalisation issues is now necessary with a view to a simple and effective re-organisation of know-how. It is therefore essential to have the tools that are able to favour data and information exchange in a structured yet flexible manner.

TDOC@Web is CAD IT's tool that allows Bank, PA Office and Company users to quickly, safely and automatically transfer large volume data flows between different platforms and, more generally, between environments where controlled flow exchanges are essential for carrying out their service.

The instrument uses standard methods like MQ Series, Thema Spazio, Posta Elettronica Certificata, Web Services, etc.

Specific additional modules manage functionalities connected to "Digital Signatures" for user identification through Smart Cards, to verify documents that have been signed digitally and to affix Digital Signatures.

The system foresees functionality through the Internet/Intranet for checking, supervising and managing the users and for standard or personalised operative flows.

EMIR: Reporting Compliance for Derivative Trades

According to the EMIR regulation, financial and non-financial counterparties must ensure that the details of any derivative contract they may have concluded as well as any subsequent modification or termination of said contract is reported to a trade repository, no later than one the working day following its the conclusion, modification or termination of the contract.

The reporting obligation will take effect as of July 2013 for derivatives on interest and credit and as of January 2014 for derivatives on all other asset classes.

CAD IT's Trade Repository Reporting allows to introduce new reporting logic into your current applications.

Trade Repository Reporting captures operations in real time from existing Front Office Systems (e.g. MUREX, Kondor+, Bloomberg, direct market connection, etc.) and from the Area Finanza Suite, elaborates the data and sends all necessary messages to the Trade Repository. The monitoring screen shows the status of all messages for all contracts.

Through CAD IT's partnership with REGIS-TR (www.regis-tr.com), the European trade repository, launched by Iberclear (BME) and Clearstream (Deutsche Boerse Group), we are able to supply a complete service.

Market Abuse Sensing

Market Surveillance Authority regulations are becoming increasingly more severe and extensive. Applying them effectively while limiting the impact in terms of cost and application complexity, is a challenge that can be faced with automation.

CAD IT has developed a tool for Market Abuse Sensing (compliant with Italian and European laws) that is able to identify suspect transactions of market manipulation and information abuse (insider trading). The application also manages a register of interest conflicts.

The platform totally automates the processes for acquiring data for processing and has automatic search functions with a high number of variables to find potentially suspect transactions. The effectiveness of investigation into automatically identified transactions, in order to establish the soundness of the suspicion and to notify any transactions to the market surveillance authorities, is supported by a vast information workflow that allows the user easy and fast management of investigation activities.

Local Authority Treasuries

Local Authority Treasuries: software procedure for the total automated management of Local Authority Treasury and Funds for which the law imposes the figure of Treasurer or Receiver (Local Authority, Balances, documental and non-documental cash collection and payment management). The application can be integrated with Teso@Web, a product that, through Internet and by using special consultation functions, allows Local Authorities to swiftly access their own data. The SIOPE and UNIFIED TELEMATIC PUBLIC TREASURY procedures are available for Banca d'Italia reporting.

PUBLIC ADMINISTRATION DIVISION

Italian Public Administration is experiencing considerable change as a result of a similar radical transformation of the country's social network.

Immigration, globalization, computerization and integration are just some of the important topics that Public Administration is having to deal with. While these themes may represent problems, they can also provide the chance to improve the services offered to the citizens.

One of the key factors is the use of new technologies, which are the first steps towards a new millennium. Not just tablet PCs and smartphones, but also self-service terminals and call centres. Not just social networks and peer to peer, but also, and above all, company clouds and public service networks.

For this reason, CAD IT has created an integrated and multi-lingual solution to automate information services, procedures, policies, regulations and laws within large organizations and government bodies.

The CAD IT solution is based on a repository where all the information is organized in such a way that the engine interpreting the operation can recognize the citizen, carry out information filtering, even translate from and to the desired language and then provide the requested service.

With the CAD IT solution, the Public Administration office is guaranteed fewer costs and less conflict and stress for its front desk operators as well as the possibility to monitor the level of services carried out. For the citizens, the solution means a much faster, more personalized, timely and modern service.

INDUSTRY DIVISION

In the period collaboration activities with INFOR were continued.

This year once again saw CAD IT alongside VENISTAR in sponsoring the "FashionAble World 2016" event that was held in Verona on 19th May 2016: the theme of the event was "Innovation for Fashion: digital customer experience in an omni-channel world".

A day devoted to Fashion & Luxury Brands to analyse and further investigate the best Digital Customer Experience strategies to put into action in order to involve the omni-channel Customer, by creating exclusive and personalised content throughout the entire purchase procedure and increasing Brand Awareness.

Analysis of the consolidated income results

	First Half 2016		First Half 2015		Variations	
	€/000	% PV	€/000	% PV	€/000	%
Income from sales and services	26,376	91.2%	27,531	93.0%	(1,155)	(4.2%)

Revaluations and depreciations	246	0.9%	243	0.8%	3	1.4%
Pre-tax result	806	2.8%	721	2.4%	85	11.7%
Income taxes	(302)	(1.0%)	(295)	(1.0%)	(6)	(2.1%)
Profit (loss) for the period	504	1.7%	426	1.4%	79	18.5%
Profit/(loss) for the period attributable to:						
Non-controlling interests	(18)	(0.1%)	160	0.5%	(178)	(111.0%)
Owners of the parent	522	1.8%	265	0.9%	257	96.8%
Weighted average number of ordinary shares outstanding	8,980,000		8,980,000			
Basic earnings per share (in €)	0.058		0.030			

The CAD IT group closed the first half of 2016 with results and profit margins showing a slightly improvement compared to the same six months of 2015. Net profit was Euro 504 thousand compared to Euro 426 thousand of previous period.

The value of production for the period, a slight decrease (-2.3%) compared to the previous year, was mainly due to revenues from sales and services of Euro 26,376 thousand (a 4.2% decrease compared to Euro 27,531 thousand in the first half of 2015) as well as by increases in fixed assets for internal works of Euro 2,478 thousand (increasing compared to Euro 1,966 thousand in the first half of 2015) for the use of resources in the development of new procedures and the Group's own software.

The Euro 23,575 thousand added value showed an increase compared to the previous period (Euro 22,704 thousand), with a 81.5% marginality on the value of production (76.7% in the first half of 2015).

Purchase costs to the value of Euro 138 thousand showed a decrease compared to Euro 183 thousand of first half of 2015.

Service costs of Euro 4,795 thousand decreased by 23.8% compared to 2015 (equal to Euro 6,292 thousand), mainly due to the lower use of external collaborations dedicated to the activities on customers.

The personnel costs of Euro 18,967 thousand recorded a slight increase compared to Euro 18,625 thousand in the first half of 2015. The average number of employees during the first half year was 645 employees (compared to 627 employees in the same half of the year 2015). The increase in labour costs, compared to the first half of previous year, is mainly due to the increase in the average number of employees.

Other administrative costs came in the first half to Euro 1,114 thousand, increasing compared to Euro 1,015 thousand in first half 2015.

The EBITDA Gross Operational Result stood at Euro 3,494 thousand (equal to 12.1% of the value of production) compared to Euro 3,065 thousand of first half of 2015 (equal to 10.4% of the value of production).

Amortization contributions for the period amounted to Euro 2,606 thousand in regard to intangible assets and Euro 261 thousand for tangible assets, compared to Euro 2,342 thousand and Euro 246 thousand in the same period 2015. The amortization of intangible assets increased compared to the previous period due to the beginning of the amortization schedules of software procedures, concluded in previous years, which have become available for use and for sale.

The EBIT operational result for the six month period was in credit by Euro 550 thousand, an increase (+32.2%) compared to Euro 416 thousand in the first half of 2015.

The result of the financial management recorded revenue of Euro 35 thousand and financial expense for Euro 25 thousand, compared to 78 and 16 thousand Euro in the first half of last year.

The ordinary result was positive for Euro 560 thousand compared to Euro 478 thousand in the first half of 2015.

The revaluations and depreciations of the period refer to the share of profit/loss of associates, calculated with the equity method, amounting to Euro 246 thousand (Euro 243 thousand in the first half of 2015)

Income before taxes and minority interests was positive for Euro 806 thousand (2.8% of the value of production), compared to the same period of the previous year of Euro 721 thousand (2.4% of the value of production).

Taxes impact on income for Euro 302 thousand, compared to Euro 295 thousand in the first half of 2015, resulting in a profit for the period of Euro 504 thousand, an improvement (+18.5%) compared to Euro 426 thousand in the first half of 2015.

The result for the period attributable to owners of CAD IT was positive for Euro 522 compared to Euro 265 thousand in the first half of 2015; the result attributable to minority interest was negative for Euro 18 thousand, compared to a positive result of Euro 160 thousand in the first half 2015.

The short-term situation

The global economy continues to show weakness. The consultative referendum of 23 June in the United Kingdom, in which the majority voted for the country to leave the European Union, has created an unprecedented situation in the history of European integration whose ultimate repercussions cannot readily be foreseen. The IMF has judged the resulting uncertainty to pose a risk to the global economy. In fact the Brexit result increased the volatility of international financial markets and, although its consequences are difficult to judge, it has heightened the risks for global growth, the outlook for which is already suffering from weakness in the emerging economies.

In the first quarter of 2016 euro-area GDP accelerated (0.6 per cent on the previous quarter) and now stands above the level recorded prior to the financial crisis. Domestic demand is still the main driver of the recovery: a further increase in investment flanked stronger household spending. GDP accelerated in all the main euro-area countries, to quarterly growth of 0.7 per cent in Germany, 0.6 per cent in France and 0.3 per cent in Italy. Into the second quarter economic activity in the euro area appears to have increased, although at a slower pace than in the previous quarter.

The recovery has proceeded gradually in Italy, driven by domestic demand, even though exports have suffered from the weakness of non-EU markets. In the first quarter of 2016 GDP grew by 0.3 per cent compared with the fourth quarter of 2015, when it had increased by 0.2 per cent; after gaining for the fifth consecutive quarter, output is still 8.5 percentage points below the cyclical peak reached at the beginning of 2008. Growth was sustained over the winter by national demand. The continuing recovery in household spending (0.3 per cent, as in the fourth quarter of 2015) was accompanied by a further increase in investment (0.2 per cent), involving all the main components except spending on construction.

The strengthening of GDP was held back by foreign trade: the fall of 1.5 per cent in exports, which wiped out the increase recorded in the previous quarter, was more pronounced than that in imports (0.9 per cent). Following the temporary stagnation recorded at the end of 2015, the value added in industry excluding construction recorded its highest increase since the summer of 2010. There was also modest growth in the services sector, despite the persistent weakness of business services. The cyclical indicators suggest that, as in the euro area as a whole, GDP expanded more slowly in the second quarter than in the first, partly as a consequence of the large losses recorded by the stock market following the referendum in the United Kingdom.

Though more slowly than in the previous year, when social contribution relief on new hires was applied in toto, the rise in the number of persons in work continued in the first quarter of the year. The overall unemployment rate remained stable owing to the increase in labour market participation, but unemployment among young people diminished further.

According to consolidated quarterly financial statements of the five largest Italian banking groups, bank's operating profitability was down in the first quarter of 2016 compared with the year-earlier period: annualized ROE fell to 3.5 per cent from 6.8 per cent in the first three months of 2015. With net interest income generally stable, other revenues declined by 14.0 per cent as a result of the drop in fee income. Gross income decreased by 7.6 per cent. Operating profit diminished by about one third, partly owing to the rise in costs. Loan loss provisions were basically unchanged.¹

For the first time in years, the Italian Ict market has started to grow again, even if by only +1%, reaching a total of Euro 64.9 billion in 2015. The growth rate of Italian Ict is now in line with the European average. The trends are satisfying in all segments. The negative trends in network services and Tlc have also decreased. The increase in the use of cloud technology has led to a recovery in professional Ict services. However, these services are different in nature, duration and economic value than those more typical of the traditional It of the past. Clouds are becoming increasingly more strategic. Infrastructure services (Infrastructure-as-a-Service) continue to be in demand, but "Platform-as-a-Service" and "Software-as-a-Service" clouds are increasing at a greater rate. In short, on the one hand, the cloud is becoming a development, test and up-and-running platform that is much faster than new application services, while on the other, thanks to the SaaS model, it also allows SMEs to access mission-critical applications, like Erps, as a service. In fact, the technology is going from the classic paradigm project to the service paradigm. In this new reality, part of classic consultancy services is penalised because the answers it provides answers are too slow or complex. However, the number of service suppliers able to help companies to take better advantage of the value of clouds is increasing. The vendors, therefore, instead of receiving considerable amounts from projects with 3 to 5-year depreciations, now have more limited and more frequent payments, spread over time. In the mean time, the Tlc world shows a growth in its dynamism. 2015 saw a 10% increase in smartphone sales while, compared to 2014, the increase in fixed broadband access remained the same (more than +2%) and the number of mobile broadband users continued to grow (+9%). The plus sign is also back in front of the hardware world, where highly contrasting dynamics are being witnessed. The increase in the demand for network infrastructures is extremely interesting since it provides access to external services and applications. This context includes the effort of carriers to install broadband and ultra-broadband networks outside of urban areas. Traditional hardware components, like PCs (-11%) and laptops (-15%), however, are suffering.

Overall ICT market forecasts in Italy, under constant macro-economic scenarios, can see a growth of 1.5% in 2016, 1.7% in 2017 and 2.0% in 2018. Despite these encouraging figures, the rate at which digital innovation is growing in Italy is still too slow. It is happening too unevenly and is still a long way off understanding the transformation that could have a profound effect on the country, change competitive balance and speed up growth. Above all, small and medium-sized enterprises, which make up 99% of our productive network and contribute to over 50% of our GDP, as does a large part of Pa, continue to stay on the sidelines of digital evolution.²

Significant events of the period

In February 2016, CAD IT signed a strategic agreement with Spafid Connect, a company within the Mediobanca Group which provides application development activities and solutions with high technological content in the shareholder and corporate service sector on behalf of listed Issuers. With this ten-year agreement, Spafid Connect and CAD IT intend to promote their respective commercial relations with bank and insurance company clients, in order to offer a unique and innovative service also by integrating CAD IT's Finance Area product with Spafid Connect's Issuers platform. The agreement is of strategic importance to CAD IT since, besides strengthening its own positioning on the banking and insurance market, it also creates synergies in research and development costs. In April CAD IT acquired 30% of the capital of the Spanish company Software Financiero Bolsa and signed an agreement to increase to a majority share in 2019.

Founded in 1994 and with registered offices in Madrid, SFB is the leader in Spain in the supply of front, middle and back office software solutions with which settlement instructions amounting to over 50% of trading volumes negotiated on the Madrid Stock Exchange are processed daily.

SFB closed its 2015 financial period with revenues of Euro 4.8 million, a net profit equal to Euro 1.1 million and with a Net Financial position in credit by Euro 2.4 million.

For the 30% acquisition of SFB's capital were paid in cash Euro 250 thousand at the first closing. Payment of the definitive price will take place after the closure of the 2018 balance (second closing) and will be calculated on the basis of the results that SFB achieves over the 2016-2018 financial periods, with a minimum value of Euro 1,650 thousand. At the second closing, CAD IT will have the option to acquire further shareholdings to a controlling share of 51%, or up to 100% of the capital depending on the right of SFB's current shareholders to exercise a PUT on the remaining 49%. CAD IT will have alternatively opportunity to exercise a PUT option to assign again the 30% share capital acquired to the sellers, renouncing to the amount of Euro 250 thousand already paid.

With this deal, CAD IT further strengthens its presence on the financial software market in Europe and confirms its active interest in expanding onto the Spanish market, offering with SFB highly innovative products already in use at 90% of Italian banks and at Swiss, German, British and Czech Republic customers.

This agreement provides CAD IT with important opportunities to increase revenues due to:

- SFB's considerable commercial and technical presence in Spain and Portugal;
- SFB's existing customer portfolio consisting of about 40 financial institutions to whom CAD IT's products, complementary to those of SFB, could be offered;
- cross selling opportunities with SFB products to CAD IT customers;
- the credibility of both brands on the market.

On 28th April 2016, the Ordinary Shareholders' Meeting approved the Annual Financial Statements at 31st December 2015 and decided the distribution of an ordinary dividend of Euro 0.15 per share. The dividend will be paid from 11th May 2016. Dividend payment resulted in a cash outlay of Euro 1,347 thousand. The Shareholders' Meeting also approved the first section of the Remuneration Report ex article 123-ter of Leg. Dec. 58/1998 (available in the Company's website).

Activities regarding the development and sale of new products for both traditional and new types of clients continued throughout the period.

Research and development

CAD IT Group dedicates a significant part of its activities and resources to conceive, create and develop their own software, which will either be licensed out to clients or directly used for product development and the provision of service to its customers.

In particular, activities for the realization of new modules to increase the functional and/or technological development of the considerable range of software installed, with the purpose of consolidating traditional business, diversifying the Group's offer with new products and towards those sectors bordering on the ones in which it is already present and to new markets abroad, are still underway.

An important development project concerns the evolution of the *Suite Area Finanza*, made up of independent and integrated modules that can each carry out their own specific activities and interface with others to ensure high

standards of efficiency in the management of data, avoiding duplication, in perspective of simplifying the product and the method of release. The evolutions allow to make the Suite even more attractive for the international market. Development and innovation activities for the Suite is particularly intense with the aim to improve user experience and create new functions or modules required by the national and international markets, like, for example:

- Easy Action, a new generation, comprehensive platform for the controlled end-to-end management of corporate actions and income.
- Position Keeping: module dedicated to recording the events/movements and able to update the positions in real time, manage the process of completing tasks for each event (taking care to enable the modules of competence for settlement, taxation, corporate actions), make accounting records and prepare reports of supervision.

CAD IT, in activities aimed at developing its own range of products, is also creating solutions linked to the new laws (for example further wave provided by Target 2 Securities).

Another important ongoing development project regards the new General Data (Anagrafe Generale) product, a modern, technologically avant-garde, flexible and versatile solution, which will make it easy to adjust to constant variations in regulations and in the commercial or operative needs of banking institutions. Considering the centrality and criticality of the process, which is one of the primary data sources for the entire banking information system, thanks to the tools being developed, CAD IT will be able to offer gradual data migration within its implementation projects, which will include a period of co-existence and synchronisation between the old and new data system, in order to allow integration and interfacing with the system's other processes as well as standardisation of the data to be transferred into the new data file.

Activity in the production of specialized modules for the business intelligence (Managerial Information System) area is also continuing, especially in regard to risks, fraud and long-distance control.

The product has been developed and enhanced with a new Dashboard, acquiring a new highly end-user connotation, characterized by a very timely look & feel, flexible and easy to use, while the editors dedicated to administrators and technicians are separated and specialized.

Investments

Summary of investments	First Half 2016	First Half 2015	Variations	Year 2015
Intangible fixed assets	47	147	(100)	165
Intangible assets under development	2,478	1,966	513	3,856
Property, Plant and equipment	397	399	(2)	1,708
Total investments in tangible and intangible fixed assets	2,923	2,512	411	5,729

Investments in tangible and intangible fixed assets made by the consolidated companies in the first half 2016 amount to Euro 2,923 thousand, compared to Euro 2,512 thousand in the first half 2015.

The voice assets under development relates to investments in development of software procedures under construction both for sale and for in-company use. Particularly ongoing intangible asset costs refer to the use of the Group's internal resources for the development of its own software which will either be licensed out to clients or used for the Group's activities. The amount of investment derives from strategic decisions taken by the Board of Directors and management, who have approved the development of a large number of products, projects and new technologies in order to be ready for development lines in the sector and to be able to propose an updated range of products that can quickly satisfy market demand.

Related parties transactions

Transactions made with third parties, including infra-group transactions, are neither atypical or unusual since these transactions are a normal procedure within the activities of the Group's companies. The same are governed by

market conditions bearing in mind the characteristics of the goods and services concerned.

Information on relations with third parties, including that required by the Consob Communication of 28th July 2006 and subsequent integrations, is shown in the Half year Financial Statement Sheet Notes.

Relationships with Group companies

During the financial period concerned, the Group's companies carried out operations with the controlled companies and businesses subject to CAD IT control. The patrimonial and economic effects of the operations carried out between companies consolidated with the integral method have been omitted in the consolidated financial statement with the exception of:

- services concerning the development of software procedures to be sold or instruments for the traditional activities of the Group's companies that are registered among intangible fixed assets;
- other operations, of insignificant amount, regarding the assignment of instrumental assets for the purchaser.

Relationships between the Group's companies are governed on the basis of contractual relations drawn up by the respective administration organs bearing in mind the quality of the assets and services involved and the competitive conditions of the market and adapting the interests of the Group.

The table below gives a summary of the income and service performances, as well as the credit and debit position of all the Group's consolidated companies, as of 30/06/2016:

<i>Company</i>	<i>Costs</i>	<i>Turnover</i>	<i>Financial expenses</i>	<i>Financial income</i>	<i>Receivable</i>	<i>Payable</i>
CAD IT S.p.a.	9,566	817	2	-	2,769	16,355
CAD S.r.l.	512	6,312	-	-	9,938	2,159
CeSBE S.r.l.	317	1,605	-	2	4,753	736
Smart Line S.r.l.	49	806	-	-	1,336	69
Elidata S.r.l.	10	782	-	-	779	119
Datafox S.r.l.	21	154	-	-	388	56
Tecsit S.r.l.	1	-	-	-	-	469
Total	10,476	10,476	2	2	19,963	19,963

There have been no abnormal or unusual transactions between the CAD IT Group's companies in this financial period. CAD IT S.p.A.'s relations with its subsidiaries are shown in the separate CAD IT S.p.A. Financial Statements attached to this report.

Reconciliation of equity and profit of the parent company

The following table shows the reconciliation figures of the equity and the consolidated financial result with those of CAD IT S.p.A.³

³ In accordance with Consob communication no. 6064293 of 28 July 2006.

	Equity	Result of period
Equity and result of the controlling company for the period concerned	53,702	725
- difference between the entry value of the consolidated holdings and the pro quota value of equity	(9,174)	
- pro quota results of the subsidiary/associate holdings	191	191
- consolidation difference: Goodwill	8,309	
- subsidiary/associate dividend elimination		(586)
- infra-group margin elimination	(1,515)	46
- assessment of associate holdings with equity method	514	146
Total equity and consolidated result of period attributable to owners of the parent	52,026	522

Corporate Governance and Internal Control System

CAD IT considers and defines its Internal Control System as “a set of rules, procedures and organisational structures aimed at achieving, by means of a suitable identification, measurement, management and monitoring process of the principle risks, the running of a healthy, correct and coherent business with pre-established objectives”. The internal system for managing risk and control in financial information technology is a constitutive part of a broader Internal Control System. This system also aims at guaranteeing trustworthiness, accuracy, reliability and timeliness of the company and the Group’s financial information technology.

The Internal Control System is the mainstay on which *Corporate Governance* stands and is the catalyzing element of all subjects and functions that, each in their own way, contribute to the healthy, correct and coherent running of the business in order to give maximum sustainable value to every activity within the organisation.

Essential parts of the Internal Control System are the Code of Ethics and the Management and Control Organisation Model adopted by the Board of Directors in accordance with the norms concerning “Company administrative responsibility rules” in Leg. Dec. no. 231/2001 and subsequent modifications. The Model adopted also includes the Health and Safety at Work System in accordance with the UNI/INAIL guidelines which represent a best practice standard of reference for compliance to the provisions in Leg. Dec. 81/08.

The system of corporate governance adopted by CAD IT SpA is the traditional one.

CAD IT adheres to the Code of Conduct for listed companies issued by the Italian Stock Exchange (the “Codice di Autodisciplina”), available on the website of the Italian Stock Exchange.

In compliance to the legal obligations, the Board of Directors annually approves the Corporate governance and property asset report, in accordance with articles 123 bis and 124 ter TUF and 89 bis Consob Issuer Regulations, in order to provide an adequate description of the corporate governance system adopted, information on property assets and adhesion to Corporate Governance regulations. The report is published and is available for public viewing in the Investor Relations sector of the company’s Internet site: www.caditgroup.com. Please refer to this document for further details on governance and the Internal Control System of CAD IT and of the Group.

Main risks and uncertainties to which CAD IT S.p.A and the Group are exposed

The Company has an internal control system made up of a set of rules, procedures and organisational structures aimed at achieving the healthy and correct running of the business also through a suitable process for identifying, managing and monitoring the principle risks that could present a threat to achieving company objectives.

This paragraph describes the risk factors and uncertainties relating to the economic-legal and market context and which can considerably influence the Company’s performance; the specific risks that can determine the generation of obligations within the Company and the Group are, however, the object of evaluation when determining the relative earmarking and are mentioned in the balance notes together with the potential liabilities found. Additional risks and uncertain events that cannot be foreseen, or are considered improbable at the moment, could still affect the activities, the economic and financial conditions and the prospects of the company and the Group.

CAD IT adopts specific risk factor management procedures aimed at maximising the value for its shareholders by

activating the necessary measures to prevent any risks inherent to the Group's activities.

CAD IT S.p.A., in its position as Parent Company, is exposed to the same risks and uncertainties described below to which the entire Group is exposed.

External Risks

Risks connected to the general conditions of the economy and sector

The information technology consultancy market is linked to the economic trend of industrialised countries where the demand for highly technological products is higher. A continuation of the weak economic global situation at both a national and/or international level could reduce demand for the Group's products with a consequent negative effect on the economic, patrimonial and financial situation of the Group itself.

The main market outlet in which currently the Group deals is the banking and finance sector. As of 2008, global financial markets were subjected to strong turbulence which led to a marked slowdown of the economy. The global economic recession of 2008 and 2009 which practically affected all geographical areas and all economic sectors of more developed countries, led to a sharp contraction of demand. The latest periods showed weak signs of global recovery, but the economic projections are still uncertain. A prolonged continuation of this notable weak situation, or an even further degeneration, could cause a negative effect on the economic, patrimonial and financial situation of the Group.

Risks connected to the rapid evolution in technologies, customer needs and reference norms

The sector in which the Group operates is characterized by fast and complicated technological changes and a constant development in skills and professionalism. Furthermore, an increase in customer needs, together with any changes in the laws, means that the software for the banking sector and other financial institutions has to be constantly updated.

The Group makes substantial investments in the development of new projects and new technologies, not only in order to promptly satisfy market demand, but also to anticipate development lines by proposing a range of new products as a factor able to influence, in turn, the type of user demand. Therefore, a reduction in customer tendency towards buying the new technologies offered could expose the Group to the risk of not earning enough to cover the investments sustained. These investments cannot, however, guarantee that the Group will always be able to recognise and use innovative technological instruments, exclude the risk of the obsolescence of existing products or ensure the Group's ability to develop and introduce new products or renew existing ones in good time for the customer and adequately for the market. The above-described situations are a significant potential risk for the Group's activities and its economic and financial results.

Risks connected to the high competition in the sector in which the Group operates

The Information Technology market is highly competitive. Some competitors could try to expand and damage the Group's market share. Moreover, the intensification of competition levels and the possible entry into the Group's reference sector of new subjects with good human resources, financial and technological backing that can offer more competitive prices, could influence the Group's activities and the possibility to consolidate or widen its own competitive position in the sector with consequent repercussions on the Group's activities and its economic, patrimonial and financial situation.

Risks connected to protecting technological property

The Group's procedures and software programmes are protected by Italian copyright laws. Furthermore, the Group owns the exclusive rights for the economic use of the programmes and procedures which it has registered in the Special Public Register for Processors as the SIAE – Italian Society for Authors and Editors.

The management also maintains that the technological level of the products the Group offers, together with the technical knowhow needed for their constant and progressive use and updating, are in themselves factors able to limit any risks connected to the appropriation of significant competitive advantages on the part of potential and

current competitors. Nevertheless, it cannot be said that the protection recognised by Italian copyright laws excludes other operators in the sector from developing, entirely on their own, similar products or duplicating the Group's unregistered products or designing new ones able to copy the performances and functions without violating the Group's rights. Furthermore, the Group's technology could be exposed to acts of piracy by third parties.

Internal Risks

Risks relating to dependence on key personnel

The success of the Group depends appreciably on the ability of some key figures who have made a significant contribution to its development i.e. its own executive managers and other management components with many years of experience in the sector. The loss of one of the aforementioned key figures' services without an adequate replacement could have negative effects on the Group's prospects, activities and economic and financial results. Moreover, the Group's business is strongly characterised by the extremely high technical skills of its staff. Therefore, the future success of its activities largely depends on the continuity of the functions carried out by the currently employed specialized technicians and collaborators as well as the ability to attract and maintain highly qualified staff.

In the Information Technology sector, staff costs are a critical development factor. Any difficulties that the Group may face in managing staff could produce a negative effect on its activities, its financial conditions and its operative results.

Risks connected to sale times and implementation cycles

The management of sales activities for the Group's software products is normally rather lengthy, especially considering that the potential advantages of using the Group's products have to be illustrated and training activities at the customer's premises so that the products are used correctly have to be carried out. Negotiations and the consequential execution of product sale activities usually take a period of time that ranges from a few months to a whole year. Moreover, the implementation process for the Group's products often involves the customer's investment in terms of staff and money which can extend over time. Sales activities and adjustment cycles of the product to the customer's information technology system are subject to potential and determining delay such as the completion of the implementation process of the product itself, unexpected events that the Group cannot control, like sudden limitations in the customer's budget or company renovation operations or, more generally, the complexity of the customer's technical requirements. Any delays due to extended sales cycles or referable to the product's use on the part of the customer, could influence the Group's activities, financial situation and operative results.

Risks connected to customer dependence

The Group offers its products and services to small, medium and large companies operating in different markets. A significant part of the Group's revenues is concentrated on a relatively small number of customers, the loss of which could therefore have a negative effect on the Group's future activities and economic, patrimonial and financial situation.

However, the management maintains that the Group's results do not significantly depend on any specific customer in particular because these customers update their information technology systems at different times and this operation takes rather a long time.

Risks connected to internationalization

The Group has made significant efforts in recent years in terms of its own internationalization strategy and expects that an increasingly large part of its revenues will be generated from foreign customers. The Group could therefore be exposed to the risks related to internationalization as those relating to changes in their economic, political, fiscal and local law conditions, as well as variations in the domestic currency trend, should the country concerned be outside the Euro area. The occurrence of unfavourable development in these areas could have a negative effect

on the Group's prospects and activities.

Risks connected to breaches of contract and potential liabilities towards customers

Highly complex software products like those offered by the Group can, even if duly tested, reveal some defects and anomalies during the installation phase and while integrating with the customer's information technology system. These circumstances can cause damage to the Company's image and its products and also expose the Company to claims for damages and the application of contractual penalties due to not respecting deadlines and/or the agreed qualitative standards.

Furthermore, the Group could find itself having to invest considerable resources to carry out corrective interventions and be obliged to interrupt, postpone or cease the supply of its services to the customer.

To date there have not been any significant events of this kind that have determined any remarkable controversy in customer relations.

Financial Risks

Credit risks

The Group mainly operates with banks and service companies controlled by banks, financial institutions and insurance companies, tax collecting agencies and public administration offices, and, generally speaking, customers with proven soundness and solvency, which is the reason why, in past financial periods, the occurrence of losses on credits always has been relevantly insignificant. The Group does not have a significant concentration of customer solvency risk. For commercial reasons, specific policies aimed at monitoring times of collection of credits, also for important amounts, that, following previously revealed operative risks, could undergo delays, are adopted.

Liquidity risks

Liquidity risks are linked to the difficulty of finding funds to finance obligations. The availability of liquid assets and the ability to generate positive cash flows make the risk of not being able to find enough financial funding to satisfy the obligations and needs of Group operations highly unlikely. Cash flows, funding requirements and the liquid assets of the Group's companies are constantly monitored with the aim of guaranteeing an efficient and effective management of financial resources.

It cannot be excluded, however, that, should the considerable weak and uncertain market situation continue or should collection times become longer or significant losses on credits occur, the risk of a reduction in liquidity could arise with the consequent need to resort to external financial sources.

Exchange rate risks and interest rate risks

Exposure to interest rate risks is linked to the need to finance operative or investing activities as well as using available liquid assets. The Group uses available liquid assets in bank accounts and capitalization insurance policies and mainly uses financial resources in the form of bank deposit loans on commercial credits and bank account credit worthiness. Variations in market interest rates can affect revenues and the cost of financing influences the progress of financial returns and expenses.

At the moment the Group operates almost entirely in the Euro area and is therefore not subject to exchange rate risks.

It is not in the Group's policy to use derivative financial instruments that require cover and/or negotiation.

Other Information

Neither CAD IT S.p.A. nor its controlled companies own, and/or have purchased and/or sold during the financial period CAD IT or their own shares, not even through trust companies or third parties.

CAD IT S.p.A. is not subject to the management and coordination of companies or bodies and defines its own general and operative strategies in full autonomy.

In accordance with art. 2497 bis of the Civil Code, directly or indirectly affiliated companies, with the exception of

particular cases, have identified CAD IT S.p.A. as an organisation that exercises managerial and coordination activities. These activities mainly consist of indicating general and operative Group strategies and focus on defining and adjusting to internal control regulations, the issuing of a Code of Ethics to be adopted at a Group level, the processing of general policies for the management of human and financial resources, the provision of productive factors. Moreover, Group coordination for some companies means a centralisation of administrative, corporate and financial management services. The affiliated companies that remain in full control of their managerial and operative autonomy, can then scale their economies by taking advantage of the professionalism and specialist services and concentrate their own resources in the management of their specific operational skills.

During this financial period, and the previous one, no atypical or unusual operations have been carried out as defined in the Consob communication no. DEM/6064293 of 28 July 2006.

Inside the Directors' Report on management is included the profit and loss account drafted in scalar form, highlighting the intermediary results as follows:

- Production revenues: this is the value of services and goods produced and sold by the Group, including internal assets and other income and earnings from the traditional offer.
- Added value: obtained by subtracting the operative costs for service and asset purchases from production revenues, this measures how much of the internal production and distribution of goods and services is due to company productive factors.
- Gross Operational Result (EBITDA): this figure is obtained by subtracting from the added value all of the costs that can be put down to staff and other administrative expenses. It highlights the result based on the traditional offer including depreciations, financial management, revaluations or devaluations and taxes.
- Operational Result (EBIT): this figure is obtained by subtracting the depreciation and funding amounts from the gross operational result.
- Ordinary Result: this includes the financial management result.
- Pre-tax result: obtained by including revaluations and devaluations in the ordinary Result.

In the Financial Statement report, no alternative performance indicators have been adopted with the exception of the net financial position, shown in the Financial Statement notes, for which no reclassifications have been made in terms of Financial Statement figures and relative explanations are supplied and linked to the patrimonial status entries concerned, as defined in the CESR Recommendations.

CAD IT and some group companies adopt and maintain the following management systems:

- **Quality Management System**, in conformity with the UNI EN ISO 9001:2008 norm, for the design, production and sale of component-based software and its after-sale assistance and maintenance;
- **Information Security Management System**, in conformity with the UNI CEI ISO/IEC 27001:2014 norm, for the management activities of information and data relating to software solution development activities, maintenance, customisation, integration, application management, consultancy and training in the banking, finance, insurance, industry and public administration sectors;
- **Health and Safety Management System**, implemented according to the UNI/INAIL Guidelines (September 2001 edition).

During the period, CAD IT S.p.A, and the other Group companies involved, passed the periodic surveillance checks for the renewal and maintenance of the certifications held with positive results.

The Group adopts an adequate system to protect information in accordance with Leg. Dec no. 196 of 30th June 2003 "Personal data protection code" to ensure the protection of personal data.

CAD IT, in accordance with art. 3 of Consob Deliberation no. 18079 of 20th January 2012, has decided to comply with the simplification regime provided for in articles 70, paragraph 8, and 71, paragraph 1-bis of Consob Regulation no. 11971/1999 and subsequent modifications and integrations, therefore availing itself of the right to waiver the obligation to present the expected information documents on significant operations relating to mergers, splits, increases in capital by means of the transfer of assets, acquisitions and sales.

Foreseeable development in the management

The development strategies adopted for the current year aim at meeting the priorities that the Italian and European

banks are now being obliged to face. In fact, financial institutions are now finding themselves having to deal with the constant need to adjust their procedures and structures in order to quickly acknowledge new norms and regulations introduced at an international, European and national level as well as to try and improve results and margins in order to manage the current market context that is now beginning to show signs of recovery.

The principal norms that the banks will have to face in the immediate future involve: the adoption of a "rolling" model in relation to increases in dilutive capital, the EU 1286/2014 Regulation regarding the KID (Key Information Document) which aims at increasing transparency on packaged retail and insurance-based investment products (the so-called "PRIIP"), modifications to the IFRS 9 accounting standards, Market Abuse, Data Quality, Notifications (Puma 2), Basel III, MiFID II, T2S.

For the purposes of an efficient, timely and coordinated development in the procedures in order to adjust to the new regulations, CAD IT has set up a series of "work groups" in collaboration with its customers to further study the new specifications.

As regards pursuing improved margins, the financial institutions are constantly trying to contain costs and extend their business areas. CAD IT also puts itself forward as a strategic partner for its customers on these fronts with innovative software like the new Oder Hub and General Data systems which are able to take advantage of new technologies that lead to achieving high standards of efficiency in terms of data and process management, with significant reductions in processing times and costs.

Lastly, in order to provide financial institutions with support in their business area and business volume expansion strategies, CAD IT offers a Framework for the new generation Digital Bank and, thanks to significant experience and references matured in the field of solutions for financial promoters, also places its skills at the disposal of those financial institutions that want to innovate and promote their own offers and networks.

In addition to the mentioned opportunities the main strategic objectives of the company and the Group are to maintain and further develop its leadership position in the Italian banking sector, increase its customer portfolio in the insurance and local tax collection sectors, further distribute new products relating to business intelligence, promote its software for the industrial sector at medium/large-sized companies.

The Group is also continuing to pursue its efforts to expand towards the European and international markets, which could also be supported and accelerated by the recent acquisition of the shareholding in the Spanish company Software Financiero Bolsa S.A., as well as by the optimal references it has obtained from its existing foreign customers and by the internationalization procedures for which the large Italian and European banking groups are advocating.

The CAD IT S.p.A. managers are also constantly on the look-out for any development opportunities, whether direct or through external lines, through technical or commercial collaboration agreements and by taking on or acquiring holdings in order to create activities that are complimentary and synergic to existing ones.

Considering current strategies and in response to the current general situation, the Board of Directors has placed maximum attention on market needs in order to lead the Group's management and development strategies in the right direction and to maintain high levels of efficiency so that favourable economic results can be achieved in the future.

On behalf of the Board of Directors

The Chairman

/s/ Giampietro Magnani

Notes

CAD IT is the leader of a group that is one of the most dynamic organizations in the Italian information technology sector.

CAD IT S.p.A. is a joint stock company and is governed on the basis of Italian law and exercises its management and coordinated activities on its own direct controlled companies. CAD IT S.p.A. is not subject to the control of any other company, as provided by article 2359 of the Italian Civil Code and it is fully responsible for defining its own general and operational strategic policies.

The company is listed in the STAR segment of MTA market of the Italian stock exchange, segment conceived for mid size companies that voluntarily comply with requirements of excellence in terms of information transparency, communication, liquidity of free float and Corporate Governance, in line with best international standards.

The registered office and the administrative and main operating offices are in Via Torricelli 44/a, Verona. The company is registered in the Verona Company Register under no. 01992770238.

Unless otherwise indicated, the monetary quantities in the accounting tables and those in the notes, are shown rounded off to the nearest thousand euro. The totals and subtotals of the statements presented are determined by rounding the sum of the point data. The percentage figures shown are calculated using the non-rounded off figures.

1. Accounting policies and evaluation criteria more important

This half-year condensed financial statement has been drafted in accordance with the applicable IFRS International accounting standards issued by the International Accounting Standard Board (IASB) and recognized by the European Community in conformity with EC regulation no. 1606/2002. IFRS refers to the International Accounting Standards (IAS) presently in force as well as the interpretative documents issued by the International Financial Reporting Interpretations Committee (IFRIC), previously known as the Standing Interpretations Committee (SIC). The half-year condensed financial statement has been drafted in the consolidated form since CAD IT is obliged to draft a consolidated balance.

The half-year condensed financial statement has been drafted in accordance with IAS 34 – Interim Financial Reports, bearing in mind the context of art. 154-ter of legislative decree no. 58 of 24th February 1998 (TUF).

In the drawing up of this summarised six-monthly Balance, the same accounting standards have been applied as those adopted in the drafting of the consolidated Balance at 31st December 2015, with the exception of the items described in the paragraph below – Accounting Standards paragraph, amendments and interpretations applied since 1st January 2016.

The accounting standards adopted have been applied in the same manner throughout the periods shown and for all the Group's companies, amending the respective Financial Statement drafted in accordance with Italian accounting standards to consolidate.

The consolidated balance has been drafted using the evaluation criterion of past cost, except for financial instruments available for sale, which are assessed at fair value, and the holdings in subsidiaries, which are assessed in accordance with the equity method. Moreover, where some land and buildings have been included in First Time Adoption, the fair value has been used instead of the cost.

Use of estimates

In accordance with the IFRS, when drafting the Financial Statement the company management formulates evaluations, estimates and hypotheses to apply the accounting standards which affect the amounts of credit and debit and the costs and revenues found in the Financial Statement. Estimates and their relative hypotheses are based on past experience and factors considered reasonable for the case concerned. Since they are estimates, the results obtained are not necessarily the same as the results portrayed.

The estimates and hypotheses are reviewed on a regular basis. Any variations deriving from an accounting estimate review are shown in the period in which the review was made if such review only affects that period. If the review affects the current and future periods, the variation is recorded in the period in which the review is made and in the relative subsequent periods.

Accounting standards, amendments and interpretations applied since 1st January 2016

There are no, or no significant, other matters and cases governed by standards, amendments and interpretations effective from 1st January 2016 approved by the IASB and IFRIC and published in the European Community's Official Gazette. No standards approved by the European Union, the application of which will be compulsory in the future, have been adopted in advance.

Balance sheet layout

The balance layouts have been drafted according to IAS 1 specifications and opportunely integrated with the information required by the Consob deliberation no. 15519 of 2006.

The Group has decided to present revenue and cost entries referring to the period in question in two statements. One statement shows the profit (loss) components for the period (Consolidated Income statement) and the other, which begins with the profit (loss) of the period and shows the statement entries of the other components of the overall profit and loss account (Statement of comprehensive income).

The Group presents its economic account by nature, the format that is considered the most representative in terms of function presentation. In fact, the chosen format conforms to the internal reporting modalities and the business management and is in line with the way the economic account was represented in the past.

As for the patrimonial situation, a distinction has been made between current and non-current assets and liabilities. The financial statement has been presented according to the indirect method so that the profit (or loss) for the period has been adjusted of any non-monetary operations and by deferrals and the setting aside of future incomes or payments.

Each column in the statement of net patrimony variations reconciles the opening and closing balances for each net patrimony voice.

Each significant entry shown in the above-mentioned statements, is marked with references to notes which provide the relative information.

Subsidiary companies

The consolidation area includes the Parent company and the companies it controls, that is, where it has at the same time: power over the investee, exposure, or rights, to variable returns from its involvement with the investee, and the ability to use its power over the investee to affect the amount of the investor's returns.

Subsidiary companies are consolidated from the date in which control was effectively transferred to the Group and are no longer consolidated as from the date that control becomes external to the Group.

These companies are consolidated using the integral consolidation method. In order to prepare the consolidated data, the patrimonial, economic and financial situations of the subsidiary and associate companies have been used as prepared by the Group's individual companies at the reference dates, drawn up in accordance national accounting principles and approved by the respective boards of directors, opportunely reclassified and amended to reflect the application of the homogeneous international accounting standards adopted by the Group.

In drafting the consolidated balance all the balances and significant transactions between the Group's companies have been eliminated, as are all unrealised infra-group profit and loss transactions.

Associated companies

The share in associated companies, that is those companies in which the Group has significant influence, is evaluated using the equity method, as defined in IAS 28 – Investments in Associates. The profits or losses relevant to the Group are included in the consolidated balance from the date in which this considerable influence began up to the moment it ceases.

Property, plant and equipment

Tangible fixed assets are shown at purchase cost, including any costs that may be directly ascribable and necessary for activating the asset and putting it to the use for which it was purchased. In reference to land and

buildings listed in First Time Adoption, the fair value was used instead of the cost.

Tangible fixed assets are shown at net value of the relative accumulated depreciations and losses due to the reduction in value determined in accordance with the modalities described below.

Tangible fixed assets are amortised in constant rates during the course of their expected useful life cycle, i.e. the estimated period of time in which the asset will be put to company use. Whenever significant parts of tangible fixed assets have different estimated useful life cycles, said components are amortised separately.

The value to be depreciated is given by the registered value of the asset net of any loss in value and reduced by its assumed value at the end of its useful life cycle, if significant and reasonably calculable. The useful life cycle and the cash value are reassessed annually and any changes, where necessary, are brought in with a perspective application.

The main depreciation rates used are the following:

- industrial buildings: 3%
- electrical equipment: from 5 to 10%
- air conditioning equipment: from 6 to 15%
- telephone systems: 20%
- alarm systems: from 10 to 30%
- furniture and fittings: 12%
- electrical machinery: 15%
- electronic machines and computers: 20%
- vehicles: 25%

Land, both without buildings or next to civil and industrial constructions, is accounted for separately and not amortized as it is considered an element with an indefinite useful life cycle.

In order to calculate any losses due to depreciation, the accounting value of intangible fixed assets is subject to verification.

At the time of elimination or when no future economic benefit can be expected from the use of an asset, it is eliminated from the balance and the eventual loss or profit (calculated as the difference between the assignment value and the taxation value) is shown in the economic account of the year in which the asset is eliminated.

Financial leasing

Assets owned through financial leasing contracts, through which all the risks and benefits tied to the property are transferred to the Group, are registered among the Group assets at their fair value or, if this value is lower, at the present value of the minimum payments due for the leasing and depreciated by applying coherent criteria to the other assets. The corresponding liability towards the lessor is registered in the balance among the financial debts.

Intangible fixed assets

Intangible fixed assets are shown as such when it is likely that they will bring in future economic benefits for the company and when the asset cost can be feasibly determined.

Intangible fixed assets, having a defined useful life cycle, are subsequently registered net of the relative accumulated amortizations and any losses due to a reduction in value.

The useful life cycle is reassessed annually and any changes, where necessary, are brought in with a perspective application.

Profits or losses deriving from the transfer of an intangible fixed asset are determined as the difference between the elimination value and taxation value of said asset and are reported on the economic account at the time of elimination.

Research costs are charged to the income statement in the period in which they are incurred.

The development costs of projects for the production of instrumental software, or those to be sold, are registered on the assets when they satisfy the following conditions: the costs can be reliably determined, the product is technically feasible, the expected use and/or sale of the product indicate that the sustained costs will generate future economic benefits. In respect of the standard that correlates costs and returns, these costs are amortized as from the moment in which the activity becomes available for use, in permanent amortisation amounts for the

entire duration of the product's lifecycle, estimated at five years. The costs of internally generated intangible assets include any expenses that can be directly attributable to the development of the product and any reasonable part of general production costs attributable to the preparation stages before putting the product to use. Development costs that cannot be capitalised, when sustained, are reported on the income statement.

The concessions and licences entry mainly includes software under licence purchased by third parties and used for programming activities, depreciated for their useful life-cycle, estimated at 3 years.

Goodwill

Goodwill resulting from the purchase of controlled and incorporate companies is initially registered at cost and is the overbalance of the purchase cost in respect of the purchaser's share of the fair value of the assets and liabilities and the potential liabilities at the date of purchase.

After the initial registration, goodwill is no longer amortised and is decremented of any losses in accumulated value, calculated according to the IAS 36 Asset value reduction.

Goodwill is subject to an annual analysis of retrievableness or at shorter intervals if something happens or changes in circumstances arise, which could cause losses in value.

Goodwill deriving from purchases made prior to 1st January 2004 is registered at the recorded value ascribed to it in the last balance drafted on the basis of the previous accounting standards (31st December 2003). In fact, during the preparation of the opening balance in accordance with the international accounting standards, none of the purchase transactions made prior to 1st January 2004 have been re-considered.

The start-up relating to holdings in associated companies is included in the value of these companies.

Impairment loss

The Group annually verifies the accountable value of intangible and tangible assets or more often whenever there is an indication that assets may have suffered a value loss.

If the charged value exceeds the recoverable value, the assets are devalued to reflect their recoverable value, represented by the greatest figure between the net price and use value. In defining the use value, expected future financial flows are discounted back using a pre-tax discount rate that reflects the current market estimations in reference to the cost of money at the time and the specific risks of the asset in question. For an asset that does not generate widely independent financial flows, the return value is determined in relation to the unit generating the financial flows of which the asset is a part. The value losses are accounted for in the economic account among depreciation and devaluation costs. When subsequently an asset value loss, different from the beginning, is less or decreases, the accounting value is increased to a new estimate of the recoverable value within the limit of the previous value loss. The recovery of a value loss is registered to the economic account.

Other non-current credits

These are registered at their nominal value, representative of their *fair value*.

Stock

Leftover stock is valued as the lesser value between purchase cost and the net value of the assumed income. The cost is determined in accordance with the average calculated cost method.

On-going orders

When the result of an order can be reliably estimated, the relative revenues and costs are shown in relation to the situation of the activity's progress at the time of financial period closure, on the basis of the ratio between sustained costs for the activity carried out to date and the total estimated cost of the order, unless this calculation is not deemed representative of the order's progress.

Any variations to the contract, price or incentive reviews, are included to the amount that were agreed with the customer.

When the result of an order cannot be estimated reliably, the relative revenues are shown only within the limits of

the order's sustained costs, which will probably be retrieved. Order costs are shown as expenses in the financial period in which they were sustained.

Should it appear likely that the total costs of a work to order will exceed the revenues, the expected loss is immediately shown as a cost.

Commercial credits and other credits

Commercial credits, whose expiry limits are within normal commercial terms, are not updated and are registered at their nominal value net of any loss of value. Moreover, they are adjusted to their assumed cash value by means of the registration of an appropriate amendment fund.

Liquid asset availability and equivalent means

The availability of liquid assets and equivalent means is registered at nominal value and has the requirements to be immediately available or available at very short notice, without obstacles and with no significant expense for collection. Financial investments are classified as liquid assets only when they have a short expiry.

Non current assets held for sale

The voice includes non-cash assets, the value of which will mostly be recovered by their sale rather than through their continuous use. These assets are valued as the lesser value between the net accounting value and the cash value net of sales costs.

Employee benefits Post-employment

Severance pay (TFR), governed by Civil Code article 2120, foresees that, when the work contract ends and working relations close, an employee shall be paid a sum calculated on the basis of the length of time he/she was employed and the amount of remuneration received.

Following the reform on additional welfare benefits, amounts matured up to 31/12/2006 remain in the company and the old governance system will be applied on these. Instead, for amounts matured since 01/01/2007, the employees can decide whether to allocate them as an additional welfare payment or to keep them in the company (if the company employs at least 50 people) or even have them put into a treasury fund (if the company employs at least 50 people) set up at INPS (State Welfare Offices).

Therefore:

- Severance Pay amounts matured up until 31/12/2006 and amounts matured since 01/01/2007 and kept in the company, are shown as definite benefit plans, while
- Severance Pay amounts matured since 01/01/2007 and transferred into additional welfare funds or treasury funds at INPS, are shown as definite contribution plans.

Severance Pay is calculated by independent actuaries using the "matured benefit" method by means of the "Projected Unit Credit" criterion as provided for in IAS 19. The calculation method can be outlined by the following phases:

- projection for each employee according to the assessment date of any Severance Pay already set aside and any future Severance Pay amounts that will mature up to the unforeseeable end of relations and by projecting the worker's remunerations;
- determination for each employee of probable Severance Pay payments that the company may have to make should the employee decide to resign, be dismissed, be incapacitated, die or take early retirement as well as any request for advance payments;
- the discounting back, at assessment date, of each probable payment;
- and (for companies with at least 50 employees) the re-proportioning, for each employee, of the probable and discounted back services based on the length of service at assessment date compared to the entire unpredictable amount at liquidation date.

Risk and obligation funds

In accordance with the IAS 37, the allocations are shown when there is an ongoing obligation (legal or implicit) that stems from a past event, whenever an outlay may be necessary to satisfy the obligation and a feasible estimation may be made on the obligation amount.

If the effect of updating the assumed cash value is significant, the allocations are calculated by updating the expected future financial flows at a pre-tax discount rate that reflects the current market evaluation of the cash value in relation to time. When updating has been done, the increase in the allocation caused by the passing of time is shown as a financial obligation.

Commercial debts and other current liabilities

The commercial debts, whose deadlines are within normal commercial terms, are not updated and are registered at cost (identified by their nominal value).

Financial liabilities are initially shown at cost, which corresponds to the fair value of the liability, net of transition costs, which are directly attributable to the issue of the liability itself.

Revenues and costs

The revenues and costs are determined in accordance with the qualifying economic principle to the amount to which the fair value can be feasibly determined.

Depending on the type of operation, the revenues are determined on the basis of the specific criteria reported below:

- the revenues for services are determined with reference to the point at which they stand on the basis of the same criteria used for determining the position of ongoing orders. If it is not possible to feasibly determine the revenue values, they are then calculated until they concur with the amount of expenses sustained and which are deemed recoverable.
- the profits from the sale of goods are shown when significant risks and benefits of the ownership of the goods are transferred to the purchaser, the sale price is agreed or can be determined and payment is collected.

As for sales concerning assistance and/or maintenance services carried out with the annual subscription formula, the accrual is calculated in proportion with time.

The costs are ascribed in the balance according to the same criteria as those for revenue acknowledgment.

Income taxes

Current income taxes for the financial period are calculated on the basis of estimates of taxable income in accordance with the laws in vigour: Moreover, the effects deriving from the activation within the Group of the national tax consolidation are also taken into account. The debt for current taxes is accounted for in the patrimonial status, net of any taxes paid in advance.

Deferred and pre-paid income taxes are calculated on the temporary differences between the patrimonial values registered in accordance with the IFRS international accounting standards and the corresponding values realised for tax purposes. Deferred income tax are calculated applying the tax rate which will be in force at the year after the account reference dates.

In particular, assets due to pre-paid taxes are registered when their recovery is probable, that is, when it is expected that sufficient tax profits will be available in the future so that these assets may be used. The degree of recovery of pre-paid tax assets is re-examined at the end of every period. Deferred taxes are always calculated in compliance with the IAS 12.

The controlling company, CAD IT S.p.A., and some of the Group's companies, have exercised the option of Group taxation as stated in art. 117 of TUIR 917/1986, which concerns the determination of a global income that corresponds to the algebraic sum of all net comprehensive incomes of the companies in the group. The liquidation of this one tax allows the Group the contextual use of any tax losses in the period.

2. Subsidiary companies and Consolidation area

During the first half of 2016 was acquired a 30% shareholding in the Spanish company Software Financiero Bolsa S.A. (for more information see the section Significant events of the period in the interim management Report); the company is evaluated using the equity method.

The fully consolidated companies included in the financial schedules of CAD IT Group did not change compared to the previous year, and are as follows:

Company name	Registered office	Share/ Quota capital Euro	Percentage of investment	Percentage of investment of the Group
<i>Consolidated using the integral method</i>				
CAD IT S.p.A.	Verona	4,669,600	Parent company	
CAD S.r.l.	Verona	350,000	100.00%	100.00%
CeSBE S.r.l.	Verona	10,400	62.11%	62.11%
Elidata S.r.l.	Castiglione D'Adda (LO)	20,000	51.00%	51.00%
Smart Line S.r.l.	Verona	102,700	51.05%	51.05%
Datafox	Verona	99,999	51.00%	51.00%
Tecsit S.r.l. ⁽¹⁾	Roma	75,000	70.00%	70.00%
⁽¹⁾ Held through CAD S.r.l.				

3. Revenues

The revenues gained in the period by the Group are subdivided as follows:

	30/06/2016		30/06/2015		Variations	
	€/000	% PV	€/000	% PV	absolute	%
Income from sales and services	26,376	91.2%	27,531	93.0%	(1,155)	(4.2%)
Asset increases due to internal work	2,478	8.6%	1,966	6.6%	513	26.1%
Other revenue and receipts	56	0.2%	100	0.3%	(44)	(43.9%)
Production value	28,911	100.0%	29,597	100.0%	(686)	(2.3%)

The supply of services and sales of goods includes any income from the sale of licensed out software, maintenance services and software updating, the Application Management, the use of personalised applicative packages, consultancy services and information technology system design, the sale of hardware.

In the first half of 2016, revenues from sales and services decreased compared to the first half of 2015 by 4.2%, recording the value of Euro 26,376 thousand (compared to Euro 27,531 thousand in the first half of 2015).

Revenues from foreign customers during the first half of 2016 amounted to 7.7% of the total sales and services revenues and therefore they maintain the levels reached last year (6.4% in 2015); the increase in foreign revenues is a result of the internationalization strategy pursued in recent years by the company and the group aimed at looking for new customers and markets in Europe and abroad.

Increases in internal work capitalized under fixed assets of Euro 2,478 thousand, increased compared to Euro 1,966 thousand in the first half of 2015, and include the activities carried out by the staff of CAD IT and the Group's companies concerning the development of new procedures aimed at the sale of licensed products or instrumental goods for the company's traditional business.

The Group's activities usually are not affected by significant cyclical or seasonal variations in total sales during the financial period.

4. Segment reporting by sectors

The internal organizational and managerial structure and the internal reporting for the Board of Directors is

presently grouped into two operative divisions: Finance and Manufacturing. These divisions are the basis on which the Group reports sector information.

The main activities of each sector are as follows:

Finance: includes the computer applications aimed specifically at banks, insurances and other financial institutions.

The main applications provide:

- management of intermediary activities on securities, funds and derivate instruments;
- management of the typical services in the credit sector, such as the collection, treasury and monitoring of credit procedures;
- service allocation for trading on line;
- management of integrated banking computer systems;
- consultancy and training.

Manufacturing: includes the development and marketing of instruments and software applications and offers a series of services aimed at allowing the companies to effectively manage numerous company processes, including Outsourcing.

The data not allocated to the sectors mainly refer to income and costs for logistics and administration services given to the group's companies by the controlling party.

Disclosures for business segments	30/06/2016				
	Finance	Manufacturing	Not allocated/General	Elisions	Consolidated
External revenues	28,239	588	84		28,911
Intersegment revenues	498			(498)	
Total revenues	28,737	588	84	(498)	28,911
Costs	(28,251)	(528)	(80)	498	(28,361)

Liabilities	29,731	107	5,233		35,071

Disclosures for business segments	30/06/2015				
	Finance	Manufacturing	Not allocated/General	Elisions	Consolidated
External revenues	28,899	602	96		29,597
Intersegment revenues	517			(517)	
Total revenues	29,416	602	96	(517)	29,597
Costs	(29,056)	(563)	(79)	517	(29,181)
Gross Operating Result (EBITDA)	3,008	39	17		3,065
Operating Result (EBIT)	361	39	17		416
Net financial income (expenses)			62		62
Revaluations and devaluations	243				243
Result	604	39	79		721
Income taxes			(295)		(295)
Third party share (profit)/loss	(264)	(7)	109		(162)
Profit (loss) attributable to owners of the parent	340	32	(108)		264
Assets	83,143	656	2,726		86,341
Liabilities	25,793	112	5,805		31,526

The Group presently produces and carries out its activities mainly nationally and homogeneously. Revenues from foreign customers amount to 7.7% of total sales and services revenues and mainly relate to customers of Switzerland and Germany and to a lesser extent of UK, U.S.A., Monaco and France.

5. Purchase Costs

	30/06/2016	30/06/2015	Variations	%
Hardware-Software purchases for sale	50	36	14	37.4%
Maintenance and consumable hardware purchases	5	11	(6)	(54.2%)
Other purchases	110	131	(21)	(15.8%)
Variations in raw material stock	(27)	4	(31)	(786.4%)
Total	138	183	(44)	(24.3%)

Costs for hardware and software purchases for commercialization refer to purchases made for orders that clients had already confirmed and show an increase compared to the first half of 2015.

The item Other purchases includes mainly the costs of fuel for vehicles used in the business activity (Euro 63 thousand), as well as cost of consumables, chancellery and advertising.

Variations in inventories decreased during the period of Euro 31 thousand.

6. Service costs

	30/06/2016	30/06/2015	Variations	%
External collaboration	2,788	4,035	(1,247)	(30.9%)
Travelling expenses and fee reimbursement	515	709	(194)	(27.4%)
Other service costs	1,492	1,548	(56)	(3.6%)
Total	4,795	6,292	(1,497)	(23.8%)

Service costs during the first half of 2016 came to Euro 4,795 thousand, a decrease compared to the same period of previous year (Euro 6,292 thousand). In particular, external collaboration costs decreased by 30.9% (-1,247 thousands of euro), other service costs by 3.6% (-56 thousands of euro) and travelling expenses and fee reimbursement by 27.4% (-194 thousands of euro), mainly correlated to the productive activities in terms of the need to carry out work on customer premises.

The decrease in costs for external collaborations is mainly due to the less use of external service providers dedicated to activities and projects for clients.

The other service costs mainly include service costs and assistance fees and hardware and software maintenance, energy costs, administrative, legal and fiscal consultancy, maintenance costs for office management and installed systems, insurance costs, costs for training courses.

7. Other operating costs

The following table shows and compares the other operating costs, which have undergone a decrease of 3.7%.

	30/06/2016	30/06/2015	Variations	%
Leases and rentals	321	342	(21)	(6.2%)
Misc. operating costs	81	76	6	7.8%
Total	402	418	(15)	(3.7%)

Leases and rentals in 2016 first half year, came to Euro 321 thousand, compared to Euro 342 thousand in the first six months of 2015 and mainly refer to equipment and instrumental software rental and to lease of operational offices.

Other operating costs amounting to Euro 81 thousand, a decrease of Euro 6 thousand, mainly refer to municipal tax on real estate and other taxes and fees.

8. Labour costs and Employees

Labour costs in the first half of 2016, of Euro 18,967 thousand, increased (+1.8%) compared to the same six months in 2015 (Euro 18,625 thousand). The increase in labour costs is mainly due to the increase in the average number of employees in the group.

	30/06/2016	30/06/2015	Variations	%
Salaries and wages	13,809	13,499	310	2.3%
Social security costs	4,005	3,999	6	0.2%
Severance pay	1,024	997	27	2.7%
Other costs	129	130	(1)	(0.9%)
Total	18,967	18,625	342	1.8%

The following table shows the data for the precise number of employees at the Group CAD IT:

Category of employees	labour force at 30/06/2016	labour force at 30/06/2015	Variations	labour force at 31/12/2015
Management	20	20	0	19
White-collars and cadres	574	582	(8)	584
Blue-collars	1	1	0	1
Apprentices	50	27	23	40
Total	645	630	15	644

The number of CAD IT Group staff, at 30th June 2016 was 645 employees, compared to 630 at 30th June 2015. The average number of employees during half year in question was 645 persons while this figure was 627 in the previous first half year. The following table shows data regarding the CAD IT Group average number of employees:

Category of employees	Average number 1 st half 2016	Average number 1 st half 2015	Variations
Management	20	20	0
White-collars and cadres	577	578	(1)
Blue-collars	1	1	0
Apprentices	47	28	19
Total	645	627	18

The Group dedicates particular attention to professional staff training by means of internal training and updating courses. The main training areas were: updating in new programming languages and systems management, health and safety at work, foreign languages (English), company organization and managerial training.

9. Other administrative costs

The table below shows the other administrative costs in detail:

	30/06/2016	30/06/2015	Variations	%
Director and legal representative fees	793	745	48	6.4%
Director retirement	8	8	0	-
Director and legal representative fee contributions	118	106	11	10.7%
Telephone charges	180	149	31	20.9%
Commissions	0	0	0	-
Advertising fees	16	6	9	142.4%
Total	1,114	1,015	99	9.8%

The entry of the total amount of Euro 1,114 thousand, shows a Euro 99 thousand increase compared to the first half of previous financial period (+9.8%) and includes costs relating to director and manager fees and their relative contributory costs. The end of mandate indemnity for directors is related to one of the subsidiaries.

Other administrative costs include remunerations paid to related parties of Euro 649 thousand, previous period Euro 604 thousand (as shown in note 35).

10. Financial performance

The net financial management result was in credit by Euro 9 thousand, compared to Euro 62 thousand in the first half of 2015, as the following detailed table shows.

	30/06/2016	30/06/2015	Variations
Interest on bank deposits and equivalent	35	76	(42)
Foreign exchange gains	0	2	(2)
Total financial income	35	78	(44)
Interest on bank overdrafts and loans	(24)	(16)	(7)
Interest on debts for financial leasing	0	0	0
Foreign exchange losses	(2)	(0)	(2)
Total financial charges	(25)	(16)	(9)
Net financial income and (charges)	9	62	(53)

Financial earnings entirely refer to interest received from liquid assets in current bank accounts and capitalization insurance policies classified as liquid assets.

Financial expenses almost entirely refer to current account overdrafts and bank loans.

11. Revaluations and depreciations

The revaluation of holdings calculated with the net patrimony method concerns the associate company Sicom S.r.l., which was revaluated of Euro 250 thousand (Euro 243 thousand in the first half 2015). The Euro 4 thousand depreciation refers to the Spanish company Software Financiero Bolsa S.A..

<i>Revaluations and depreciations</i>	<i>30/06/2016</i>	<i>30/06/2015</i>	<i>Variations</i>	<i>%</i>
Revaluation of holding in associate companies	250	243	8	3.1%
Depreciation of holding in associate companies	(4)	0	(4)	-
Total revaluations and depreciations	246	243	3	1.4%

12. Income taxes

The taxes ascribable to first half of 2016 were estimated taking the results of the period and the norms in force into account and they represent the best possible estimate of the tax expenses ascribable to the period in question.

	<i>30/06/2016</i>	<i>30/06/2015</i>	<i>Variations</i>	<i>%</i>
Tax pre-payments	63	48	15	31.2%
Deferred taxes	0	(1)	1	107.6%
Current taxes	239	249	(10)	(3.9%)
Total income taxes	302	295	6	2.1%
Tax incidence on the gross pre-tax result	37.4%	41.0%		

The tax incidence for the period on the gross pre-tax result amounted to 37.4%, while in the first six months of 2015 it was 41%.

The controlling company, CAD IT S.p.A., and some of the Group's companies, have exercised the option of Group taxation as stated in art. 117 of TUIR 917/1986, which concerns the determination of a global income in terms of IRES that corresponds to the algebraic sum of all net incomes of the companies in the group. The liquidation of the only tax due allows the Group to contextually use any tax losses during the year and determine, at a group level, the amount of interests allowed that can be deducted fiscally.

13. Earnings per share

The basic result per share is calculated by dividing the profit/loss of the period ascribable to the ordinary shareholders of the Parent Company by the weighted average number of ordinary shares in circulation during the year. The number of ordinary shares in circulation does not change during the year of the period and no other types of share are admitted. There are no options, contracts or convertible financial instruments or equivalent that give their owners the right to acquire ordinary shares, therefore, the basic profit per share and the dissolved profit per share agree.

<i>Earnings per share</i>	<i>30/06/2016</i>	<i>30/06/2015</i>
Net profit (loss) from continuative activities attributable to ordinary shares (thousand of €)	522	265
Weighted average number of ordinary shares outstanding	8,980,000	8,980,000
Basic earnings per share (in €)	0.058	0.030

14. Property, plant and equipment

The caption "property, plant and equipment" is composed as follows:

	30/06/2016	31/12/2015	Variations	%
Land	1,767	1,767	0	-
Buildings	15,136	15,212	(76)	(0.5%)
Plant and equipment	817	883	(65)	(7.4%)
Other assets	551	564	(13)	(2.3%)
Tangible fixed assets under development and payments on account	291	0	291	-
Total property, plant and equipment	18,562	18,426	136	0.7%

During the first half of 2016, the item "property, plant and equipment" varied as follows:

	Land and buildings	Plant and machinery	Industrial and commercial equipment	Other tangible fixed assets	Assets under development and payments on account	Total
Purchase or production cost	10,406	4,238	34	4,921	-	19,599
First time adoption revaluation	8,439	-	-	-	-	8,439
Previous years depreciation and write-downs	(1,865)	(3,356)	(31)	(4,360)	-	(9,612)
Adjustments to previous years write-downs	-	-	-	-	-	-
Opening value	16,979	883	3	561	-	18,426
Variations in consolidation area	-	-	-	-	-	-
Purchases	10	16	-	81	291	397
Transfers	-	-	-	-	-	-
Reduction in accumulated depreciation due to disposals	-	-	-	42	-	42
Disposals	-	-	-	(42)	-	(42)
Revaluations for the period	-	-	-	-	-	-
Depreciation and write-downs for the period	(86)	(81)	(0)	(93)	-	(261)
Adjustments to write-downs for the period	-	-	-	-	-	-
Total tangible fixed assets	16,903	817	2	549	291	18,562

Land and buildings include property and land, accounted for separately, belonging to the Group.

There are no restrictions on the legal ownership and possession of assets, systems and machinery to guarantee liabilities. There are no contractual restrictions for buying assets, systems or machinery.

Some land and buildings have been revaluated at FTA at fair value as a substitute of cost and is calculated by an external expert; during 2015 the recoverability of these assets, was verified on the basis of an external valuation as of 30/06/2015 and drafted by the appointed expert. The valuation report showed current values of assets in excess of the net book values without, therefore, having to involve pointing out any impairment.

The purchasing of new tangible assets during the year half came to a total of Euro 397 thousand of which the main ones regarding: Euro 81 thousand for "other tangible assets" and mainly included the purchasing of electronic machinery, managerial instruments characteristic of the Group's activities and Euro 291 thousand relating to the provision of a new air conditioning system in course of installation.

During the first half of 2016 property, plant and equipment were not subject to any value reductions that required registration in the balance.

15. Intangible fixed assets

The caption "intangible fixed assets" is composed as follows:

	30/06/2016	31/12/2015	Variations	%
Industrial patents and similar rights	10,807	10,866	(58)	(0.5%)
Licences, trademarks and similar rights	168	178	(9)	(5.2%)
Assets under development	7,666	7,679	(13)	(0.2%)
Total Intangible fixed assets	18,642	18,723	(81)	(0.4%)

In the half period, "Intangible fixed assets" varied as follows:

	Industrial patents and similar rights	Licences, trademarks and similar rights	Assets under development and payments on account	Other	Total
Purchase or production cost	39,362	4,017	7,679	15	51,073
Previous years revaluations	-	-	-	-	-
Previous years depreciation and write-downs	(28,496)	(3,839)	-	(15)	(32,350)
Adjustments to previous years write-downs	-	-	-	-	-
Opening value	10,866	178	7,679	0	18,723
Variations in consolidation area	-	-	-	-	-
Purchases	-	47	2,478	-	2,526
Transfers	2,492	-	(2,492)	-	-
Reduction in accumulated depreciation due to disposals	-	-	-	-	-
Disposals	-	-	-	-	-
Revaluations for the period	-	-	-	-	-
Depreciation and write-downs for the period	(2,550)	(57)	-	-	(2,606)
Adjustments to write-downs for the period	-	-	-	-	-
Total intangible fixed assets	10,807	168	7,666	0	18,642

The voice "industrial patent rights and intellectual property" is almost entirely made up of software procedures developed by the CAD IT Group. The values are registered in credit to the directly sustained cost mainly due to the use of internal resources as well as any possible additional accessory fees that may occur. In respect of the principle that correlates costs and revenues, such costs are amortized as of the moment in which they are available for use and in terms of the product's lifecycle, estimated at five years.

During the period, following the completion and start of projects, were entered Euro 2,492 thousand, previously recorded as intangible assets in progress. The amortizations of this voice in the first half of 2016 financial period came to Euro 2,550 thousand.

The caption "Licences, trademarks and similar rights" principally includes the licensed out software bought by third parties used by the Group for production activities.

The voice "assets under development" refers to investments in the development of software procedures under construction both for sale and for in-company use. Most of these investments are aimed at new, advanced products, for which is expected the need of use by credit and financial institutions as well as in the field of public and industrial administration. These assets are registered to credit on the basis of the directly sustained cost, related to the use of dedicated staff. The fundamental condition for their registration in patrimonial credit is that said costs concern clearly defined, distinguishable and measurable products or processes and that they relate to projects that are both technically feasible and economically recoverable through revenues that will develop in the future by application of the project itself. During 2016 first half period, ongoing intangible assets increased by Euro 2,478 thousand due to costs capitalized by the parent company CAD IT and decreased by 2,492 thousand euro

due to the reclassification of part of ongoing assets under Industrial patents and similar rights. These assets have undergone no reduction in value during the 2016 first half financial year that need to be registered in the balance.

16. Goodwill

The Group verifies the recovery of goodwill at least once a year or more often if there are indications of a value loss.

The goodwill acquired in an aggregation of companies is allocated, at the time of purchase, to the Cash Generating Unit (CGU) from which benefits connected to the aggregation are expected. In particular, with regard to the CGU of the Group, these are the controlled companies that represent the smallest identifiable group of activities that generate in-coming financial flows and which are largely independent of the in-coming financial flows from other activities or groups of activities. The accounting value of goodwill has been allocated to the CGU as follows at the date of First Time Adoption:

Company	Accounting value of goodwill
CAD S.r.l.	7,004
Elidata S.r.l.	617
Smart Line S.r.l.	443
Datafox	217
CeSBE S.r.l.	28
Total	8,309

The recoverable value of the CGU is verified by determining the value in use.

The evaluation of the CAD IT Group companies was made through a *Discounted Cash Flow* (DCF), the most common calculation method in financial markets. Operational cash flow forecasts are based on the most recent budget plans approved by the Board of Directors and relate to the period 2016-2018 which take into account the concrete company possibilities based on past data and on management forecasts. The financial flows that go over this period have been calculated with great care using a growth rate of nil. The putting into effect rate used is the weighted average of capital.

The main assumptions used by the Directors for discounting back prospective financial flows in order to make an analysis of the holding value are reported below:

the equation used for estimating the weighted average cost of capital is the following

$$k = k_b(1 - TC) \left(\frac{B}{V} \right) + k_p \left(\frac{P}{V} \right) + k_s \left(\frac{S}{V} \right)$$

where:

k_b = interest rate in case of debt

TC = marginal tax rate of the economic bodies being evaluated

B = market value of the debt of a company

V = total market value of a company

k_p = advisability cost of risk capital

P = market value of the privileged shares

k_s = advisability cost of own capital determined by the market

S = market value of the net capital.

The cost of capital was identified as $k_s = 8.05\%$.

The permanent growth rate of the company being evaluated was chosen by taking it as 0% a year despite the CAGR of the income and profits of each being greater.

The value of the companies was determined as a summation of discounted back cash flows (Free Cash Flow), of the remaining value and the net financial position. In brief we can say:

Company value = \pm net financial position + discounted cash flows + remaining value

Into mathematical terms, the value corresponds to the following formula:

$$NPV = \pm PFN + \sum_i^N FCF (1+k)^{-N} + \left(\frac{FCF_{N+1}}{k-g}\right) \left\{\frac{1}{[1+(k-g)]^N}\right\}$$

where:

NPV = company value (Net Present Value)

PFN = Net Financial Position

FCF = cash flow

k = cost of capital

N = explicit period

g = growth rate of the implicit period

The evaluations confirmed the validity of the recorded values, whereby the recording of value adjustments was not necessary.

17. Investments in associates

This item consists of the holding in Sicom Srl and of the holding, acquired in April, in the Spanish company Software Financiero Bolsa S.A., evaluated with the equity method. The reference values used for evaluating these investments with the equity method and the relative reference dates on the patrimonial situation are shown in the following table:

Company name	Date of reference	Quotaholders' equity including profit for the period	Profit for the period	Percentage of investment	Investment value of the Group	Value registered in consolidated financial statements at 30/06/2016
Sicom S.r.l.	30/06/2016	2,084	1,002	25.00%	521	521
Software Financiero Bolsa S.A.	30/06/2016	682	47	30.00%	205	1,645
Total						2,167

18. Credits due to prepaid taxes

Credits due to prepaid taxes, of Euro 1,018 thousand, have been recorded as assets in the current and previous periods, as, on the basis of the forecast plans for the 2016-2018 period approved by the Management Board e on estimates of their future projections, will be probably the realization of a taxable income for which they can be used. Credits for pre-paid IRES and IRAP taxes include elision effects of intercompany margins that generated temporary differences in taxable income in previous years and that will be deductible in future.

19. Inventories

Leftover stock entirely includes finished products and goods for Euro 43 thousand compared to Euro 16 thousand at 31/12/2015.

20. Trade receivables and other credits

Commercial credits and other credits are made up as follows:

	30/06/2016	31/12/2015	Variations	%
Credits to clients	32,738	28,762	3,976	13.8%
Credit depreciation fund	(492)	(416)	(76)	(18.3%)
Credits to associated companies	0	0	0	-
Accrued income and deferred expenses	589	355	234	66.0%
Other credits	140	158	(18)	(11.4%)
Total trade receivables and other credits	32,976	28,859	4,116	14.3%

% coverage credit depreciation fund	1.50%	1.45%
-------------------------------------	-------	-------

Credits to clients are mainly in favour of banking, financial and insurance institutions and other group customers institutions; the accounting value of commercial credits and other credits is approximate to their *fair value*.

The high sum of credits towards clients is conditioned by the size of the value of the contracts, which is often considerable, as well as the contractual terms of payment which may state that the invoicing and payment of the amounts due are to be paid after the procedures supplied have been tested and the projects and provided services have been completed.

The Group evaluated the credits to the probable break-up value.

Regarding credits that are considered uncollectable, an allocation fund has been set up to the amount of Euro 492 thousand (Euro 416 thousand at 31 December 2015) which ensures a cover of 1.50% of the total amount of credits towards clients. This fund was determined on the basis of past data regarding losses on credits and is considered proportionate.

The entry Accrued income and deferred expenses entirely refers to deferred charges made up of the following:

Nature	30/06/2016	31/12/2015
Software assistance	294	161
Expenses for leases and rentals	6	11
Telephone charges	36	14
Logistical and administrative services	5	6
Various insurances	68	12
Hardware assistance	32	24
Other various	147	127
Total prepaid expenses	589	355

The total sum of the voice other credits is detailed in the table below:

Credits towards other	30/06/2016	31/12/2015	Variations	%
Receivables from social security institutions	5	20	(15)	(76.9%)
Receivables for advances on travel expenses	1	0	1	1570.9%
Payments on account to suppliers	124	127	(3)	(2.6%)
Other	10	11	(1)	(7.3%)
Guarantee deposits	0	0	0	-
Total credits towards other	140	158	(18)	(11.4%)

21. Tax credits

The entry of Euro 1,545 thousand (Euro 1,440 thousand at 31/12/2015) was made up of:

- down payments in direct taxes (IRES and IRAP) of the period;
- credit relating to the IRES reimbursement, according to Decree-Law 201/2011, deriving from not inferred IRAP relating staff costs and assimilated for periods 2007-2011 (Euro 1,151 thousand);

- credit relating to the reimbursement, according to Article 6 of Decree-Law 185/2009, deriving from IRAP deductibility at 10% for periods 2004-2007 (Euro 12 thousand).

22. Cash and other equivalent assets

	30/06/2016	31/12/2015	Variations	%
Bank and postal accounts	3,083	3,918	(835)	(21.3%)
Cash-on-hand and cheques	8	8	0	3.7%
Insurance policies capitalized	2,717	2,684	33	1.2%
Total Cash and other equivalent assets	5,809	6,610	(802)	(12.1%)

The bank and postal account deposits are made up of cash-on-hand in current bank accounts.

It is possible to redeem the capitalization insurance policy at any time with reimbursement made within 20 days with no particular significant expense. The returns are variable in relation to the annually calculated revaluation rate. The guaranteed minimum annual rate is 2.50%.

23. Share capital

The share capital, entirely registered, deposited and unchanged over the period, amounted to Euro 4,669,600. It was subdivided into 8,980,000 ordinary shares with a nominal value of Euro 0.52 each and all with equal rights. The ordinary shares are registered and indivisible and each one gives the right to a vote at the ordinary and extraordinary shareholders' meetings, as well as to the faculty of carrying out other company and patrimonial rights in accordance with the law and the statute.

CAD IT S.p.A. or its controlled companies do not own CAD IT or their own shares, not even through trustee companies or third parties.

Group equity

The Group equity came to Euro 52,026 thousand compared to Euro 53,491 thousand at 31st December 2015.

Third party equity

The item refers to the equity of the controlled companies that, on the basis of the 'Equity ratios', belongs to third parties. It was made up of:

Third party equity	30/06/2016	31/12/2015
Minority quotaholders of CeSBE S.r.l.	1,048	1,185
Minority quotaholders of Datafox S.r.l.	103	130
Minority quotaholders of Tecsit S.r.l.	16	16
Minority quotaholders of Elidata srl	813	816
Minority quotaholders of Smart Line S.r.l.	327	385
Total third party equity	2,307	2,532

24. Reserves

The item Reserves refers entirely to the share premium reserve of Euro 35,246 thousand.

25. Accumulated profit/losses

	30/06/2016	31/12/2015	Variations
Previous profits/(losses)	(976)	(925)	(51)
Legal reserve	934	934	0
First Time Adoption transition reserve	2,119	2,119	0
Consolidation reserve	89	185	(97)
Available reserve of undivided profits	9,832	10,262	(430)
Revaluation liabilities reserve for defined benefit	(409)	(123)	(286)
Period profits/(losses)	522	1,123	(601)
Total accumulated profits/(losses)	12,110	13,575	(1,464)

Previous period profit refers to the difference between the profits for the 2004 period calculated with the IAS/IFRS accounting standards compared to calculation with the national accounting standards.

The FTA transition fund covers any differences that may have occurred when the international accounting standards were first adopted.

The revaluation reserve liabilities for defined benefit plan includes the actuarial differences recognized in the other comprehensive income.

The available reserve of undivided profits decreased due to the effect of payment of the dividend to shareholders of CAD IT (Euro 430 thousand).

26. Dividends paid

On 28th April 2016 the CAD IT S.p.A. ordinary shareholders' meeting decided to give shareholders a dividend of Euro 0.15 per share, for total amount to Euro 1,347,000 using the entire profit for the year 2015 of Euro 916,934 together with the amount of Euro 430,066 be taken from the available reserve of undivided profits.

The dividend was paid on 11 May 2016.

27. Financing

The amount of Euro 1,974 thousand refers for Euro 1,011 thousand to a loan quota that goes beyond 12 months, which involves half-yearly repayment deadlines until January 2019, and for Euro 962 thousand to a ten-year loan, both loans began during 2015.

28. Liabilities due to deferred taxes

Deferred taxes amounted to Euro 2,520 thousand (unchanged compared to 31st December 2015) and took into account the taxable time differences resulting from time differences of the accounting value of an asset or liability compared to its recognized value for tax purposes. In particular they mainly referred to the fiscal effect of adjustments made at the FTA, the taxation of which was deferred to future periods after verifying the taxability conditions of the major values registered for the activities or the reduction of the liability value.

29. Employees' leaving entitlement and quiescence reserves

	30/06/2016	31/12/2015	Variations	%
Employees' leaving entitlement (TFR)	8,408	7,360	1,048	14.2%
Fund for indemnity of end of term	92	84	8	8.9%
Total	8,500	7,444	1,056	14.2%

The point concerning the TFR Fund shows the movements resulting from annual allocations made on the basis of the evaluations of external actuaries and the uses carried out concerning end of working contract resolutions or advance payments.

<i>Employees' leaving entitlement</i>	30/06/2016	31/12/2015	30/06/2015
<i>Opening balance</i>	7,360	8,155	8,155
Service cost	73	150	81
Interest cost	74	134	59
Benefits paid	(88)	(478)	(277)
Actuarial (gains)/losses	989	(601)	(620)
Closing balance	8,408	7,360	7,399

In order to carry out the mathematical evaluation the database of each employee (salary, matured TFR net of any advance payments, age, sex, qualification, etc.) was given to the external actuaries by the companies' qualified offices. The hypothetical specifications on the employees in service regarding both their demographic evolution and their future economic characteristics were calculated on the basis of some past company series, on similar experience and on market figures as well as on the basis of some indications supplied by the companies themselves in terms of their experience and sensitivity to company events.

The following table shows the actuarial assumptions used to determine the present value of the obligation.

	30/06/2016	31/12/2015
ECONOMIC ASSUMPTIONS		
Annual discount rate	1.05%	2.03%
Annual inflation rate	1.50% for 2016	1.50% for 2016
	1.80% for 2017	1.80% for 2017
	1.70% for 2018	1.70% for 2018
	1.60% for 2019	1.60% for 2019
	2.00% from 2020 onwards	2.00% from 2020 onwards
Annual rate of increase in severance pay	2.625% for 2016	2.625% for 2016
	2.850% for 2017	2.850% for 2017
	2.775% for 2018	2.775% for 2018
	2.700% for 2019	2.700% for 2019
	3.000% from 2020 onwards	3.000% from 2020 onwards
Annual rate of salary increase	0.50%	0.50%
DEMOGRAPHIC DATA		
death	Mortality tables RG48 General Accounting Office	
disability	Tables INPS	
retirement	100% to the waging requirements AGO	
TECHNICAL BASES TURNOVER AND ADVANCES		
Frequency Advances	1.00%	1.00%
Turnover frequency	2.50%	2.50%

The annual discount rate used to determine the obligation was determined by reference to the average yield curve of that comes from the index *IBOXX Eurozone Corporates AA* with a duration of 10+ years in the month of evaluation. To this purpose, the yield having a duration similar to the workers' collective involved in the evaluation was selected.

The average maturity (*duration*) of debt is 16.8 years. The expected *service cost* for the period 01/07/2016-30/06/2017 is Euro 182 thousand.

The following table shows the sensitivity analysis for the main evaluation parameters and the estimated future disbursements.

Sensitivity analysis

Change in actuarial assumptions	Value of severance pay
Turnover rate +1%	8,210
Turnover rate -1%	8,497
Inflation rate +0.25%	8,528
Inflation rate -0.25%	8,165
Discount rate +0.25%	8,071
Discount rate -0.25%	8,630

Estimated future disbursements

Year	Estimated disbursement
1	321
2	284
3	275
4	310
5	288

30. Commercial debts

The entire point amount to Euro 8,552 thousand and is as follows:

Commercial debts	30/06/2016	31/12/2015	Variations	%
Debts towards associated companies	261	356	(95)	(26.7%)
Debts towards suppliers	3,436	3,493	(57)	(1.6%)
Payments on account received	0	-	0	-
Accrued expenses and deferred income	4,855	625	4,230	676.6%
Total Commercial debts	8,552	4,474	4,078	91.2%

Debts towards suppliers are referred to as current debts for supplies of goods and services received.

The entry "Accrued expenses and deferred income" refers almost entirely to deferred income that was already invoiced regarding annual ordinary maintenance contracts on user licences and mainly pertaining to 2016 second half period.

31. Tax debts

The entry for fiscal debts, of the total amount of Euro 2,713 thousand, is made up of debts that the companies within the Group, and included in the consolidation area, have accumulated towards the inland revenue. This registration is made up of income tax debts, value added tax and to activities of tax substitution made by the various companies regarding their respective employees and collaborators.

32. Short-term financing

The voice on 30th June 2016 of Euro 2,110 thousand is made up of short-term financing provided by banks and bank overdrafts.

33. Other debts

Details of other debts are as shown:

	30/06/2016	31/12/2015	Variations	%
Social security charges payable	2,543	2,530	13	0.5%
Towards directors	79	236	(157)	(66.6%)
Towards staff for deferred salaries and pay	4,667	3,211	1,456	45.3%
Other	1,413	13	1,400	-
Total	8,703	5,991	2,712	45.3%

Debts towards welfare institutions included matured contributory debts on current monthly salaries as well as the set aside quota for deferred salaries.

The other debts are mainly made up of Euro 1,400 thousand towards the partners who sold a 30% holding share of the Spanish company Software Financiero Bolsa S.A., purchased by CAD IT in April 2016, relating to the remaining sum to be paid in 2019 on acquisition closing, in respect of the already defined minimum price (for more information see the section Significant events of the period in the interim management Report).

Staff debts refer to the current salaries for June 2016 and to accruals for deferred salaries that matured at the same date.

<i>Debt towards staff for wages and deferred pay</i>	<i>30/06/2016</i>	<i>31/12/2015</i>	<i>Variations</i>	<i>%</i>
For wages and expense accounts	2,252	1,218	1,033	84.8%
For production incentives	0	2	(2)	(100.0%)
For holidays	1,509	1,101	409	37.2%
For thirteenth month (year-end bonus)	906	0	906	-
For fourteenth month (summer bonus)	0	890	(890)	(100.0%)
Total	4,667	3,211	1,456	45.3%

34. Consolidated net financial position

Is positive the consolidated net financial position as at 30 June 2016.

In particular, the net short-term financial position, a decrease of Euro 1,093 thousand compared to December 31, 2015 (Euro 4,792 thousand), amounted to Euro 3,699 thousand, while the net financial position is positive for Euro 1,725 thousand, due to the presence of long-term loans for Euro 1,974 thousand.

Immediate availability on current accounts and in hand came to Euro 3,091 thousand. Capitalization insurance policies of Euro 2,717 thousand were contractually available within 20 days of request with no significant collection costs.

Short-term debts towards banks were made up of current account overdrafts and advances subject to final payment.

<i>Net consolidated financial position</i>	<i>30/06/2016</i>	<i>31/12/2015</i>	<i>Variations</i>	<i>%</i>
Cash-on-hand and at bank	3,091	3,926	(835)	(21.3%)
Capitalization insurance policies	2,717	2,684	33	1.2%
Payables due to banks current portion	(2,110)	(1,818)	(292)	(16.1%)
Net short-term financial position/(indebtedness)	3,699	4,792	(1,093)	(22.8%)
Long-term loans	(1,974)	(2,261)	287	12.7%
Net long-term financial position/(indebtedness)	(1,974)	(2,261)	287	12.7%
Net financial position/(indebtedness)	1,725	2,532	(806)	(31.9%)

The net financial position balance sheet agrees with the balance sheets; it is hereby reported that: cash in bank accounts and capitalization insurance policies are registered in the patrimonial status as "Cash and other equivalent assets"; short-term financial debts are registered as "Payables due to banks current portion"; long-term financing is registered in the patrimonial status as "Long-term loans".

As shown in the financial report, decreasing in financial assets was determined by the following management:

- the operational management activities generated a positive cash flow of Euro 3,756 thousand (compared to Euro 7,123 thousand in the first half of 2015) due to self-financing (net profit plus depreciation and amortization), net of non-cash items;
- investing activities absorbed Euro 3,082 thousand (compared to Euro 2,273 thousand in the first half of 2015) for investments in intangible assets (Euro 2,526 thousand), tangible assets (Euro 397 thousand), holding companies (Euro 17 thousand), and for the purchase of investments and other assets available for sale (Euro

- 300 thousand), partly offset by interests and dividends received (Euro 35 and 100 thousand respectively);
- financing activities absorbed Euro 1,767 thousand (compared to a positive cash flow of Euro 237 thousand in the first half of 2015) due to payment of dividends (Euro 1,461 thousand), to repayment of portions of financing (Euro 287 thousand) and to the allocation of profits to directors (Euro 20 thousand).

<i>Net short-term financial availability</i>	30/06/2016	31/12/2015	Variations	%
Bank and postal accounts	3,083	3,918	(835)	(21.3%)
Cheques and Cash on hand	8	8	0	3.7%
Insurance policies capitalised	2,717	2,684	33	1.2%
Debts towards banks (overdrawn accounts, advances subject to collection etc.)	(2,110)	(1,818)	(292)	(16.1%)
<i>Net short-term financial availability</i>	3,699	4,792	(1,093)	(22.8%)

35. Related parties transactions

Relations between the Group's companies are administered on the basis of contractual relations drawn up by the respective administrative organs bearing in mind the quality of the assets and services involved and the competitive conditions of the market, adapting the interests of the Group.

The summary of income and costs despite the credit and debit position at 30th June 2016 between the Group's subsidiaries is shown in the specific paragraph on management intermediary report.

The following table shows the incidence of transactions with related parties on the respective balance entry:

Transaction incidence with related parties at 30/06/2016	Total	Related Parties	
		Absolute value	% on Tot.
A) Entries in the Profit and Loss account			
Income from sales and services	26,376	8	0.0%
Service costs	(4,795)	(485)	10.1%
Labour costs	(18,967)	(374)	2.0%
Other administrative expenses	(1,114)	(649)	58.3%
B) Entries in the Patrimonial situation			
Commercial credits and other credits	33,927	12	0.0%
TFR and pension funds	8,500	163	1.9%
Commercial debts	8,552	243	2.8%
Other debts	8,703	201	2.3%
C) Financial flows			
Cashed dividends	100	100	100.0%

Returns with related parties mainly regarded the supply of services carried out for the company Xchanging and for the subsidiary Sicom S.r.l..

Service costs to related parties mainly include the supply of services carried out by the subsidiary Sicom to the controlling company (Euro 306 thousand), remunerations to the members of the CAD IT Statutory Auditors (Euro 34 thousand) and those relating to translation and language training services supplied by a company partly owned by a CAD IT manager (Euro 141 thousand).

Labour costs towards related parties include the remunerations (including contributions to be paid by the company and matured accruals for deferred pay) of CAD IT or its subsidiaries employees who are related to, or have an affinity with, CAD IT directors and those of managers with strategic responsibilities.

Other administrative expenses relating to related parties regard directorship fees received by CAD IT directors for

the position of director in Group companies (Euro 572 thousand) as well as to the directors of other companies in the Group who are related to, or have an affinity with them (Euro 76 thousand).

Credits to related parties were made up of the controlling company's credits towards the company Xchanging.

Debts to related parties were mainly made up of commercial debts, for services (Euro 243 thousand), debts towards employees and directors for remunerations and remuneration accruals (Euro 201 thousand) and severance pay (Euro 163 thousand).

No other relations of an economic-patrimonial nature of any significant substance with related parties have been undertaken.

The tables below show the incidence of relations with related parties at 30/06/2015 and at 31/12/2015.

Transaction incidence with related parties at 30/06/2015	Total	Related Parties	
		Absolute value	% on Tot.
A) Entries in the Profit and Loss account			
Income from sales and services	27,531	5	0.0%
Service costs	(6,292)	(761)	12.1%
Labour costs	(18,625)	(316)	1.7%
Other administrative expenses	(1,015)	(604)	59.5%
B) Entries in the Patrimonial situation			
Commercial credits and other credits	28,576	13	0.0%
TFR and pension funds	7,475	149	2.0%
Commercial debts	8,721	778	8.9%
Other debts	7,508	132	1.8%
C) Financial flows			
Cashed dividends	172	172	100.0%

Transaction incidence with related parties at 31/12/2015	Total	Related Parties	
		Absolute value	% on Tot.
A) Entries in the Profit and Loss account			
Income from sales and services	55,728	14	0.0%
Service costs	(12,437)	(1,512)	12.2%
Labour costs	(36,206)	(660)	1.8%
Other administrative expenses	(2,314)	(1,405)	60.7%
B) Entries in the Patrimonial situation			
Commercial credits and other credits	28,859	0	-
TFR and pension funds	7,444	155	2.1%
Commercial debts	4,474	511	11.4%
Other debts	5,991	324	5.4%
C) Financial flows			
Cashed dividends	172	172	100.0%

36. Significant events since 30th June 2016

On 8th July 2016, the CAD IT Board of Directors examined and acknowledged Giuseppe Dal Cortivo's renunciation of his position as President and Managing Director of the CAD IT S.p.A. Board, and nominated Giampietro Magnani

as its President (previously Vice President of the Company). Giuseppe Dal Cortivo informed the Company that, as a consequence of the Public Prosecutor's on-going investigations in Rome, he believes it appropriate to suspend his position as President and Managing Director of the CAD IT S.p.A. Board, until the events that have led to his being investigated as the Company's legal representative for crimes of a fiscal nature, have been clarified. The indictment served to CAD IT's legal representative regards the payment of three invoices, registered in the accounts in the annual statements for taxation years 2010, 2012 and 2013. The total amount of the three invoices is equal to Euro 194 thousand (excluding VAT) for aggregate costs sustained by the Company during those financial periods of more than 150 million Euros. The Company, in acknowledging Giuseppe Dal Cortivo's decision, and convinced of the correctness of his actions, hopes that this question can be resolved as soon as possible, entrusting in the work of the Magistracy. CAD IT Group has been operating on the market for almost forty years, it has never been subject to criminal disputes, it currently employs over 650 people and has national and international customers of primary standing.

37. Other information

There have been no transactions or any non recurrent significant events, as defined in the Consob DEM/6064293 communication, in the present financial period or the previous one.

CAD IT and the Group's companies have not drawn up any contracts containing clauses that depend on continual financial funding (covenant) nor any agreements where a subject – to whom a loan has been granted – must behave accordingly (negative pledge).

In accordance with Consob Notification no. DEM/11070007 of 5th August 2011 (which in turn refers to document ESMA no. 2011/266 of 28th July 2011) on the information to be supplied in financial reports concerning sovereign debt statements kept by listed companies, it is hereby declared that the Group does not hold any bonds or loans issued by central or local governments or governmental bodies.

The present half yearly financial report was approved by the CAD IT S.p.A. Board of Directors on 22/09/2016.

ATTESTATION IN RESPECT OF THE HALF YEAR CONDENSED FINANCIAL STATEMENTS UNDER ART. 81-TER OF CONSOB REGULATION NO. 11971 OF 14TH MAY 1999 AND SUBSEQUENT MODIFICATIONS AND INTEGRATIONS

1. The undersigned, Giampietro Magnani, Chairman of the CAD IT S.p.A. Board of Directors, and Michele Miazzi, the manager responsible for drafting the CAD IT S.p.A. company accounting documents, hereby declare, bearing in mind the content of art. 154-bis, paragraphs 3 and 4 of legislative decree no. 58 of 24th February 1998 in terms of:
 - the adequacy in relation to the characteristics of the company and
 - the effective application,of the administrative and accounting procedures for drafting the half year condensed statements during the first six months of 2016.
2. Furthermore, it is hereby declared that the CAD IT S.p.A half year condensed statements:
 - a) has been drafted in accordance with the International accounting standards (IFRS) – adopted by the European Union - in conformity with EC regulation no. 1606/2002 of the European Parliament and Council of 19th July 2002, and in particular with IAS 34 – *Intermediary Period Balances*;
 - b) corresponds to the results in the company books and accounting documents;
 - c) gives a true and correct representation of the patrimonial, economic and financial situation of the company and the group of companies included in the consolidation.
3. The interim management report includes reliable analysis of the reference to the important events affecting the Company during the first six month of the current fiscal year, including the impact of such events on the Company's condensed financial statements and a description of the principal risks and uncertainties for the remaining six months of the year. The interim management report also contains a reliable analysis of information on any significant operations with correlated parties.

Verona, 22 September 2016

/s/ Giampietro Magnani
On behalf of the Board of Directors
The Chairman

/s/ Michele Miazzi
Manager in charge of drafting

Michele Miazzi, manager in charge of drafting CAD IT S.p.A. accounting documents, hereby declares, in accordance with article 154-bis, second paragraph, of the Consolidated Law on Finance (Leg. Dec. 58/1998), that the accounting information in "Financial Statements of CAD IT SpA" at 30th June 2016 corresponds to the documentary results, books and accounting registers.

**Review report on the condensed consolidated financial statements
for the six months period ended June 30, 2016**

To the Shareholders of
CAD IT S.p.A.

Introduction

We have performed the limited review of the accompanying half-year condensed consolidated financial statements consisting of the statement of financial position, the statement of income, the statement of comprehensive income, the statement of changes in equity, the statement of cash flows and relevant explanatory notes of CAD IT S.p.A. and its subsidiaries (the CAD IT Group) as of June 30, 2016. These half-year condensed consolidated financial statements, prepared in accordance with the International Accounting Standard applicable to the interim financial statements (IAS 34) as adopted by the European Union, are the responsibility of CAD IT S.p.A.'s Directors. Our responsibility is to express a conclusion on this half-year condensed consolidated financial statements based on our review.

Scope of review

We conducted our review in accordance with the auditing criteria for the review of interim financial statements recommended by Consob (the Italian Regulatory Commission for Companies and the Stock Exchange) under Resolution n. 10867 dated July 31, 1997. The limited review of the half-year condensed consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with international standards on auditing (ISA Italia) and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on the half-year condensed consolidated financial statements.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying half-year condensed consolidated financial statements of the CAD IT Group as of June 30, 2016 have not been prepared, in all material respects, in accordance with the International Accounting Standard applicable to the interim financial statements (IAS 34) as adopted by the European Union.
